

12 Immutable Universal Laws

The key question for the history of universal human rights is why it took so long for them to become established as law. The main theme of this book is that the attainment of universal human rights required heroic struggle, first by individuals and then by ever-increasing numbers of people who supported those views against the major historical trends. Universal human rights are won from a hostile majority by outsiders. The chapters in the book describe the milestones in that struggle. The history presented in this book shows that, in most places at most times, even today, for concrete material reasons a great many people oppose the notion that all individuals have equal rights. The dominant history since the 1600s has been that of a mass struggle for the national-democratic state. This book argues that this struggle for national rights has been practically and logically contradictory with the struggle for universal rights. It would only be otherwise if there were free migration and access to citizenship on demand by anybody. This has never been the case. Rather than drawing only on European sources and being limited to major literary figures, this book is written from the Gramscian perspective that ideas mean little until they are taken up as mass ideologies. It draws on sources from Asia and America and on knowledge about mass attitudes, globally and throughout history.

BASED ON NATURAL laws which govern all of creation, this book shatters the myth that success is the result of hard work, exacting plans, or driving ambition. In *The Seven Spiritual Laws of Success*, Deepak Chopra offers a life-altering perspective on the attainment of success: Once we understand our true nature and learn to live in harmony with natural law, a sense of well-being, good health, fulfilling relationships, energy and enthusiasm for life, and material abundance will spring forth easily and effortlessly. Filled with timeless wisdom and practical steps you can apply right away, this is a book you will want to read and refer to again and again.

Are you ready to manifest anything you want into your life? Looking closely at our everyday life, you will realize that the law of attraction is present all the time. Most people do not notice the connection because of the time lag between their thoughts and the manifestation of their thoughts. However, there are some things that happen to us that we feel happened as a result of a coincidence, not knowing it is the law of attraction that is at work. For instance, have you ever thought of calling a friend, and the friend calls you around that time? Or have you ever thought of picking up your phone, and your phone rings at that instance? These experiences are not coincidences; they are a result of the law of attraction. We get more of what we focus on in life. That is why you need to get more creative with your thoughts. In this book, I am going to show you how you can consciously and deliberately attract good things into your life by aligning your thoughts in the right way. Focusing more on things that make you happy increases your chances of attracting things that make you happy. The other side of this is the negative side which is when you focus on things you are not happy about, you tend to attract things that will make you sad. For instance, if you focus on wealth and good health, you attract wealth and good health. However, if you focus on poverty, you will attract a situation that will rob you of the little things you have gathered. Here's a sneak preview of what you'll learn from this book: ?What the Law of Attraction is ?The Science behind it ?How to attract Love using the LOA ?How to attract Money using the LOA ?How to attract Happiness using the LOA ?How to attract Health using the LOA ?How to be more Positive using the LOA ?How to Integrate the LOA into Your Daily Life ?and much much more! The Ancient Hermetic Secrets to Alchemy and Divine Magic Revealed! You have natural magical abilities that can elevate your life to a whole new level, as well as heal and help your loved ones and clients. The original teacher of this Divine magic was an Egyptian sage named Hermes Trismegistus. His teachings, called "Hermetics," were only taught verbally or in very cryptic writings. In 1908, three Hermetic students recorded them in a book called *The Kybalion*. Yet this work was still difficult to understand because of its archaic and confusing language. Now, in *Divine Magic*, Doreen Virtue presents a clear, edited version of *The Kybalion*, written in understandable and modern language while retaining all of the original teachings. She gives comments and practical suggestions based upon her own success in using Hermetic teachings for healing and manifestation. With *Divine Magic*, you can master your moods, release negativity, manifest new levels of abundance, and attract wonderful opportunities in all areas of your life.

