The sixtieth anniversary edition of Frantz Fanon's landmark text, now with a new introduction by Cornel West First published in 1961, and reissued in this sixtieth anniversary edition with a powerful new introduction by Cornel West, Frantz Fanon's *The Wretched of the Earth* is a masterful and timeless interrogation of race, colonialism, psychological trauma, and revolutionary struggle, and a continuing influence on movements from Black Lives Matter to decolonization. A landmark text for revolutionaries and activists, *The Wretched of the Earth* is an eternal touchstone for civil rights, anti-colonialism, psychiatric studies, and Black consciousness movements around the world. Alongside Cornel West's introduction, the book features critical essays by Jean-Paul Sartre and Homi K. Bhabha. This sixtieth anniversary edition of Fanon's most famous text stands proudly alongside such pillars of anti-colonialism and anti-racism as Edward Said's *Orientalism* and *The Autobiography of Malcolm X*. With a New Chapter and Updated Epilogue on Coronavirus A Financial Times Best Health Book of 2019 and a New York Times Book Review Editors' Choice "Honigsbaum does a superb job covering a century's worth of pandemics and the fears they invariably unleash." —Howard Markel, MD, PhD, director of the Center for the History of Medicine,

University of Michigan How can we understand the COVID-19 pandemic? Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing such catastrophic outbreaks of infectious disease. Yet despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. In *The Pandemic Century*, a lively account of scares both infamous and less known, medical historian Mark Honigsbaum combines reportage with the history of science and medical sociology to artfully reconstruct epidemiological mysteries and the ecology of infectious diseases. We meet dedicated disease detectives, obstructive or incompetent public health officials, and brilliant scientists often blinded by their own knowledge of bacteria and viruses—and see how fear of disease often exacerbates racial, religious, and ethnic tensions. Now updated with a new chapter and epilogue.

Now in its fourth edition, this book provides new perspectives on the dynamic interplay of global, national, and local forces as they shape the functions and outcomes of education systems.

Preserved buildings and historic districts, museums and reconstructions have become an important part of the landscape of cities around the world.

Beginning in the 1970s, Tokyo participated in this trend. However, repeated destruction and rapid redevelopment left the city with little building stock of

recognized historical value. Late twentieth-century Tokyo thus presents an illuminating case of the emergence of a new sense of history in the city's physical environment, since it required both a shift in perceptions of value and a search for history in the margins and interstices of a rapidly modernizing cityscape. Scholarship to date has tended to view historicism in the postindustrial context as either a genuine response to loss, or as a cynical commodification of the past. The historical process of Tokyo's historicization suggests other interpretations. Moving from the politics of the public square to the invention of neighborhood community, to oddities found and appropriated in the streets, to the consecration of everyday scenes and artifacts as heritage in museums, Tokyo Vernacular traces the rediscovery of the past—sometimes in unlikely forms—in a city with few traditional landmarks.

Tokyo's rediscovered past was mobilized as part of a new politics of the everyday after the failure of mass politics in the 1960s. Rather than conceiving the city as national center and claiming public space as national citizens, the post-1960s generation came to value the local places and things that embodied the vernacular language of the city, and to seek what could be claimed as common property outside the spaces of corporate capitalism and the state.

For Dante and Petrarch, posthumous love was a powerful conviction. Like many of their contemporaries, both poets envisioned their encounters with their beloved in heaven—Dante with Beatrice, Petrarch with Laura. But as Ramie Targoff reveals in this elegant study, English love poetry of the Renaissance brought a startling reversal of this tradition: human love became definitively mortal. Exploring the boundaries that Renaissance English poets drew between earthly and heavenly existence, Targoff seeks to understand this shift and its consequences for English poetry. Targoff shows that medieval notions of the somewhat flexible boundaries between love in this world and in the next were hardened by Protestant reformers, who envisioned a total break between the two. Tracing the narrative of this rupture, she focuses on central episodes in poetic history in which poets developed rich and compelling compensations for the lack of posthumous love—from Thomas Wyatt's translations of Petrarch's love sonnets and the Elizabethan sonnet series of Shakespeare and Spenser to the *carpe diem* poems of the seventeenth century.

Targoff's centerpiece is *Romeo and Juliet*, where she considers how Shakespeare's reworking of the Italian story stripped away any expectation that the doomed teenagers would reunite in heaven. Casting new light on these familiar works of poetry and drama, this book ultimately demonstrates that the negation of posthumous love brought forth a new mode of poetics that derived its emotional and aesthetic power from its insistence upon love's mortal limits.

