Preparing for the 11+ Pupils approaching the 11+ Examination face many challenges, including lack of time, uncertainty over what is required, and an ever-changing and secretive testing environment. Plain "mathematics" questions are progressively being replaced with more demanding "numerical reasoning" questions. The Eureka! 11+ Challenging Maths and Numerical Reasoning series of books to provide focused preparation for pupils and their busy parents. Questions are expressed in words, with the pupils learning the habit of extracting the relevant numbers and key facts. Most questions are multi-part, reflecting the trend in examinations to challenge pupils skills at progressively higher levels as the question unfolds. These questions are the upper echelon of what is tested at 11+. Although they need only Key Stage 2 concepts, they are challenging because they require good command of multiple skills simultaneously. Pupils, and perhaps even parents, will find very few of these questions to be very easy. Thankfully, the real exam will contain many easier questions, but preparation time is best spent on those which present greater challenges and therefore more learning opportunities. When answering the questions Set yourself a target, e.g. "3 questions in half an hour" Write down clearly your steps of working in full to make checking easier Go through the answers soon after doing the questions Do not be sad if you have made mistakes: learn from them Many questions cover areas where even strong pupils are prone to errors Watch out for the Traps described Incorporate the Tips into your methods in future See if the Method suggested is quicker or less open to error than yours For any examination, diligent practice, carefully analysing errors, mulling over methods, and developing and testing your own preferred approaches pay

11+ Vocabulary Cartoons To improve your memory you must increase the number and variety of your mental associations. When you learn new words, make sure you learn them in a context. It is far easier to remember a picture than an abstract concept. So the trick to remember an abstract word, is to turn it into a picture. And..... It is much easier to picture a sentence rather than picture a word in isolation. When you create the picture, make sure it meets one or more of the following criteria so that it 'sticks'. **OUT OF PROPORTION** - In all your images, try to distort size and shape. You can imagine things much larger than their normal size or conversely, microscopically small. **SUBSTITUTION** - You could visualise footballers kicking a television around a football pitch instead of a football, or pens growing on a tree instead of leaves. Substituting an out of place item in an image increases the probability of recall. **EXAGGERATION** - Try to picture a very large quantity in your images. **MOVEMENT** - Any movement or action is always easy to remember. **HUMOUR** - The funnier, more absurd and zany you can make your images, the more memorable they will be. Applying multiple combination of these five principles when forming your images will help make your mental associations truly outstanding and memorable. At first, you may find that you need to consciously apply one or more of the five principles in order to make your pictures sufficiently ludicrous. After a little practice however, you should find that applying the principles becomes an automatic and natural process. Some **UNIQUE** features of this book; -All the hard work done for you. Over 200 words converted into pictures utilizing the concepts above! -Focus on words likely to appear in the 11 plus Exam -Synonyms/Antonyms and sentences for EACH word - Over 1500 high frequency 11+ words in total!
