

## 05 The Complexity Of Identity Beverly Tatum

The classic, bestselling book on the psychology of racism -- now fully revised and updated Walk into any racially mixed high school and you will see Black, White, and Latino youth clustered in their own groups. Is this self-segregation a problem to address or a coping strategy? Beverly Daniel Tatum, a renowned authority on the psychology of racism, argues that straight talk about our racial identities is essential if we are serious about enabling communication across racial and ethnic divides. These topics have only become more urgent as the national conversation about race is increasingly acrimonious. This fully revised edition is essential reading for anyone seeking to understand the dynamics of race in America.

An unprecedented political, economic, social, and legal storm was unleashed by the United Kingdom's June 2016 referendum to leave the European Union and the government's response to the vote. After decades of strengthening European integration and independence, Brexit necessitates a deep understanding of its international law implications on both sides of the English Channel in order to chart the stormy seas of negotiating and advancing beyond separation. In Complexity's Embrace, international law practitioners and academics from the United Kingdom, Europe, Canada and the United States look beyond the rhetoric of "Brexit Means Brexit" and "no agreement is better than a bad agreement" to explain the challenges that need to be addressed in the diverse fields of trade, financial services, insolvency, intellectual property, environment, and human rights. The authors in this volume articulate, with unvarnished clarity, the international law implications of Brexit, providing policy makers, commentators, the legal community, and civil society with critical information they need to participate in negotiating their future within or outside Europe. Complexity's Embrace explores the many unprecedented questions about the UK's future trading arrangements. Contributors include Thomas Cottier, Armand de Mestral, Oonagh E. Fitzgerald, David A. Gantz, Markus Gehring, Valerie Hughes, Matthias Lehmann, Eva Lein, Dorothy Livingston, Richard Macrory, Luke McDonagh, Marc Mimler, Howard P. Morris, Gabriel Moss, Helen Mountfield, Federico M. Mucciarelli, Joe Newbigin, Colm O'Cinneide, Damilola S. Olawuyi, Christoph G. Paulus, Maziar Peihani, Freedom-Kai Phillips, Stephen Tromans, Diana Wallis, and Dirk Zetsche.

This book has been primarily written for people who are interested and involved in helping students maximise the learning and development they gain from their higher education experience. The authors contributing to this book hope that their attempt to examine and give practical meaning to the idea of lifewidness makes sense to you and helps you support and facilitate development of people in your professional context. We hope also that it might have meaning for you in your own life. The book is also written for people who are helping higher education institutions develop a better understanding of the ways in which students engage in and are shaped by their whole life experience while they are studying. And for those people who are trying to bring about change in institutional practice, particularly those who are finding it challenging, we hope the contributions in this book will reinforce your conviction that this is a worthwhile thing to do. In recent years, Universities in the UK have been encouraged to evaluate what they do through the lens of the students' experience. This has resulted in an increasing institutional interest and awareness in the way in which students integrate higher education with their life beyond the campus. Student Support Services in some universities have been inspired by the visionary report 'Learning Reconsidered: A Campus-wide Focus on the Student Experience' (NASPA and ACPA 2004). We hope that this book will encourage and be of value to those who make decisions or who create policies relating to the student experience.

Analyzing changes in the role and place of NATO, European integration, and Franco-American relations in foreign policy discourse under Presidents Jacques Chirac and Nicolas Sarkozy, this book provides an original perspective on French foreign policy and its identity construction. The book employs a novel research design for the analysis of foreign policies, which can be used beyond the case of France, by combining the discourse theory of the Essex School with Interpretive Policy Analysis to examine political ideas and how they are organized into a foreign policy identity. On these grounds, the volume undertakes a comparative analysis of parliamentary and executive discourse of President Chirac's failed attempt at NATO reintegration in the 1990s, Sarkozy's successful attempt in the 2000s, and the Libyan War. Ostermann depicts French foreign policy and identity as turning away from the European Union, atlanticizing, and losing its American nemesis. As a result, France uses a much more pragmatic, de-unionized, and pro-American strategy to implement foreign policy objectives than before. Offering a new and innovative explanation for a major change in French foreign policy and grand strategy, this book will be of great interest to scholars of NATO, European defense cooperation, and foreign policy.

