The Read-Aloud Scaffold Judy Bradbury,2011-09-16 This compendium of outstanding read-aloud choices for grades pre-K-3 will enrich and extend content area instruction, helping busy teachers to meet curriculum requirements within the confines of their busy schedules. It's a familiar and unfortunate story: educators everywhere are being asked to do more teaching with less—less money, less staff, and less time. One easy way to provide more content area instruction to very young readers is by scaffolding beneficial learning subjects within memorable read-aloud activities. This augments the instructional curriculum and keeps learning fun—without adding to the educator's already-full plate. Read-Aloud Scaffold: Best Books to Enhance Content Area Curriculum, Grades Pre-K-3 offers teachers and librarians over 700 content area connections through carefully selected, recently published children's trade books. These selections include fiction and non-fiction titles that represent outstanding read-aloud choices that will augment the instructional curriculum, covering subjects ranging from history to holidays to special events, and from biographies and memoirs to poetry and character education. A Closer Look suggests outstanding read-aloud choices related to key units in the curriculum and features discussion points, cross-curricular activities, writing prompts, and related online and print materials.

Bringing Classes into the Public Library Martha Seif Simpson,Lucetia I. Duwel,2015-01-24 With so much competing for the time of today's students, youth services librarians have an especially challenging job. How can they reach their target

audience? One of the surest ways is the promotion--through the local school system--of a series of class visits to the public library. But where to begin? Choosing a grade level, contacting school officials and teachers, and planning age-appropriate programs are among the many steps that librarians must take--but may feel unprepared for. Encouraging the collaboration of professionals in public libraries and local schools, this comprehensive guide presents a detailed framework for a versatile program of class visits. Written by two public librarians with firsthand experience, it describes, in a step-by-step format, how to accomplish a structured series of class visits. The book addresses procedures, planning and implementation, and offers suggestions for both elementary and secondary school visits. Informational packets and other print materials are provided for each level. Possible challenges are discussed, with thoughts on their impact on the overall program and ways to find workable solutions. The appendices contains easily adaptable templates including sample schedules, letters to teachers and evaluation forms.

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and

support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools, as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English/language arts with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests, as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license

Creating Critical Classrooms Mitzi Lewison, Christine Leland, Jerome C. Harste, 2014-08-07 This popular text articulates a powerful theory of critical literacy—in all its complexity. Critical literacy practices encourage students to use language to question the everyday world, interrogate the relationship between language and power, analyze popular culture and media, understand how power relationships are socially constructed, and consider actions that can be taken to promote social justice. By providing both a model for critical literacy instruction and many examples of how critical practices can be enacted in daily school life in elementary and middle school classrooms, *Creating Critical Classrooms* meets a huge need for a practical, theoretically based text on this topic. Pedagogical features in each chapter • Teacher-researcher Vignette • Theories that Inform Practice • Critical Literacy Chart • Thought Piece • Invitations for Disruption • Lingering Questions New in the Second Edition • End-of-chapter Voices from the Field • More upper elementary-grade examples • New text sets drawn from Classroom Resources • Streamlined, restructured, revised, and updated throughout • Expanded Companion Website now includes annotated Classroom Resources; Text Sets; Resources by Chapter; Invitations for Students; Literacy Strategies; Additional Resources
