At thirty-six years old, Kelly Marsh was a successful businesswoman with roles at the Cincinnati Museum Center and, most recently, chief marketing officer at Thomas More College. Her husband, thirty-nine-year-old Brad Marsh, was a successful entrepreneur and businessman. In *Love Stroke*, they tell their story after Kelly suffered a stroke August 30, 2009. This memoir narrates the firsthand, chronological views from both the survivor and the primary caregiver, including their life before, the day everything changed, and the first two years of recovery. Kelly and Brad share personal trial-and-error insights from their journey, and they challenge some conventional medical wisdom about what is possible. They also give advice to friends and family on the best way to support their loved one and each other, and they offer useful lessons and resources. Practical and inspirational, the Marshes' story is intended to assist all traumatic brain injury survivors and caregivers, but particularly younger survivors and caregivers as they shape their own destinies in recovery. This book, written by both a young stroke survivor and her husband/caregiver (the roles are not separate), is filled with some great advice for stroke survivors and their loved ones. Despite having taken a full history of Kelly's stroke, and seeing her in clinic on many occasions, I still did not know many parts of her story, and certainly did not know her inner thoughts and emotions. I was fascinated to hear the details from both perspectives, but especially from Kelly and in her own words. Brett M. Kissela, MD, MS, Albert Barnes Voorheis professor and chair, Department of Neurology and Rehabilitation Medicine, University of Cincinnati

For more than 20 years, *Crafts and Creative Media in Therapy, Fifth Edition* has been an illuminating reference for the use of creative approaches in helping clients achieve their therapeutic goals. Carol Crellin Tubbs has included a range of craft and creative activity categories, from paper crafts, to cooking, to the use of recycled materials, and everything in between. Each chapter includes a brief history of the craft, several projects along with suggestions for grading or adapting, examples of related documentation, and a short case study. The text also features chapters on activity analysis, general strategies for implementation of creative activities, and documentation, as well as a chapter describing the relevance of this media from both historical and current occupation-based perspectives. In this updated Fifth Edition, the craft projects have been updated and numerous resources and links for more ideas have been added. There are new chapters on making therapy tools and crafting with a purpose, and the recycled and found materials chapter has been expanded in keeping with cultural trends. A flow chart has been added to each case study to help students better understand the process and rationale for tailoring activities for individual client needs, and project suggestions for working on specific performance skills or client factors are scattered throughout the chapters. Other additions include a behavioral observation checklist as an aid in evaluation and documentation, and several illustrations to help students distinguish between the use of occupation as means and occupation as end. This Fifth Edition also includes an updated instructors' manual with additional resources and suggestions for lesson planning. *Crafts and Creative Media in Therapy, Fifth Edition* not only provides a wide assortment of craft ideas and instructions, but also provides multiple suggestions for therapeutic uses for activities in each category. It includes ways to grade activities to best achieve therapy objectives, and examples of documentation for reimbursement. For each craft category, there is discussion on precautions for use with certain populations, contextual limitations, and safety considerations. Information is presented in several different formats such as examples, tables, illustrations, and other formats to promote student understanding. Instructors in educational settings can visit www.efacultyounge.com for additional material to be used for teaching in the classroom. *Crafts and Creative Media in Therapy, Fifth Edition* is the foremost resource for using creative approaches in helping clients achieve their therapeutic goals and should be used by all occupational therapists, occupational therapy assistants, and recreational therapists.

This textbook explores recent theoretical models that enable occupational therapists to practice and interact with families in a more holistic and occupation-centered manner. It offers the latest information on viewing the broader contexts of environment and family in order to meet diverse occupational needs in a range of settings. The editor presents a variety of case scenarios that feature culturally diverse populations and varying diagnoses of children with occupational needs. With contributions from 11 leaders in occupational therapy, this comprehensive text is designed to increase awareness and understanding of theoretical models and their relationship to current occupational therapy practice with today's children and families. Traditional frames of reference in pediatric practice are explored, including sensory integration and neurodevelopmental treatment. Some current theoretical models discussed include the Model of Human Occupation, the Person-Environment-Occupation model, the Ecology of Human Performance model, and the Occupational Adaptation model. The new Occupational Therapy Practice Framework is incorporated throughout the text. Overall the textbook employs a practical approach to this significant aspect of pediatric practice in occupational therapy.

This phenomenal new text focuses on assisting students in learning that there can be many possible choices in the clinical decision making process, and that these different choices can lead to many equally successful outcomes. Case Studies Through the Health Care Continuum: A Workbook for the Occupational Therapy Student is an entire book of case studies of adults with physical and psychological deficits. Each case study is followed by questions, organized around performance areas and performance components, treatment planning and discharge planning areas. The questions are designed to encourage clinical thinking about the cases. The cases encompass a variety of diagnoses and take place in a variety of health care arenas. By using case studies, students will begin to, and advance, their thinking process before directly dealing with clients. The cases are comprehensive and well thought out, and the questions provide a good starting point for processing and guiding critical thinking. This exceptional text can be used in almost every course in the curriculum!

Group Dynamics in Occupational Therapy: The Theoretical Basis and Practice Application of Group Treatment, Second Edition examines seven frames of reference for group therapy. This book describes the seven-step method in leading a group, and teaches the reader how the traditional body of knowledge in group dynamics applies to occupational therapy. This edition includes information on co-leadership in today's practice, the pros and cons of its use, and how co-leadership can help therapists plan effectively and gain valuable feedback. Section Two, Group Guidelines From Seven Frames of Reference, has been greatly revised to reflect the latest in group dynamics. Marilyn B. Cole has dedicated an entire chapter to Allen's Cognitive Disabilities Groups because of its extensive development over the past decade. Chapter Five, The Behavioral Cognitive Continuum, represents an attempt to organize the many concepts and techniques occupational therapists use in group treatment, which relate to behavioral and cognitive theory. The chapter describing the Model of Human Occupation Approach has been revised to include new theoretical developments and research. The importance of occupational choices, habit maps and habitat, and roles and role scripts in the context of one's social group and culture are discussed.

The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their innovations with others, creating user-innovation communities and a rich intellectual commons. In Democratizing Innovation, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among "lead users," who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.

One month after her wedding day, thirty-three-year-old Cami Walker was diagnosed with multiple sclerosis, and the life she knew changed forever. Cami was soon in and out of L.A.s emergency rooms with alarming frequency as she battled the neurological condition that left her barely able to walk and put enormous stress on her marriage. Each day brought new negative thoughts: Im going to end up in a wheelchair. Marks probably going to leave me. My life is over. Why did this have to happen to me? Then, as a remedy for her condition, Cami received an uncommon prescription from a friend, an African medicine woman named Mbali Creazzo: Give away 29 gifts in 29 days. By giving, Mbali told her, you are focusing on what you have to offer others, inviting more abundance into your life. The gifts, she said, could be anything, but their giving had to be both authentic and mindful. At least one gift needed to be something she felt was scarce in her life. 29 Gifts is Camis poignant and unforgettable story of embracing the natural process of giving and receiving. Many of her gifts were simple a phone call, spare change, even a Kleenex. Yet the acts of kindness were transformative. By Day 29, not only had her health and happiness turned around, but she had also embarked on creating a worldwide giving movement. Including personal essays from members of the 29 Gifts.org online community whose lives changed for the better after taking the Challenge, 29 Gifts shows just how a simple, daily practice of altruism can dramatically alter your outlook on the world.