The benefits of mindfulness include better performance, heightened creativity, deeper self-awareness, and increased charisma—not to mention greater peace of mind. This book gives you practical steps for building a sense of presence into your daily work routine. It also explains the science behind mindfulness and why it works and gives clear-eyed warnings about the pitfalls of the fad. This volume includes the work of: Daniel Goleman Ellen Langer Susan David Christina Congleton This collection of articles includes "Mindfulness in the Age of Complexity," an interview with Ellen Langer by Alison Beard; "Mindfulness Can Literally Change Your Brain," by Christina Congleton, Britta K. Hölzel, and Sara W. Lazar; "How to Practice Mindfulness Throughout Your Work Day," by Rasmus Hougaard and Jacqueline Carter; "Resilience for the Rest of Us," by Daniel Goleman; "Emotional Agility: How Effective Leaders Manage Their Thoughts and Feelings," by Susan David and Christina Congleton; "Don't Let Power Corrupt You," by Dacher Keltner; "Mindfulness for People Who Are Too Busy to Meditate," by Maria Gonzalez; "Is Something Lost When We Use Mindfulness as a Productivity Tool?" by Charlotte Lieberman; and "There Are Risks to Mindfulness at Work," by David Brendel. How to be human at work. The HBR Emotional Intelligence Series features smart, essential reading on the human side of professional life from the pages of Harvard Business Review. Each book in the series offers proven research showing how our emotions impact our work lives, practical advice for managing difficult people and situations, and inspiring essays on what it means to tend to our emotional well-being at work. Uplifting and practical, these books describe the social skills that are critical for ambitious professionals to master.

This book constitutes the refereed proceedings of the 34th International Symposium on Mathematical Foundations of Computer Science, MFCS 2009, held in Novy Smokovec, High Tatras, Slovakia, in August 2009. The 56 revised full papers presented together with 7 invited lectures were carefully reviewed and selected from 148 submissions. All current aspects in theoretical computer science and its mathematical foundations are addressed, including algorithmic game theory, algorithmic learning theory, algorithms and data structures, automata, grammars and formal languages, bioinformatics, complexity, computational geometry, computer-assisted reasoning, concurrency theory, cryptography and security, databases and knowledge-based systems, formal specifications and program development, foundations of computing, logic in computer science, mobile computing, models of computation, networks, parallel and distributed computing, quantum computing, semantics and verification of programs, theoretical issues in artificial intelligence.

This volume covers the period from the beginning of Whitehead and Russell's work on Volume 2 of the Principles of Mathematics to the critical discovery of the theory of descriptions in 1905. Contains many previously unpublished manuscripts.

“Powerful. . . . a revelation.” —The New York Times “With a literary authority rare in a debut novel, it places Native American voices front and center before readers’ eyes.” —NPR/Fresh Air One of The New York Times 10 Best Books of the Year and winner of the PEN/Hemingway Award, Tommy Orange’s wondrous and shattering bestselling novel follows twelve characters from Native communities: all traveling to the Big Oakland Powwow, all connected to one another in ways they may not yet realize. Among them is Jacquie Red Feather, newly sober and trying to make it back to the family she left behind. Dene Oxendene, pulling his life together after his uncle’s death and working at the powwow to honor his memory. Fourteen-year-old Orvil, coming to perform traditional dance for the very first time. Together, this chorus of voices tells of the plight of the urban Native American—grappling with a complex and painful history, with an inheritance of beauty and spirituality, with communion and sacrifice and heroism. Hailed as an instant classic, *There There* is at once poignant and unflinching, utterly contemporary and truly unforgettable. One of the Best Books of the Year: The Washington Post, NPR, Time, O, The Oprah Magazine, The Dallas Morning News, GQ, Entertainment Weekly, BuzzFeed, San Francisco Chronicle, The Boston Globe

This comprehensive introduction to algebraic complexity theory presents new techniques for analyzing P vs NP and matrix multiplication. This volume is presented in four sections based on recent research in the field: the sources of identity, the tie between identity and the social structure, the non-cognitive outcomes - such as emotional - of identity processes, and the idea that individuals have multiple identities. This timely work will be of interest to social psychologists in sociology and psychology, behavioral scientists, and political scientists.