Science has defined a variety of natural laws that explain the physical world and how it changes. One such law states that for every action there is a reaction, and that for every motion there is corresponding counter-motion. Whether it's visible to the human eye or not, one thing is certain – movement and change will occur as a result. Having studied these principles, author Raymond Holliwell not only understood the universal physical applications, he also understood the spiritual and mental applications as well. By using this law on a spiritual and mental level, Holliwell found that a specific thought could create a desired reaction in his personal and professional life through continual and dedicated practice. As he came to realize the expanded potential of this powerful law, he eventually recognized the ultimate source of the dramatic results – God.

Now he turns to the most important subject of all - understanding people's drives and motivations, even when they are unconscious of them themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which our other talents can only take us so far. Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement, and self-defense.

Provides a unified account of the notion of law - both natural and moral - in Kant's abstract and empirical philosophy.

An understanding of psychology—specifically the psychology behind how users behave and interact with digital interfaces—is perhaps the single most valuable nondesign skill a designer can have. The most elegant design can fail if it forces users to conform to the design rather than working within the "blueprint" of how humans perceive and process the world around them. This practical guide explains how you can apply key principles in psychology to build products and experiences that are more intuitive and human-centered. Author Jon Yablonski deconstructs familiar apps and experiences to provide clear examples of how UX designers can build experiences that adapt to how users perceive and process digital interfaces. You'll learn: How aesthetically pleasing design creates positive responses The principles from psychology most useful for designers How these psychology principles relate to UX heuristics Predictive models including Fitts's law, Jakob's law, and Hick's law Ethical implications of using psychology in design A framework for applying these principles

Marshall McLuhan has been described as Canada's most exciting and original thinker, a member of the small company of intellectual geniuses this country has produced. Works such as *The Gutenberg Galaxy*, *The Mechanical Bride*, *From Cliche to Archetype*, and *Understanding Media* have established his reputation throughout the world and have profoundly influenced our understanding of contemporary communication. In his later years McLuhan was working on a 'unified field' theory of human culture, an effort in which he collaborated with and was assisted by his son, Eric McLuhan. This book is the result of that collaboration. The McLuhans are retrieving another way of understanding our world, a way known to some ancient Greeks (but not Aristotle), to medieval thinkers, to Francis Bacon and Giambattista Vico, and to T.S. Eliot and James Joyce in this century. It is based on the use of words and the consequent power of the 'logos' to shape all the elements of culture - media - with which we surround ourselves. The authors explain how the invention of the alphabet led to the dominance of visual-space conceptualizations over those of acoustic space and its creative words (and word-plays). They consider the differences between the left- and right-hand sides of our brains, and use Gestalt theories of figure and ground to explore the underlying principles that define media. 'Media,' the word so closely connected with Marshall McLuhan's thought, is here explored in its broadest meaning, encompassing all that has been created by humans: artefacts, information, ideas - every example of human innovation, from computer program to a tea cup, from musical arrangement to the formula for a cold remedy, from an X-ray machine to the sentence you're reading right now. All these are media to which can be applied the laws the McLuhans have developed. The laws are based on a set of four questions - a tetrad - that can be applied to any artefact or idea: What does it enhance or intensify? What does it render obsolete or displace? What does it retrieve that was previously obsolesced? What does it produce or become when pressed to an extreme? Inherent in every human innovation is an answer to each of the questions of this tetrad; anything that does not contain answers to these four questions is not the product of human creation. The laws identified by the McLuhans constitute a new scientific basis for media studies, testable, and able to allow for prediction. It takes in all human activities and speech; it breaks down barriers and reconsiders them as mere intervals. In the McLuhan tradition, this *New Science* offers a whole new understanding of human creation, and a vision that could reshape our future.

#1 NEW YORK TIMES BESTSELLER When and how did the universe begin? Why are we here? What is the nature of reality? Is the apparent "grand design" of our universe evidence of a benevolent creator who set things in motion—or does science offer another explanation? In this startling and lavishly illustrated book, Stephen Hawking and Leonard Mlodinow present the most recent scientific thinking about these and other abiding mysteries of the universe, in nontechnical language marked by brilliance and simplicity. According to quantum theory, the cosmos does not have just a single existence or history. The authors explain that we ourselves are the product of quantum fluctuations in the early universe, and show how quantum theory predicts the "multiverse"—the idea that ours is just one of many universes that appeared spontaneously out of nothing, each with different laws of nature. They conclude with a riveting assessment of M-theory, an explanation of the laws governing our universe that is currently the only viable candidate for a "theory of everything": the unified theory that Einstein was looking for, which, if confirmed, would represent the ultimate triumph of human reason.

