Language, Society and Power Annabelle Mooney,Jean Stilwell Peccei,Suzanne LaBelle,2011-01 This book examines the ways in which language functions, how it influences thought and how it varies according to age, ethnicity, class and gender. It seeks to answer such questions as: How can a language reflect the status of children and older people? Do men and women talk differently? How can our use of language mark our ethnic identity? It also looks at language use in politics and the media and investigates how language affects and constructs our identities, exploring notions of correctness and attitudes towards language use. While it can be used as a stand-alone text, this edition of Language, Society and Power has also been fully cross-referenced with the new companion title: The Language, Society and Power Reader. Together these books provide the complete resource for students of English language and linguistics, media, communication, cultural studies, sociology and psychology. --Book Jacket.

Trust Management Adam Jabłoński,Barbara Kożuch,2019-07-16 element of relationships between entities, but, above all,

it positively influences the building of an organization's intellectual capital. This capital can be defined in different ways, but its definition always references elements that determine the potential of sustainable organizations, often in human, social, relational, organizational, and innovation dimensions. Trust is increasingly becoming the key determinant of this capital (Kożuch, Lenart-Gansiniec, 2017). Trust also has a number of different definitions. However, the basis of many of these definitions is the building of relationships focused on developing some kind of individual or inter-organizational link. Organizational trust is a complicated concept, and it is the basis of all organized activities performed by people in the organization, largely because trust is needed to develop relationships with integrity and commitment. Thus, it is interesting to study the relationship between trust and the building of the intellectual capital of sustainable organizations. Indeed, intellectual capital plays a special role here. It is a guide and a platform for achieving not only a competitive advantage for the sustainable organization, but also a source of value creation in the short and long term. Thus, this strategic hybrid, composed of a business model, strategy, and business processes, is favorable to the development of intellectual capital (Jabłoński 2017). Trust is an element that ties this capital to relationships in business. Moreover, it has an integrated character (R.C. Mayer, J. H. Davis, F. D. Schoorman 1995). Assuming that, nowadays, the network paradigm is becoming increasingly important, it is worth asking how the mechanism of building trust-based intellectual capital in a sustainable organization functions as its key asset in the network environment.

Mixed-Effects Regression Models in Linguistics Dirk Speelman,Kris Heylen,Dirk Geeraerts,2018-02-07 When data consist of grouped observations or clusters, and there is a risk that measurements within the same group are not independent, group-specific random effects can be added to a regression model in order to account for such within-group associations. Regression models that contain such group-specific random effects are called mixed-effects regression models, or simply mixed models. Mixed models are a versatile tool that can handle both balanced and unbalanced datasets and that can also be applied when several layers of grouping are present in the data; these layers can either be nested or crossed. In linguistics, as in many other fields, the use of mixed models has gained ground rapidly over the last decade. This methodological evolution enables us to build more sophisticated and arguably more realistic models, but, due to its technical complexity, also introduces new challenges. This volume brings together a number of promising new evolutions in the use of mixed models in linguistics, but also addresses a number of common complications, misunderstandings, and pitfalls. Topics that are covered include the use of huge datasets, dealing with non-linear relations, issues of cross-validation, and issues of model selection and complex random structures. The volume features examples from various subfields in linguistics. The book also provides R code for a wide range of analyses.

Preparing to Teach in Secondary Schools Val Brooks,Ian Abbott,Liz Bills,2007-12 Review of the first edition: An excellent introduction to all of the core professional issues that trainee teachers need to address during their training… a first port of call for all student teachers keen to understand the challenges involved in becoming a professional teacher in today's schools. Professor John Furlong, Director, Department of Educational Studies, Oxford University, UK. The new edition of this bestseller is the definitive guide for all trainee secondary school and newly qualified teachers. Using practical examples, it covers the range of core professional skills and concepts that all student teachers need to acquire, irrespective of their subject specialism or training route. Updated and revised throughout to take into account recent developments in teaching, the second edition covers topics such as Every Child Matters, Special Educational Needs, and ICT in the classroom, making it suitable for use by newly qualified teachers to support their early professional development. Informative, accessible and engaging, the book offers students: Use of examples and illustrations to make abstract or unfamiliar ideas concrete and meaningful An interactive approach whereby readers are invited to engage with the text and respond to it through a set of objectives, to be achieved by the end of the chapter Thought-provoking research to alert readers to fresh thinking and initiatives, which are at the cutting-edge of developments in the field Self-contained tasks to enable readers to complete them there and then