Frontiers in Computational Chemistry, originally published by Bentham and now distributed by Elsevier, presents the latest research findings and methods in the diverse field of computational chemistry, focusing on molecular modeling techniques used in drug discovery and the drug development process. This includes computer-aided molecular design, drug discovery and development, lead generation, lead optimization, database management, computer and molecular graphics, and the development of new computational methods or efficient algorithms for the simulation of chemical phenomena including analyses of biological activity. In Volume 1, the leading researchers in the field have collected eight different perspectives in the application of computational methods towards drug design to provide an up-to-date rendering of the current field. This volume covers a variety of topics from G protein-coupled receptors, to the use of cheminformatics and bioinformatics, computational tools such as Molecular Mechanics Poisson-Boltzmann Surface Area, protein-protein interactions, the use of computational methods on large biological data sets, various computational methods used to identify pharmaceutically relevant targets, and more. Brings together a wide range of research into a single collection to help researchers keep up with new methods Uniquely focuses on computational chemistry approaches that can accelerate drug design Makes a solid connection between experiment and computation and the novel application of computational methods in the fields of biology, chemistry, biochemistry, physics, and biophysics, with particular focus on the

integration of computational methods with experimental data

Amidst discontent over America's growing diversity, many white Americans now view the political world through the lens of a racial identity. Whiteness was once thought to be invisible because of whites' dominant position and ability to claim the mainstream, but today a large portion of whites actively identify with their racial group and support policies and candidates that they view as protecting whites' power and status. In *White Identity Politics*, Ashley Jardina offers a landmark analysis of emerging patterns of white identity and collective political behavior, drawing on sweeping data. Where past research on whites' racial attitudes emphasized out-group hostility, Jardina brings into focus the significance of in-group identity and favoritism. *White Identity Politics* shows that disaffected whites are not just found among the working class; they make up a broad proportion of the American public - with profound implications for political behavior and the future of racial conflict in America.

*Culturally Sustaining Pedagogies* raises fundamental questions about the purpose of schooling in changing societies. Bringing together an intergenerational group of prominent educators and researchers, this volume engages and extends the concept of culturally sustaining pedagogy (CSP)—teaching that perpetuates and fosters linguistic, literate, and cultural pluralism as part of schooling for positive social transformation. The authors propose that schooling should be a site for sustaining the cultural practices of communities of color, rather than eradicating them. Chapters present theoretically grounded examples of how educators and scholars can support Black, Indigenous, Latinx, Asian/Pacific Islander, South African, and immigrant students as part of a collective movement towards educational justice in a changing world. **Book Features:** A definitive resource on culturally sustaining pedagogies, including what they look like in the classroom and how they differ from deficit-model approaches. Examples of teaching that sustain the languages, literacies, and cultural practices of students and communities of color. Contributions from the founders of such lasting educational frameworks as culturally relevant pedagogy, funds of knowledge, cultural modeling, and third space. **Contributors:** H. What does it mean to be a gay man living in the suburbs? Do you identify primarily as gay, or suburban, or some combination of the two? For that matter, how does anyone decide what his or her identity is? In this first-ever ethnography of American gay suburbanites, Wayne H. Brekhus demonstrates that who one is depends at least in part on where and when one is. For many urban gay men, being homosexual is key to their identity because they live, work, and socialize in almost exclusively gay circles. Brekhus calls such men "lifestylers" or peacocks. Chameleons or "commuters," on the other hand, live and work in conventional suburban settings, but lead intense gay social and sexual lives outside the suburbs. Centaurs, meanwhile, or "integrators," mix typical suburban jobs and homes with low-key gay social and sexual activities. In other words, lifestylers see homosexuality as something you are, commuters as something you do, and integrators as part of yourself. Ultimately, Brekhus shows that lifestyling, commuting, and integrating embody competing identity strategies that occur not only

among gay men but across a broad range of social categories. What results, then, is an innovative work that will interest sociologists, psychologists, anthropologists, and students of gay culture.