Twelve Universal Laws The Truth That Will Transform Your Life

"This is not just an important but an imperative project: to approach the problem of randomness and success using the state of the art scientific arsenal we have. Barabasi is the person."-Nassim Nicholas Taleb, author of the New York Times bestselling *The Black Swan* and Distinguished Professor of Risk Engineering at NYU An international bestseller In the bestselling tradition of Malcom Gladwell, James Gleick, and Nate Silver, prominent professor LAzLO BarabAsi gives us a trailblazing book that promises to transform the very foundations of how our success-obsessed society approaches their professional careers, life pursuits and long-term goals. Too often, accomplishment does not equal success. We did the work but didn't get the promotion; we played hard but weren't recognized; we had the idea but didn't get the credit. We convince ourselves that talent combined with a strong work ethic is the key to getting ahead, but also realize that combination often fails to yield results, without any deeper understanding as to why. Recognizing this striking disconnect, the author, along with a team of renowned researchers and some of the most advanced data-crunching systems on the planet, dedicated themselves to one goal: uncovering that ever-elusive link between performance and success. Now, based on years of academic research, *The Formula* finally unveils the groundbreaking discoveries of their pioneering study, not only highlighting the scientific and mathematic principles that underpin success, but also revolutionizing our understanding of: -Why performance is necessary but not adequate -Why "Experts" are often wrong -How to assemble a creative team primed for success -How to most effectively engage our networks -And much more.

"A masterly book" —Nassim Nicholas Taleb, author of The Black Swan "A classic" —Simon Kuper, Financial Times An economist explains five laws that confirm our worst fears: stupid people can and do rule the world Throughout history, a powerful force has hindered the growth of human welfare and happiness. It is more powerful than the Mafia or the military. It has global catastrophic effects and can be found anywhere from the world's most powerful boardrooms to your local bar. It is human stupidity. Carlo M. Cipolla, noted professor of economic history at the UC Berkeley, created this vitally important book in order to detect and neutralize its threat. Both hilarious and dead serious, it will leave you better equipped to confront political realities, unreasonable colleagues, or your next dinner with your in-laws. The Laws: 1. Everyone underestimates the number of stupid individuals among us. 2. The probability that a certain person is stupid is independent of any other characteristic of that person. 3. A stupid person is a person who causes losses to another person while deriving no gain and even possibly incurring losses themselves. 4. Non-stupid people always underestimate the damaging power of stupid individuals. 5. A stupid person is the most dangerous type of person.

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of The Laws of Human Nature. In the book that People magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, The 48 Laws of Power is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

This book is mainly based on the seven Hermetic Principles of Reality and Being as described in the Hermetic text "The Kybalion". The seven Laws of Reality can be found as the essential principles of all the Western and Eastern spiritual wisdom traditions and can be employed in order to realize one's real nature of Pure Being and change one's life conditions and circumstances. In final analysis, Truth is always found to be the same whether stated in modern scientific terms or in the language of ancient religion or philosophy, the only difference being in the form of presentation, always bearing in mind that no human formula will ever be able to describe every side of it. Part one describes the seven Hermetic Laws or Principles which govern Reality: the Principle of Mind, the Principle of Cause and Effect, the Principle of Vibration, the Principle of Correspondence, the Principle of Polarity (or Opposites), the Principle of Rhythm (or Cyclicity) and the Principle of Gender. Part two offers many useful methods that can be employed in order to realize one's nature of Pure Being and change one's conditions and circumstances by working with the seven Hermetic Laws of Reality.