The first popular history of the Emancipation of Europe's Jews in the eighteenth and nineteenth centuries—a transformation that was startling to those who lived through it and continues to affect the world today. Freed from their ghettos, Jews ushered in a second renaissance. Within a century Marx, Freud, and Einstein created revolutions in politics, human science, and physics that continue to shape our world. Proust, Schoenberg, Mahler, and Kafka redefined artistic expression. Emancipation reformed the practice of Judaism, encouraged some to imagine a modern nation of their own, and within decades led to the dream of Zionism.

Shin Sang-ok (1926–2006) was arguably the most important Korean filmmaker of the postwar era. Over seven decades, he directed or produced nearly 200 films, including *A Flower in Hell* (1958) and *Pulgasari* (1985), and his career took him from late-colonial Korea to postwar South and North Korea to Hollywood. Notoriously crossing over to the North in 1978, Shin made a series of popular films under Kim Jong-il before seeking asylum in 1986 and resuming his career in South Korea and Hollywood. In *Split Screen Korea*, Steven Chung illuminates the story of postwar Korean film and popular culture through the first in-depth account in English of Shin's remarkable career. Shin's films were shaped by national division and Cold War politics, but *Split Screen Korea* finds surprising aesthetic and political continuities across not only distinct phases in modern South Korean history but also between South and North Korea. These are unveiled most dramatically in analysis of the films Shin made on opposite sides of the DMZ. Chung explains how a filmmaking sensibility rooted in the South Korean market and the global style of Hollywood could have been viable in the North. Combining close readings of a broad range of films with research on the industrial and political conditions of Korean film production, *Split Screen Korea* shows how cinematic styles, popular culture, and intellectual discourse bridged the divisions of postwar Korea, raising new questions about the implications of political partition.

Almost everyone swears, or worries about not swearing, from the two year-old who has just discovered the power of potty mouth to the grandma who wonders why every other word she hears is obscene. Whether they express anger or exhilaration, are meant to insult or to commend, swear words perform a crucial role in language. But swearing is also a uniquely well-suited lens through which to look at history, offering a fascinating record of what people care about on the deepest levels of a culture--what's divine, what's terrifying, and what's taboo. *Holy Sh*t* tells the story of two kinds of swearing--obscenities and oaths--from ancient Rome and the Bible to today. With humor and insight, Melissa Mohr takes readers on a journey to discover how "swearing" has come to include both testifying with your hand on the Bible and calling someone a *#\$&!*" when they cut you off on the highway. She explores obscenities in ancient Rome--which were remarkably similar to our own--and unearths the history of religious oaths in the Middle Ages, when swearing (or not swearing) an oath was often a matter of life and death. *Holy Sh*t* also explains the advancement of civility and corresponding censorship of language in the 18th century, considers the rise of racial slurs after World War II, examines the physiological effects of swearing (increased heart rate and greater pain tolerance), and answers a question that preoccupies the FCC, the US Senate, and anyone who has recently overheard little kids at a playground: are we swearing more now than people did in the past? A gem of lexicography and cultural history, *Holy Sh*t* is a serious exploration of

obscenity--and it also just might expand your repertoire of words to choose from the next time you shut your finger in the car door.

A female Indiana Jones meets Tomb Raider when Samantha Knox receives a mysterious field diary and finds herself thrust into a treacherous plot. After stealing a car and jumping on a train, chased by a group dangerous pursuers, Sam finds out what's so special about this book: it contains a cipher that leads to a cursed jade statue that could put an end to all mankind. Silent reading is now universally accepted as normal; indeed reading aloud to oneself may be interpreted as showing a lack of ability or understanding. Yet reading aloud was usual, indeed unavoidable, throughout antiquity and most of the middle ages. Saenger investigates the origins of the gradual separation of words within a continuous written text and the consequent development of silent reading. He then explores the spread of these practices throughout western Europe, and the eventual domination of silent reading in the late medieval period. A detailed work with substantial notes and appendices for reference. Preserved in the Bavarian State Library in Munich is a manuscript that few scholars have noticed and that no one in modern times has treated with the seriousness it deserves. *Forbidden Rites* consists of an edition of this medieval Latin text with a full commentary, including detailed analysis of the text and its contents, discussion of the historical context, translation of representative sections of the text, and comparison with other necromantic texts of the late Middle Ages. The result is

the most vivid and readable introduction to medieval magic now available. Like many medieval texts for the use of magicians, this handbook is a miscellany rather than a systematic treatise. It is exceptional, however, in the scope and variety of its contents—prayers and conjurations, rituals of sympathetic magic, procedures involving astral magic, a catalogue of spirits, lengthy ceremonies for consecrating a book of magic, and other materials. With more detail on particular experiments than the famous thirteenth-century *Picatrix* and more variety than the *Thesaurus Necromantiae* ascribed to Roger Bacon, the manual is one of the most interesting and important manuscripts of medieval magic that has yet come to light.

