This Festschrift volume has been published in honor of Frank de Boer, on the occasion of his 60th birthday. Frank S. de Boer is a prominent member of the research community in formal methods and theoretical computer science. A brief look at his lengthy publication list reveals a broad area of interest and a versatile modus operandi with: logic and constraint programming; deductive proof systems, soundness, and completeness; semantics, compositionality, and full abstraction; process algebra and decidability; multithreading and actor-based concurrency; agent programming, ontologies, and modal logic; real-time systems, timed automata, and schedulability; enterprise architectures, choreography, and coordination; testing and runtime monitoring; and cloud computing and service-level agreements. For a while, he also liked failures, especially in semantics, and optimistically concluded with the failure of failures. In fact, Frank has an opportunistic approach to research. Rather than seeing obstacles, he finds opportunities.

Johann David Heinichen (1683-1729) was a distinguished composer, a contemporary of Johann Sebastian Bach, and Cappellmeister at the court of August I in Dresden. His treatise, *Der General-Bass in der Composition*, is one of the most comprehensive sources for the late

Baroque practice of figured-bass, or thorough-bass, accompaniment. It is a fund of information about many complex problems confronting musicians in the performance and interpretation of Baroque music, including meters, embellishments, dissonance, particular complications for recitative, and use of the figured bass. With a judicious combination of translation, interpretation, and commentary George J. Buelow makes Heinichen's famous treatise accessible for contemporary scholars and performers. Buelow provides translations of key sections of the treatise, explains its historical significance, clarifies Heinichen's obscurities, and relates the treatise to other musical theories and practices of the Baroque, including those of Gasparini, Mattheson, and the Bachs. Buelow, one of the world's premier experts on Baroque music, is a professor of musicology at Indiana University.
