Alex Talbot and Aki Kamoza, husband-and-wife chefs and the forces behind the popular blog Ideas in Food, have made a living out of being inquisitive in the kitchen. Their book shares the knowledge they have gleaned from numerous cooking adventures, from why tapioca flour makes a silkier chocolate pudding than the traditional cornstarch or flour to how to cold smoke just about any ingredient you can think of to impart a new savory dimension to everyday dishes. Perfect for anyone who loves food, **Ideas in Food** is the ideal handbook for

unleashing creativity, intensifying flavors, and pushing one's cooking to new heights. This guide, which includes 100 recipes, explores questions both simple and complex to find the best way to make food as delicious as possible. For home cooks, Aki and Alex look at everyday ingredients and techniques in new ways—from toasting dried pasta to lend a deeper, richer taste to a simple weeknight dinner to making quick “micro stocks” or even using water to intensify the flavor of soups instead of turning to long-simmered stocks. In the book's second part, Aki and Alex explore topics, such as working with liquid nitrogen and carbon dioxide—techniques that are geared towards professional cooks but interesting and instructive for passionate foodies as well. With primers and detailed usage guides for the pantry staples of molecular gastronomy, such as transglutaminase and hydrocolloids (from xanthan gum to gellan), *Ideas in Food* informs readers how these ingredients can transform food in miraculous ways when used properly. Throughout, Aki and Alex show how to apply their findings in unique and appealing recipes such as Potato Chip Pasta, Root Beer-Braised Short Ribs, and Gingerbread Soufflé. With *Ideas in Food*, anyone curious about food will find revelatory information, surprising techniques, and helpful tools for cooking more cleverly and creatively at home.

This isn't a typical egg cookbook or guide to raising chickens, *Epic Eggs* takes a deep dive on the eggs themselves and tells you how to raise birds that will produce the best eggs you've ever seen. It may be true that most poultry found on small homesteads or in backyards especially are viewed as pets, but they are inarguably pets with benefits--namely eggs. In *Epic Eggs*, homesteader and writer Jennifer Sartell looks at the eggs of the most common types of poultry you'd find in your backyard: chickens, ducks, geese, turkeys, guineas, and quail. Don't jump to conclusions! This isn't an egg cookbook or a guide to raising poultry. Jennifer delves into the eggs themselves and explains reproductive systems, egg anatomy, and how and why different colors are distributed to egg shells. Jennifer will show you a variety breeds of birds, and what sizes, shapes, and even colors of egg they produce; from white to blue, brown, chocolate, olive, and speckled, plus heritage breeds and how to breed for specific colors.

Illustrated with fantastic color photography of eggs and their birds, *Epic Eggs* goes on to address how to optimize living conditions and diet for the healthiest and most-flavorful eggs, the process of grading and storing eggs, and the eternal washing debate. There's also discussion of nutrition, baking, cooking, preserving, pickling, and dehydrating. The book ends with advice for homesteaders looking to create business plans and a section on troubleshooting. Get your recommended daily allowance of facts and fun with *Food Anatomy*, the third book in Julia Rothman's best-selling *Anatomy* series. She starts with an illustrated history of food and ends with a global tour of street eats. Along the way, Rothman serves up a hilarious primer on short order egg lingo and a mouthwatering menu of how people around the planet serve fried potatoes — and what we dip them in. Award-winning food journalist Rachel Wharton lends her

editorial expertise to this light-hearted exploration of everything food that bursts with little-known facts and delightful drawings. Everyday diners and seasoned foodies alike are sure to eat it up.

A provocative, handpicked collection of relevant (and surprising) essential recipes for today's cook. We have countless recipes at our disposal today but what are the real keepers, the ones that don't just feed us when we're hungry or impress our friends on Saturday night, but inspire us to get into the kitchen? At the forefront of American cooking for more than 20 years, the editors at America's Test Kitchen have answered this question in an essential collection of recipes that you won't find anywhere else: 100 Recipes Everyone Should Know How to Make. Organized into three recipe sections—Absolute Essentials, Surprising Essentials, and Global Essentials—each recipe is preceded by a thought-provoking essay that positions the dish. For example, Treating Pasta

You'll find useful workday recipes like a killer tomato sauce that's almost as easy as opening a jar of the store-bought stuff; genius techniques for producing amazing flavor—try poaching chicken breasts over a garlic-and-soy- spiked brine (trust us, it's that good); and familiar favorites reinvigorated—the best beef stew comes from Spain (and it's even easier to make than the stateside stew you've been eating for years). Gorgeous photography (shot right in the test kitchen) accompanies every recipe, revealing the finished dish as well as highlights of its preparation. Likely to stir debate among anyone interested in food and cooking, 100 Recipes Everyone Should Know How to Make provides a snapshot of how we cook today and will galvanize even the most jaded cook to get into the kitchen. In this innovative cookbook, James Beard award-winning author Michael Ruhlman explains why the egg is the key to the craft of cooking. For culinary visionary Michael Ruhlman, the question is not whether the chicken or the egg came first, it's how anything could be accomplished in the kitchen without the magic of the common egg. He starts with perfect poached and scrambled eggs and builds up to brioche and Italian meringue. Along the way readers learn to make their own mayonnaise, pasta, custards, quiches, cakes, and other preparations that rely fundamentally on the hidden powers of the egg. A unique framework for

the book is provided in Ruhlman's egg flowchart, which starts with the whole egg at the top and branches out to describe its many uses and preparations -- boiled, pressure-cooked, poached, fried, coddled, separated, worked into batters and doughs, and more. A removable illustrated flowchart is included with this book. Nearly 100 recipes are grouped by technique and range from simple (Egg Salad with Tarragon and Chives) to sophisticated (nougat). Dozens of step-by-step photographs guide the home cook through this remarkable culinary journey.