Approaching Difficulties in Literacy Development Felicity Fletcher-Campbell,Janet Soler,Gavin Reid,2009-09-10 Approaching Difficulties in Literacy Development: Assessments, Pedagogy and Programmes considers the complexity of literacy difficulties, showing how research into literacy difficulties has to be multi-faceted and multi-disciplinary and involve a range of research approaches and methods. The chapters show that this is necessary to accommodate the wide range of issues that can, potentially, explain literacy difficulties and suggest strategies and interventions to ease those difficulties. This Reader is relevant to all postgraduate students of Literacy, as well as educators, professionals and policy makers.

Writing-Enriched Curricula Chris M. Anson,Pamela Flash,2022-05-16 This collection introduces, theorizes, and illustrates the Writing-Enriched Curriculum (WEC), an approach to integrating relevant writing and communication instruction into diverse departmental curricula. The book organizes into three sections: The WEC Approach, which tracks WEC's genesis, theorizes its approach, and explicates the model's component moves; Accounts of Departmentally-Focused Implementation, which provides examples of the model's adaptive implementation in a range of institutional settings (including large research universities and small liberal arts colleges) and departmental contexts (including those in STEM fields, humanities, social sciences, and arts); and Extensions and Contextual Variation, which evidences ways in which WEC extends pre-existing writing initiatives and forges constructive partnerships between idiosyncratic academic departments and programs. Themes taken up in this collection include the transformative potential of engaging academic departments in collectively examining their own tacit and explicit writing values, and ways in which the WEC model's decentralized and iterative processes circumvent factors that have long threatened the sustainability of writing across the curriculum and writing in the disciplines programming--

A Short Guide to Writing about Art Sylvan Barnet,2000 A Short Guide to Writing About Art, 6/E, the best-selling text of its kind, encourages students to form their own opinions about art, and then equips them with the tools they need to write effective essays. This handy guide addresses a wealth of fundamental matters, including description versus analysis; the value of peer review; documenting sources; and editing the final essay.

Treasures in Trusted Hands Jos van Beurden,2017 Back cover: This pioneering study charts the one-way traffic of cultural and historical objects during five centuries of European colonialism. It presents abundant examples of disappeared

colonial objects and systematises these into war booty, confiscations by missionaries and contestable acquisitions by private persons and other categories. Former colonies consider this as a historical injustice that has not been undone. Former colonial powers have kept most of the objects in their custody. In the 1970s the Netherlands and Belgium returned objects to their former colonies Indonesia and DR Congo; but their number was considerably smaller than what had been asked for. Nigeria?s requests for the return of some Benin objects, confiscated by British soldiers in 1897, are rejected. As there is no consensus on how to deal with colonial objects, disputes about other categories of contestable objects are analysed. For Nazi-looted art-works, the 1998 Washington Conference Principles have been widely accepted. Although non-binding, they promote fair and just solutions and help people to reclaim art works that they lost involuntarily. To promote solutions for colonial objects, Principles for Dealing with Colonial Cultural and Historical Objects are presented, based on the 1998 Washington Conference Principles on Nazi-Confiscated Art. They are part of a model to facilitate mediation in disputes about them. Europe, the former colonisers, should do more pro-active provenance research into the acquisitions from the colonial era, both in public institutions and private collections.

   Art and Complexity J. Casti,A. Karlqvist,2003-02-19 This title is the result of a one-week workshop sponsored by the Swedish research agency, FRN, on the interface between complexity and art. Among others, it includes discussions on whether good art is complex art, how artists see the term complex, and what poets try to convey in word about complex behavior in nature.
