A discography of Beatles' music provides facts and behind-the-scenes secrets about every known and available Beatles recording produced from the first meeting of John Lennon and Paul McCartney in 1957 through the Rubber Soul sessions in late 1965. Legendary leadership and elite performance expert Robin Sharma introduced The 5am Club concept over twenty years ago, based on a revolutionary morning routine that has helped his clients maximize their productivity, activate their best health and bulletproof their serenity in this age of overwhelming complexity. Now, in this life-changing book, handcrafted by the author over a rigorous four-year period, you will discover the early-rising habit that has helped so many accomplish epic results while upgrading their happiness, helpfulness and feelings of aliveness. Through an enchanting—and often amusing—story about two struggling strangers who meet an eccentric tycoon who becomes their secret mentor, The 5am Club will walk you through: How great geniuses, business titans and the world's wisest people start their mornings to produce astonishing achievements A little-known formula you can use instantly to wake up early feeling inspired, focused and flooded with a fiery drive to get the most out of each day A step-by-step method to protect the quietest hours of daybreak so you have time for exercise, self-renewal and personal growth A neuroscience-based practice proven to help make it easy to rise while most people are sleeping, giving you precious time for yourself to think, express your creativity and begin the day peacefully instead of being rushed "Insider-only" tactics to defend your gifts, talents and dreams against digital distraction and trivial diversions so you enjoy fortune, influence and a magnificent impact on the world Part manifesto for mastery, part playbook for genius-grade productivity and part companion for a life lived beautifully, The 5am Club is a work that will transform your life. Forever.

Part of the seminal Cambridge History of Music series, this volume departs from standard histories of early modern Western music in two important ways. First, it considers music as something primarily experienced by people in their daily lives, whether as musicians or listeners, and as something that happened in particular locations, and different intellectual and ideological contexts, rather than as a story of genres, individual counties, and composers and their works. Second, by constraining discussion within the limits of a 100-year timespan, the music culture of the sixteenth century is freed from its conventional (and tenuous) absorption within the abstraction of 'the Renaissance', and is understood in terms of recent developments in the broader narrative of this turbulent period of European history. Both an original take on a well-known period in early music and a key work of reference for scholars, this volume makes an important contribution to the history of music.

The never-before-told true account of the design and development of the first desktop computer by the world's most famous high-styled typewriter company, more than a decade before the arrival of the Osborne 1, the Apple 1, the first Intel microprocessor, and IBM's PC5150. The human, business, design, engineering, cold war, and tech story of how the Olivetti company came to be, how it survived two world wars and

brought a ravaged Italy back to life, how after it mastered the typewriter business with the famous "Olivetti touch," it entered the new, fierce electronics race; how its first desktop computer, the P101, came to be; how, within eighteen months, it had caught up with, and surpassed, IBM, the American giant that by then had become an arm of the American government, developing advanced weapon systems; Olivetti putting its own mainframe computer on the market with its desktop prototype, selling 40,000 units, including to NASA for its lunar landings. How Olivetti made inroads into the US market by taking control of Underwood of Hartford CT as an assembly plant for Olivetti's own typewriters and future miniaturized personal computers; how a week after Olivetti purchased Underwood, the US government filed an antitrust suit to try to stop it; how Adriano Olivetti, the legendary idealist, socialist, visionary, heir to the company founded by his father, built the company into a fantastical dynasty--factories, offices, satellite buildings spread over more than fifty acres--while on a train headed for Switzerland in 1960 for supposed meetings and then to Hartford, never arrived, dying suddenly of a heart attack at fifty-eight . . . how eighteen months later, his brilliant young engineer, who had assembled Olivetti's superb team of electronic engineers, was killed, as well, in a suspicious car crash, and how the Olivetti company and the P101 came to its insidious and shocking end.

