While currently identitarian ideologies and essentialist notions of identity that tend to simplify and reduce life experience to simple factors are globally regaining massive attention, it becomes inevitable to recollect the thorough discussions of identity concepts of the past three decades. It also calls for an ever keener awareness of and capacity to deal with the complexity and diversity of the world we live in. Artists play a major role in the potential reflection and transformation of

perceptions and conceptions of the world – musicians, dancers, choreographers, spoken word artists, performance artists, actors, also fine art, installation, media artists or photographers alike. “Performing critical identity” points to performative practices of artists that bring to the fore a critical (self-)awareness and (self-)positioning concerning identification and belonging. Social identities such as gender, sexuality, race, class, dis/ability, age or non/religiosity are closely linked to the historical, social, regional and political dimensions of their formation. From this perspective, identities are hardly one-dimensional but complex and intersectional, and are rather to be thought of as a process of identification and belonging than as a consistent essence. As different, maybe contradictory among themselves, as they are, the performative works of artists such as Lerato Shadi, Liad Hussein Kantorowicz, Nora Chipaumire, Shu Lea Cheang, Zanele Muholi, Ohno Kazuo, Anohni Hegarty, Neo Hülcker, “We’re Muslim. Don’t Panic” or of theatre collectives such as RambaZamba and Thikwa Theater in Berlin or Theater Hora in Zurich, to name but a very small quite random selection of artists, share a critical approach towards hegemonic norms or stereotyping of identities and their representations, and empower diversity. This edition puts a specific focus on the performativity of the aesthetic practices, and wants to explore different artistic approaches, strategies, tactics and perspectives of artists when they address identity issues, when they target power relations and structures of oppression and inequality, when they empower concepts of diversity. This Call for Papers invites academic as well as artistic contributions that delve into case studies of artists performing critical identity or into more general theoretical reflections on the subject. Contributions can relate to, but are not limited to following topics: - intersectionality - subversion - (self-)empowerment - resistance - subalternity - exploitation - manipulation - (anti-)feminism - appropriation - cultural globalisation - transculturality - hybrid identities - collectives - body - stage - audience - de-/construction of the difference of aesthetic genres and of high/popular culture - capitalism - colonialism - (re-)production of exclusion Dr. Marie-Anne Kohl Editor

When the Moors spread across the country during the eighth century they could never penetrate the Pyrenees, though they left quite a legacy in other parts of Aragón. By the ninth century the Christians had begun to reconsolidate in the Pyrenees; they formed the Kingdom of Aragón

and made Jaca - today the most popular village among mountain sportsters - their earliest capital. The Romanesque churches scattered throughout the Pyrenees stand as a genteel testament to the devotion and determination of these rallying Christians. During the 12th century they had worked their way south into the wide.

Anti-social behaviour encompasses a broad range of behaviours including nuisance behaviour, intimidation and vandalism. Seventeen per cent of the population perceive high levels of anti-social behaviour in their area, with the young and the less well off being disproportionately affected, at a cost to government agencies of responding to reports of anti-social behaviour in England and Wales of around £3.4 billion per year. This report examines the work of the Home Office's Anti-Social Behaviour Unit set up in 2003 and measures introduced by the Home Office since 1997 to tackle anti-social behaviour, focusing on the impact of three of the most commonly used interventions: warning letters, Acceptable Behaviour Contracts and Anti-Social Behaviour Orders. Using a sample of 893 cases, the report found that the majority of people who received one of these interventions did not re-engage in anti-social behaviour, but there were a number of perpetrators for whom interventions had limited impact, with about 20 per cent of the sample having received 55 per cent of the interventions issued.

Recommendations include that the Home Office should undertake formal evaluation of the success of different interventions and the impact of combining these with support services at the local level. International research suggests that preventive programmes, such as education, counselling and training can be a cost effective way of addressing anti-social behaviour.

“A timely and provocative book exploring the origins of the national security state and the urgent challenge of reining it in” (The Washington Post). From Dick Cheney’s man-sized safe to the National Security Agency’s massive intelligence gathering, secrecy has too often captured the American government’s modus operandi better than the ideals of the Constitution. In this important book, Frederick A.O. Schwarz Jr., who was chief counsel to the US Church Committee on Intelligence—which uncovered the FBI’s effort to push Martin Luther King Jr. to commit suicide; the CIA’s enlistment of the Mafia to try to kill Fidel Castro; and the NSA’s thirty-year program to get copies of all telegrams leaving the United States—uses examples ranging from the dropping of the first atomic bomb and the Cuban Missile Crisis to Iran–Contra and 9/11 to illuminate this central question: How much secrecy does good governance require? Schwarz argues that while some control of information is necessary, governments tend to fall prey to a culture of secrecy that is ultimately not just hazardous to democracy but antithetical to it. This history provides the essential context to recent cases from Chelsea Manning to Edward Snowden. Democracy in the Dark is a natural companion to Schwarz’s Unchecked and Unbalanced, cowritten with Aziz Huq, which plumbed the power of the executive branch—a power that often depends on and derives from the use of secrecy. “[An] important new book . . . Carefully researched, engagingly written stories of government secrecy gone amiss.” —The American Prospect