African-American writer Richard Wright (1908–1960) was celebrated during the early 1940s for his searing autobiography (Black Boy) and fiction (Native Son). By 1947 he felt so unwelcome in his homeland that he exiled himself and his family in Paris. But his writings changed American culture forever, and today they are mainstays of literature and composition classes. He and his works are also the subjects of numerous critical essays and commentaries by contemporary writers. This volume presents a comprehensive annotated bibliography of those essays, books, and articles from 1983 through 2003. Arranged alphabetically by author within years are some 8,320 entries ranging from unpublished dissertations to book-length studies of African American literature and literary criticism. Also included as an appendix are addenda to the author's earlier bibliography covering the years from 1934 through 1982. This is the exhaustive reference for serious students of Richard Wright and his critics.

In this ebook, a collection of 18 papers presents empirical research, as well as novel theoretical considerations, on how multiple identities are being managed by the individuals holding them. The papers draw on theories from social psychology in the context of the social identity approach. The first chapter presents eight papers on different types of multiple identity configurations in a variety of contexts, and the costs and benefits of these configurations for the individual (e.g., well-being). The second chapter gives insights on how conflict between multiple identities is managed by individuals. And the final chapter analyses how multiple identities impact intragroup and intergroup relations.

**NATIONAL BESTSELLER • A stunning “portrait of the enduring grace of friendship” (NPR) about the families we are born into, and those that we make for ourselves. A masterful depiction of love in the twenty-first century. A NATIONAL BOOK AWARD FINALIST • A MAN BOOKER PRIZE FINALIST • WINNER OF THE KIRKUS PRIZE** A Little Life follows four college classmates—broke, adrift, and buoyed only by their friendship and ambition—as they move to New York in search of fame and fortune. While their relationships, which are tinged by addiction, success, and pride, deepen over the decades, the men are held together by their devotion to the brilliant, enigmatic Jude, a man scarred by an unspeakable childhood trauma. A hymn to brotherly bonds and a masterful depiction of love in the twenty-first century, Hanya Yanagihara's stunning novel is about the families we are born into, and those that we make for ourselves. Look for Hanya Yanagihara's new novel, To Paradise, coming in January 2022.

"What does everyone in the modern world need to know? [The author's] answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. [The author discusses] discussing discipline, freedom, adventure and responsibility, distilling the world's

wisdom into 12 practical and profound rules for life"--

This book offers a self-contained overview of the entropic approach to quantum dynamical systems. In it, complexity in quantum dynamics is addressed by comparison with the classical ergodic, information, and algorithmic complexity theories.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

These essays include writings from Cornel West, Michael Omi, Audre Lorde, Gloria Anzaldua and Michelle Fine. The essays address the multiplicity and scope of oppressions ranging from ableism to racism and other less-well known social aberrations. "One of the few world intellectuals on whom we may rely to make sense out of our existential confusion."—Nadine Gordimer In this sweeping philosophical work, Amartya Sen proposes that the murderous violence that has riven our society is driven as much by confusion as by inescapable hatred. Challenging the reductionist division of people by race, religion, and class, Sen presents an

inspiring vision of a world that can be made to move toward peace as firmly as it has spiraled in recent years toward brutality and war.