We do not get what we deserve... we get what we negotiate!If you are looking to improve your negotiation skills this book is for you. Negotiation skills strongly condition

the professional and personal life of any individual. Those skills are the more accurate predictor of a person's future success. People with better negotiation skills routinely overcome others with superior intellects, more knowledge and experience, and even more grit. Many people held the erroneous belief that negotiation skills are of interest for only a few individuals who meet in select venues to make deals that do not concern most of us. Nothing could be farther from the truth: the boss negotiates with the worker, the husband negotiates with the wife, the pupil negotiates with the teacher, the seller negotiates with the buyer, and the son negotiates with his mother. People who think that they do not engage in negotiations actually do it on a daily basis, and they win and lose on each one of those interactions. Unfortunately, very few people had the benefit of receiving negotiation training. This book removes that handicap: it reveals the secrets, tactics and strategies used by professional international negotiation sharks. Here you will find everything you need to obtain better outcomes on your personal and professional negotiations. An easy read, this is a book you will refer to frequently. Topics include:- The three crucial elements of any negotiation.- Sources of power in a negotiation.- Negotiation styles.- Opening negotiation tactics. - Middle-of-the-game negotiation tactics- Closing negotiation tactics.- How to deal with aggressive confrontations.- How to negotiate on the phone.- What you must do after the negotiation ends. This is a must-have book for all the people who negotiate, and who does not? The author has over 30 years of sales and negotiation experience. A sought-after international sales consultant, the single most important thing that sets him at the top of his profession is his ability to produce measurable results for his clients. Do yourself a favor and buy this book now! What readers say: "An easy-to-read book that is a very powerful tool." - Daniel S. "We negotiate on a daily basis and with the tactics presented here you will learn how to negotiate better." - Paulo Miranda "A satisfying read that gives extremely relevant information." - Fernando Botto "Very practical, teaching how to negotiate in a way that can be used daily." - M. Mendes "I liked it, good reading, extremely useful and very valuable as a reference work." - Adriano C. In spite of all the papers that others have written about the manuscript, there is no complete survey of all the approaches, ideas, background information and analytic studies that have accumulated over the nearly fifty-five years since the manuscript was discovered by Wilfrid M. Voynich in 1912. This report pulls together all the information the author could obtain from all the sources she has examined, and to present it in an orderly fashion. The resulting survey will provide a firm basis upon which other students may build their work, whether they seek to decipher the text or simply to learn more about the problem.

How do the temporal and dynamic patterns of media forms and practices create complex constructions of meaning, identity and value? How can we describe the way cinematic images generate and transform the affectively grounded structures that survey, confirm or revise a political community's horizon of values? Using the exemplary case of feelings of guilt, the author develops an approach that makes patterns of audiovisual compositions intelligible as aesthetic modulations of moral feelings. A sense of guilt is presented here as neither an individualistic psychological emotion nor an external social mechanism of control but as a paradigmatic case for understanding politics and history as based upon embodied affectivity and shared relations to the world. By taking three distinct examples – German Post-War cinema, Hollywood Western and films on climate change – patterns of audiovisual composition and the inherent calculation of affect are analyzed as practices shaping the conditions of

possibility of political communities and their historicity.

"Being a vital modern technology, satellite systems for navigation, telecommunication, and geosciences have developed rapidly in the last 25 years. Modern satellite technologies have become a base of our civilization and support our day-to-day activity in both practice and geosciences. This book is devoted to GNSS-remote sensing for ionosphere research, modeling and mitigation techniques to diminish the ionosphere and multipath impacts on GNSS, and survey of the modern satellite missions and technologies. We hope that the experts' opinions presented in the book will be interesting for the research community and students in the area of satellites and space missions as well as in engineering and geoscience research" -- IntechOpen.

Made in Italy serves as a comprehensive and rigorous introduction to the history, sociology, and musicology of contemporary Italian popular music. Each essay, written by a leading scholar of Italian music, covers the major figures, styles, and social contexts of pop music in Italy and provides adequate context so readers understand why the figure or genre under discussion is of lasting significance to Italian popular music. The book first presents a general description of the history and background of popular music, followed by essays organized into thematic sections: Themes; Singer-Songwriters; and Stories.

Jazz Italian Style explores a complex era in music history, when politics and popular culture collided with national identity and technology. When jazz arrived in Italy at the conclusion of World War I, it quickly became part of the local music culture. In Italy, thanks to the gramophone and radio, many Italian listeners paid little attention to a performer's national and ethnic identity. Nick LaRocca (Italian-American), Gorni Kramer (Italian), the Trio Lescano (Jewish-Dutch), and Louis Armstrong (African-American), to name a few, all found equal footing in the Italian soundscape. The book reveals how Italians made jazz their own, and how, by the mid-1930s, a genre of jazz distinguishable from American varieties and supported by Mussolini began to flourish in Northern Italy and in its turn influenced Italian-American musicians. Most importantly, the book recovers a lost repertoire and an array of musicians whose stories and performances are compelling and well worth remembering.