While the world's attention has been focused on the spectacular economic success of Japan and Korea, the less developed countries of Asia have often been neglected. *Asian Development* closes the gap. In nontechnical style and with minimal mathematics, it presents an in-depth perspective on the economic development of fourteen countries in East, Southeast, and South Asia. *Asian Development* is mainly a story of success. Though some problems remain, Asian countries have shown remarkable resilience in responding to sharp changes in the international economy--oil shocks, world recession and inflation, exchange-rate and interest-rate fluctuations, and rapid technological change. The authors conclude that their ability to adjust to changing external conditions is closely related to intelligent governmental policies. Looking back they comment: "In the past, growth of the United States

and Japan pulled up the growth rates of the smaller economies in the region." Looking forward, they predict: "In the future, increasingly it will be the growth of the Asian developing countries that acts as a catalyst to growth in the more advanced economies."

"The Hudson's Bay Company Archives is one of the world's most complete archival collections and a national treasure. Protected in the vaults of the Archives of Manitoba, its documents trace the history of the fur trade, North American exploration, the growth of a retail empire, and the evolution of Canada as a country. Keepers of the Record offers the first comprehensive look at the development of the Hudson's Bay Company Archives over three centuries." "Deidre Simmons places the archives within the historical context of the Company, England, and Canada, as well as British and Canadian archival traditions. Keepers of the Record is illustrated with archival photographs that evoke the texture and slightly musty smell of soft leather and crisp vellum and the ghostly presence of the people who created the pristine script, writing by candlelight in unheated (or overheated, depending on the season) dwellings in the wilderness of the Hudson Bay or in the centre of London."--Résumé de l'éditeur.

Hinting at Rimbaud's provocative dictum that "I is an other," this anthology discusses a wide-ranging array of twentieth-century and contemporary minority American modes of life writing, prompted by the following questions: Who (else) hides behind this "I" that the author-narrator-character "contractually" claims to be? What generic, aesthetic, political and socio-cultural issues are at stake in a conception of the self as other? The essays analyze autobiographical works from major Native American writers (John Milton Oskison and Louise Erdrich), an African American music-hall artist (Josephine Baker) and writers (John Edgar Wideman and Ta-Nehisi Coates), Caribbean American writers (Jamaica Kincaid and Edwidge Danticat), and Asian American writers (Ruth Ozeki, Cathy Park Hong, Theresa Hak Kyung Cha, and Loung Ung). They shed light on autobiography as a collaborative writing and reading practice, rather than as a self-oriented genre, probing the "relational" dimension of life writing. Building on the feminist theorization of relationality and the political and aesthetic power of relational bonds, they put forward the necessarily intersubjective dynamics of minority American "self-conceptions" which originate in the writers' experiences of otherness. The articles highlight that the relational ethnic self characteristically inhabits the liminal spaces where modes of life writing overlap and can thrive in dialogical intertextual readings. They foreground the subversive, cathartic, and memorializing potential of minority American modes of "other-writing" whose ontological dimension is manifest in the writers' quest for a sense of repossession and agency, beyond communal boundaries. Contributing to the up-to-date critical discussion on relationality, not as a genre, but rather as a reading and "a storytelling practice," they examine the ways it participates in a global, transcultural approach to ethno-racial issues in the United States.

This landmark book offers a comprehensive analysis of how development approaches have evolved since World War II, examining and also evaluating the succession of theories, doctrines, and practices that have been formulated and applied in the Third World and beyond. Covering all developing regions, the book offers an integrated approach for considering the entwined aspects of development: governance, economics, foreign assistance, civil society, and the military. With reference to carefully chosen case studies, the authors offer distinctive explanations for why development approaches fall short and systematically relate the evolution of development thinking to current challenges, identifying the strengths and weaknesses of key institutions and the clashes of institutional interests that have distorted otherwise sound doctrines and negatively affected development practice. In identifying the dynamics that account for shortcomings in past development attempts, and recommending a better

integration of doctrines across the entire range of inter-connected development fronts, the book points to how development practice may be improved to better advance human dignity.

The topical issues debated in this volume include the patenting of AIDS drugs, the future pensions crisis, Britain's universities, and Pan-Islam. There are studies of Shakespeare, Pope, Montaigne, Robert Graves, and William Faulkner. And there are lectures on the Inquisition, empires in history, and the journey towards spiritual fulfilment.

Spencer's discussion encompasses the music and writings of a wide range of important figures, including James Weldon Johnson, Harry T. Burleigh, Roland Hayes, Marian Anderson, Alain Locke, William Grant Still, R. Nathaniel Dett, and Dorothy Maynor. He argues that the singular accomplishment of the Harlem Renaissance composers and musicians was to achieve a "two-tiered mastery" promoted by Johnson, Locke, the Harmon award, and Crisis and Opportunity magazines.