Discover how girls develop a sense of self as they struggle to make sense of complex and complicated times *Working Relationally with Girls: Complex Lives, Complex Identities* examines the experience of being a girl in today's society and the difficulties social work practitioners face in developing a universal theory that represents that experience. This unique book analyzes how—and why—gender is still a complicated barrier for most girls, despite living in “post-feminist” times. Working from a variety of orientations, the book offers practical suggestions on how to help girls deal with interpersonal tensions, interpersonal conflicts, relational dilemmas, and the difficulties that stem from rules and norms of what is still a male-dominated society. Human service practitioners, regardless of their fields, face an everyday struggle to understand how adolescent girls construct identities in relation to the culture in which they live. The contributors to *Working Relationally with Girls* call on a range of disciplines, including child and youth care, cultural studies, feminist theory, counseling, and social psychology, to examine how girls interpret cultural expectations to develop a sense of self under complex conditions. This unique book addresses the subtle—and not-so-subtle—practices (symbols, metaphors, images, scripts, rules, norms, and narratives) that shape girls' lives, providing the tools to build a basic framework that will help you understand how girls are alike—and how they're different. *Working Relationally with Girls* examines: how mothers and daughters perceive general differences regarding sexual experiences in adolescence how girls' health issues are constructed within the context of their dating relationships what do mothers and daughters want to know about each other's sexuality the difficulty girls have in articulating their needs and desires in romantic relationships how many girls deal with what they see as an impossible choice—compromising their sense of self to maintain a relationship or compromising the relationship to maintain their sense of self how the dynamics of a dating relationship can affect a girl's development and health the influence of media on constructing an identity how minorities form an identity when dealing with exclusion and belonging in a predominately white community using theater to examine the experience of identity formation and much more! *Working Relationally with Girls* is an essential guide to understanding how girls make sense of the world and how their decisions affect their gender and identity development. Social workers, health care professionals, child and youth care practitioners, and counselors will find this rich combination of theory and practice invaluable as an everyday resource.

The place of religion in society has changed profoundly in the last few centuries, particularly in the West. In what will be a defining book for our time, Taylor takes up the question of what these changes mean, and what, precisely, happens when a society becomes one in which faith is only one human possibility among others.

This book presents a journey into the ideas, outlooks and identity of young Muslims in America today. Based on around 400 in-depth interviews with young Muslims from Florida, Maryland, Massachusetts, Michigan, New York and Virginia, all the richness and n

*Researching Medical Education* is an authoritative guide to excellence in educational research in the health professions.

Presented by the Association for the Study of Medical Education and the Association for Medical Education in Europe, *Researching Medical Education* includes contributions from a team of international clinicians and non-clinical researchers in health education, representing a range of disciplines and backgrounds. This accessible reference provides readers with the basic building blocks of research, introduces a range of theories and how to use them, illustrates a diversity of methods and their use, and gives guidance on practical researcher development. By linking theory and design and methods across the health profession education research spectrum, this book supports the improvement of quality, capacity building and knowledge generation. *Researching Medical Education* is the ideal resource for anyone researching health education, from undergraduate, through postgraduate training, to continuing professional development.

In the current ever changing world – the liquid modernity – the most pressing psychological challenge to all of us is to create and maintain a personal balance between mental stability and mental flexibility. In *Transformative Learning and Identity* Knud Illeris, one of the leading thinkers on the way people learn, explores, updates and re-defines the concept and understanding of transformative learning while linking the concept of transformative learning to the concept of identity. He thoroughly discusses what transformative learning is or could be in a broader learning theoretical perspective, including various concepts of learning by change, as opposed to learning by addition, and ends up with a new, short and distinct definition. He also explores and discusses the concept of identity and presents a general model depicting the complexity of identities today. Building on the work of Mezirow, various perspectives of transformative learning are analysed and discussed, including; transformative learning in different life ages; progressive and regressive transformations; motivation and identity defence; development of identity; personality and competence, and transformative learning in school, education, working life, and in relation to current and future life conditions. This vital new book by one of the leading learning theorists of our time will prove of lasting interest to academics, teachers, instructors, leaders and researchers in the field of adult learning and education. It will also appeal to many students and researchers of psychology and sociology in general.

SHORTLISTED FOR THE BAILEYâ€™S WOMENâ€™S PRIZE FOR FICTION 2014. From the award-winning author of *Half of a Yellow Sun*, a powerful story of love, race and identity. As teenagers in Lagos, Ifemelu and Obinze fall in love. Their Nigeria is under military dictatorship, and people are fleeing the country if they can. The self-assured Ifemelu departs for America. There she suffers defeats and triumphs, finds and loses relationships, all the while feeling the weight of something she never thought of back home: race. Obinze had hoped to join her, but post-9/11 America will not let him in, and he plunges into a dangerous, undocumented life in London. Thirteen years later, Obinze is a wealthy man in a newly democratic Nigeria, while Ifemelu has achieved success as a blogger. But after so long apart and so many changes, will they find the courage to meet again, face to face? Fearless, gripping, spanning three continents and numerous lives, the National Book Critics Circle Award-winning *Americanah* is a richly told story of love and expectation set in today's globalized world.