Rainbow Body: The Life and Realization of a Tibetan Yogin, Togden Ugyen Tendzin, presents the remarkable life story of Togden Ugyen Tendzin (1888–1962), a Tibetan yogin who in death achieved the “rainbow body,” the release of the physical body in the essence of the five elements and one of the highest spiritual attainments of Dzogchen, recognized as the supreme level of Tibetan Buddhism. His nephew, Chögyal Namkhai Norbu, one of the greatest living masters of Dzogchen, composed the book from his own recollections of his uncle as well as direct quotes from talks with the great yogin himself and his disciple Sala Karma Samten. The book traces the yogin's childhood struggles, the circumstances that led him to his teacher, the eminent Adzom Drugpa, and his difficult path to self-realization. Finally, Chögyal Namkhai Norbu relates the story of Ugyen Tendzin's death during imprisonment by the Chinese, when witnesses discovered that though his sheepskin robe still sat upright, his body was gone—a testament to its having dissolved into the rainbow body.

At the gullible age of under thirteen, Adnan decides it was time to start a journey. He feels restless and it bothers him no end. Whatever he has been thirsting for, he's ready, he thinks. He is gutsy, no doubt, both in mind and spirit. One day, toughened by inherent courage and determination, he runs away, unsure where he's heading, yet he continues. He knows his family will move heaven and earth to trace his whereabouts, but no one will find him. A twist of fate, however, intervened. He was back home after months of bizarre wandering, without his predilection. All his boyish dreams end there, he thinks, but he was wrong. In 2005, his real

journey begins, a real one, not the fanciful ones he had experienced, he thought extraordinary. He thinks he'll find the answers to his long time reveries by braving the odds and undermining the fears in a faraway land like Afghanistan.

"I worked for the system for many years; maybe I wasn't fully conscious of my role within this perverted system, but it does not take away the fact that I was bang in the middle of it, serving it and getting my pecuniary reward for being a slave. It was only when my awakening started that I finally reconnected with my spiritual self, and I finally started ripping through the veil of deceit that I had willingly held before my eyes for decades. This book, in a way, was not willed by me; I was commissioned to write another book, and I only realised I had written 'the wrong one', most of this one, two days before my deadline... This is not a study in one specific aspect of New Age spirituality, rather, it gives a perspective of the complexity and breath of New Age spiritual beliefs and it also tries to outline the philosophical palimpsest of New Age beliefs, something which I believe has long been overdue. This book also has the sceptic in mind (the real sceptic, the one who doubts but keeps an open mind); that's why it draws so heavily on scientific and academic studies; let's face it... Spirituality and science are not in contradiction, on the contrary, as the paradigm shift we have been experiencing which is now gaining momentum becomes clearer and clearer, more and more established, we will all realise that science and spirituality are exactly the same phenomenon, and it was simply our limited perspective that allowed us to perceive only a part of the bigger picture at a time. This book is a bit confessional, a bit an act of sharing of what I have rediscovered after so many years of atrophy. I am blessed, I am really blessed because I have been given a second chance, because my life has led me to have a glimpse at what lies beyond the veil of deceit that has been pulled over our eyes by a perverted system. I make no apologies about being critical, even politically critical, of the system that is trying to enslave us all; yes, I believe in a world without money, and I touch on how we may get there in this book. Yes, I believe we are all spiritual beings with a physical body, not the other way round; yes, I believe we have been fooled for at least hundreds of years, and this is my little contribution towards tearing down this dystopian system, and starting to build the utopia we all deserve. I love you all." New Age Spirit is a guide to New Age Spirituality. Looking at New Age spirituality from a philosophical, religious, scientific and, of course, spiritual perspective, it talks about: - Source - New Age spirituality and religion - New Age spirituality and science - New Age spirituality and politics - The hidden history of the world - Consciousness - The chakras, the Kundalini and the Third Eye - Awakening - The Great Awakening - The Age of Aquarius - Vibrational beings - Prayers, blessings and mantras - Our Guests (ETs and UFOs) - Karma and the Law of Attraction - Is a world without money possible? - Crystals - The amazing qualities of water - Lucid dreaming Blessings.
