U.S. Latinos and Criminal Injustice Lupe S. Salinas, 2015-07-01 Latinos in the United States encompass a broad range of racial, socioeconomic, and sociopolitical identities. Originating from the Caribbean, Spain, Central and South America, and Mexico, they have unique justice concerns. The ethnic group includes U.S. citizens, authorized resident aliens, and undocumented aliens, a group that has been a constant partner in the Latino legal landscape for over a century. This book addresses the development and rapid growth of the Latino population in the United States and how race-based discrimination, hate crimes, and other prejudicial attitudes, some of which have been codified via public policy, have grown in response. Salinas explores the degrading practice of racial profiling, an approach used by both federal and state law enforcement agents; the abuse in immigration enforcement; and the use of deadly force against immigrants. The author also discusses the barriers Latinos encounter as they wend their way through the court system. While all minorities face the barrier of racially based jury strikes, bilingual Latinos deal with additional concerns, since limited-English-proficient defendants depend on interpreters to understand the trial process. As a nation rich in ethnic and racial backgrounds, the United States, Salinas argues, should better strive to serve its principles of justice.

EcoMind Frances Moore Lappe, 2011-09-13 In *EcoMind*, Frances Moore Lappe' -- a giant of the environmental movement - - confronts accepted wisdom of environmentalism. Drawing on the latest research from anthropology to neuroscience and her own field experience, she argues that the biggest challenge to human survival isn't our fossil fuel dependency, melting glaciers, or other calamities. Rather, it's our faulty way of thinking about these environmental crises that robs us of power. Lappe' dismantles seven common thought traps -- from limits to growth to the failings of democracy -- that belie what we now know about nature, including our own, and offers contrasting thought leaps that reveal our hidden power. Like her *Diet for a Small Planet* classic, *EcoMind* is challenging, controversial and empowering.

Evaluation of Episodic and Seasonal Emission Control for Transportation in Illinois Tschangho John Kim, 2002
This study evaluates the cost-effectiveness of episodic and seasonal transportation control measures for ozone in two areas of Illinois. During the 1995-2000 period, twelve ozone alert days were issued in the Greater Chicago Metropolitan Area (GCMA), and five ozone alert days were issued in the Saint Louis Metropolitan Area in 2000, in anticipation of exceeding the 1-hour standard of 0.12 ppm. In July 1997, the U.S. Environmental Protection Agency (USEPA) revised the National Ambient Air Quality Standard (NAAQS) for ozone from 0.12 ppm to 0.08 ppm, and changed the standard from a 1-hour averaging time to an 8-hour averaging time. The 8-hour ozone standard has not been implemented yet by USEPA. Episodic and seasonal controls target emission reductions when those reductions are most valuable, during an ozone episode and ozone season. Thus, episodic and seasonal control measures are expected to be more cost-effective than most fixed emission control measures, which reduce emissions on a continual basis throughout the year. A nationwide survey was conducted to find the most favorable, politically and economically, existing episodic and seasonal control programs. Based on the survey results, several episodic and seasonal control programs were identified as potentially effective and selected for further analysis. The

analysis presented evaluates selected episodic and seasonal control measures for their cost-effectiveness and identifies the most cost-effective episodic and seasonal control measures.

What WE Lost Tawfiq S. Rangwala, 2022-05-05 TORONTO STAR #1 BESTSELLER GLOBE AND MAIL AND AMAZON BESTSELLER WE Charity had changed the game. In its 25 years, the international development charity and youth empowerment movement impacted lives the world over. Innovation was at its core: while most charities focus on making the world a better place for our children, WE Charity focused on making better children for our world. Founded by the ubiquitous Kielburger brothers, WE Charity operated more like a Silicon Valley start-up than a traditional NGO. From creating stadium-filling events with A-list celebrity ambassadors to building schools, infrastructure, a hospital and even a university at lightning speed, the organization was always full-throttle. Its for-profit partner, ME to WE, filled shelves with socially-conscious products that allowed consumers to track the impact of their spending, invited young people and families to visit and work in communities WE Charity supported, and channelled proceeds back into the charity to make it self-sustaining. Unique and disruptive, WE generated energy, engagement, and accolades. But it also bred misunderstanding and, in some quarters, resentment. With a long history of propelling youth to act in support of myriad causes—making “doing good doable,” the slogan went—WE Charity was the ideal candidate to administer the Canada Student Services Grant (CSSG) program. The program, if it had happened, involved matching students within non-profits in a summer in which Covid had stolen most job opportunities. And then, WE Charity in Canada was gone. It didn’t crumble. It crashed. Unwittingly caught in the crosshairs of a partisan fight that reflects the increasing “Americanization” of Canadian politics, WE Charity was forced to shutter its doors in Canada. Once a media darling with politicians of all stripes clamouring to appear at its events, the charity was suddenly a pariah accused (falsely) of a litany of wrongdoings: political cronyism; governance failures; heavy-handed decision-making by executives; lining the pockets of the founders; manipulating children; mistreating donors; racism and international corruption. Many were shocked. Detractors were delighted. Led by fringe commentators, the media quickly piled on. Allies who spoke out were castigated and forced to take cover. But while most Canadians have heard of the so-called “WE Charity Scandal”—at times forming strong views—few are able to recount the true facts. Misperceptions and confusion have ruled the day. And many of the most important voices—including those of educators and young people—have gone unreported and unheard. In this book, former WE board member and lawyer Tawfiq Rangwala unpacks the evidence and provides the critical context around the headline-grabbing controversies that have shaped the narrative. Drawing on the factual record, his personal experiences inside the organization, and extensive interviews with supporters and critics, Rangwala cuts through the fog and explains what really happened, why it happened, and who should be held to account. The author goes even deeper with insightful, compassionate and heartbreaking interviews with WE supporters, benefactors and the politicians that used the awarding of the contract during the global pandemic crisis to paint a picture of conflicts of

interest and special favours by the Prime Minister. Along the way, we learn what has been lost and the personal cost to Canadians and people around the world. More than just a story of the rise and fall of an iconic global charity, this is a cautionary tale of the collateral damage that can be levelled by unchecked partisan politics, social media pundits, and sensationalist headlines. In the end, Canadians are left to ponder whether the real "scandal" is the demise of WE Charity and the values of fair play and due process that most of us hold dear.

Making Policy for the New Information Economy Krishna Prasad Jayakar, Chun Liu, 2023-09-10 This volume is a theoretically informed comparative analysis of the telecommunications and information policy-making process in two major developing economies, China and India. With a focus on how policies are made rather than what those policies are, the book investigates how policy actors interact within institutional structures to define policy problems and identify potential solutions. The authors explain the evolution of these policy-making systems as the two countries liberalized their economies and opened their media and telecommunications systems to competition over the past two-and-a-half decades. With applications in numerous international contexts, this book will be of interest to scholars and practitioners in public policy studies, telecommunications, business, development economics, political science, Asian studies, and public administration.