Identity Development of College Students Building off the foundational work of Erik Erikson and Arthur Chickering, *Identity*

Development of College Students adds broad and innovative research to describe contemporary perspectives of identity development at the intersection of context, personal characteristics, and social identities. The authors employ different theoretical perspectives to explore the nature of context—how it both influences and is influenced by multiple social identities. Each chapter includes discussion and reflection questions and activities for individual or small group work. Praise for Identity Development of College Students "Susan R. Jones and Elisa S. Abes have provided us with a comprehensive and beautifully written overview of the evolution of identity development theory. This book reads like a novel while at the same time conveying important ideas, critical analysis, and cutting-edge research that will enhance student affairs practice." —NANCY J. EVANS, professor, Student Affairs Program, School of Education, Iowa State University "The authors masterfully present a holistic, integrative, and multi-dimensional approach to the identity development of today's college student. This text should be required reading for those engaged in research and practice in the areas of student affairs, counseling, higher education, and cultural studies." —SHARON KIRKLAND-GORDON, director, Counseling Center, University of Maryland, College Park "Susan R. Jones and Elisa S. Abes's work is groundbreaking—charting new scholarly territory and making one of the most significant contributions to identity literature in many years. Building on contemporary and traditional theoretical foundations, Jones and Abes offer new models of identity development essential for understanding a diversity of college students." —MARYLU K. MCEWEN, associate professor emerita, University of Maryland, College Park

"Racism, Eh? is the first publication that examines racism within the broad Canadian context. This anthology brings together some of the visionaries who are seeking to illuminate the topics of race and racism in Canada through the analysis of historical and contemporary issues, which address race and racism as both material and psychic phenomena. Fundamentally interdisciplinary in nature, this text will be an invaluable resource for undergraduate and graduate students, academics studying or practicing within the Humanities and the Social Sciences, and anyone seeking information on what has been a little explored and poorly understood Canadian issue."--pub. desc.

This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics. It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by 'Soviet Encyclopaedia Publishing House' in five volumes in 1977-1985. The annotated translation consists of ten volumes including a special index volume. There are three kinds of articles in this ENCYCLOPAEDIA. First of all there are survey-type articles dealing with the various main directions in mathematics (where a rather fine subdivision has been used). The main requirement for these articles has been that they should give a reasonably complete up-to-date account of the current state of affairs in these areas and that they should be maximally accessible. On the whole, these articles should be understandable to mathematics students in their first specialization years, to graduates from other mathematical areas and, depending on the specific subject, to specialists in other domains of science, engineers and teachers of mathematics. These articles treat their material at a fairly general level and aim to give an idea of the kind of problems, techniques and concepts involved in the area in question. They also contain background and motivation rather than

precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions. The second kind of article, of medium length, contains more detailed concrete problems, results and techniques.

Examines the critical art of rethinking: learning to question your beliefs and to know what you don't know, which can position you for success at work and happiness at home. It is a book about the benefit of doubt, and about how we can get better at embracing the unknown and the joy of being wrong

This book brings together contributions by leading researchers in computational complexity theory written in honor of Somenath Biswas on the occasion of his sixtieth birthday. They discuss current trends and exciting developments in this flourishing area of research and offer fresh perspectives on various aspects of complexity theory. The topics covered include arithmetic circuit complexity, lower bounds and polynomial identity testing, the isomorphism conjecture, space-bounded computation, graph isomorphism, resolution and proof complexity, entropy and randomness. Several chapters have a tutorial flavor. The aim is to make recent research in these topics accessible to graduate students and senior undergraduates in computer science and mathematics. It can also be useful as a resource for teaching advanced level courses in computational complexity.
