Ranging from ancient times to the present, a survey of the evolution of the prison explores its relationship to the history of Western criminal law and offers a look at the social world of prisoners over the centuries

In 18th-century continental Europe, penal law and what passed for justice were barbaric: gallows were a regular feature of the landscape, branding and mutilation were common, and there existed the ghastly spectacle of people being broken on the wheel. To make matters worse, offenders were often tortured or put to death for quite minor crimes and often without any semblance of a proper trial. Like a bombshell, a book entitled *On Crimes and Punishments* exploded onto the scene in 1764 with shattering effect. Its author was a young man from a privileged background, named Cesare Beccaria (1738-1794). A central message of that now classic work was that such punishments belonged to 'a war of nations against their citizens' and should be abolished. It was a *cri de coeur* for thorough reform of the law affecting penal law and punishments, and it swept across the continent of Europe like wildfire, being adopted by one ruler after another. It even crossed the Atlantic to the new United States, into the hands of President Thomas Jefferson. Civilized penal law remains a highly topical issue, and this book examines where it all began, with the influence of Cesare Beccaria.

Magisterial account of criminal law in early modern Russia in a wider European and Eurasian context.

A history of mentalities, emotions, and attitudes rather than of policies and ideas, it analyses responses to the scaffold at all social levels: among the crowds which gathered to watch executions; among 'polite' commentators from Boswell and Byron on to Fry, Thackeray, and Dickens; and among the judges, home secretary, and monarch who decided who should hang and who should be reprieved. Drawing on letters, diaries, ballads, broadsides, and images, as well as on poignant appeals for mercy which historians until now have barely explored, the book surveys changing attitudes to death and suffering, 'sensibility' and 'sympathy', and demonstrates that the long retreat from public hanging owed less to the growth of a humane sensibility than to the development of new methods of punishment and law enforcement, and to polite classes' deepening squeamishness and fear of the scaffold crowd.

Through the means of four powerful and extraordinary narratives from the 19th-century German underworld, this book deftly explores an intriguing array of questions about criminality, punishment, and social exclusion in modern German history. Drawing on legal documents and police files, historian Richard Evans dramatizes the case histories of four alleged felons to shed light on German penal policy of the time. 25 illustrations.

A study of a wide range of crimes and ways the elites of late colonial Mexico City tried to control and punish lawbreakers.

Those convicted of homicide were hanged on the public gallows before being dissected under the Murder Act in Georgian England. Yet, from 1752, whether criminals actually died on the hanging tree or in the dissection room remained a medical mystery in early modern society. *Dissecting the Criminal Corpse* takes issue with the historical cliché of corpses dangling from the hangman's rope in crime studies. Some convicted murderers did survive execution in early modern England. Establishing medical death in the heart-lungs-brain was a physical enigma. Criminals had large bull-necks, strong willpowers, and hearty survival instincts. Extreme hypothermia often disguised coma in a prisoner hanged in the winter cold. The youngest and fittest were capable of reviving on the dissection table. Many died under the lancet. Capital

legislation disguised a complex medical choreography that surgeons staged. They broke the Hippocratic Oath by executing the Dangerous Dead across England from 1752 until 1832. This book is open access under a CC-BY license.

This vividly detailed revisionist history exposes the underworld of the largest metropolis of the early modern Mediterranean and through it the entire fabric of a complex, multicultural society. Fariba Zarinebaf maps the history of crime and punishment in Istanbul over more than one hundred years, considering transgressions such as riots, prostitution, theft, and murder and at the same time tracing how the state controlled and punished its unruly population. Taking us through the city's streets, workshops, and houses, she gives voice to ordinary people—the man accused of stealing, the woman accused of prostitution, and the vagabond expelled from the city. She finds that Istanbul in this period remains mischaracterized—in part by the sensational and exotic accounts of European travelers who portrayed it as the embodiment of Ottoman decline, rife with decadence, sin, and disease. Linking the history of crime and punishment to the dramatic political, economic, and social transformations that occurred in the eighteenth century, Zarinebaf finds in fact that Istanbul had much more in common with other emerging modern cities in Europe, and even in America.

Examines the history of crime, punishment, and reform in Europe from the 18th century onward.

How was law made in England in the eighteenth and early nineteenth centuries? Through detailed studies of what the courts actually did, Peter King argues that parliament and the Westminster courts played a less important role in the process of law making than is usually assumed. Justice was often remade from the margins by magistrates, judges and others at the local level. His book also focuses on four specific themes - gender, youth, violent crime and the attack on customary rights. In doing so it highlights a variety of important changes - the relatively lenient treatment meted out to women by the late eighteenth century, the early development of the juvenile reformatory in England before 1825, i.e. before similar changes on the continent or in America, and the growing intolerance of the courts towards everyday violence. This study is invaluable reading to anyone interested in British political and legal history.

First published in 1913, this fascinating volume presents a detailed history and analysis of punishment throughout history, exploring in detailed historical enforcement and the various methods used to punish people. "Punishments of Former Days" is highly recommended for those with an interest in the history and development of punishment, and it is not to be missed by the discerning collector. Contents include: "Crime and Punishment in the 18th Century", "Prisons in the 17th, 18th, and 19th centuries", "Children and Punishment", "Outlawry", "The Ordeal", "Benefit of Clergy", "Sanctuary", "A Yorkshire Sanctuary", "Deodands", "The Gallows and the Gibbet", "Hanging at Tyburn", "The Pillory", "The Stocks", "The Ducking Stool", "Whipping", "Mutilation", "Burning to Death", etc. Many vintage books such as this are becoming increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially commissioned new introduction.

"ACLS Humanities E-Book presents this volume as part of its Print-on-Demand (POD) program. This program offers a wide range of titles, across the humanities, that remain essential to research, writing and teaching. These titles are among the works chosen for digitization on our site in cooperation with ACLS's constituent learned societies for their continued importance to the scholarly community. Part of the original plan for ACLS Humanities E-Book was to investigate the varieties of publishing formats that could be derived from single sources for both its retrospective collection and its new XML titles. Deriving multiple formats is essential for both publishers and scholars in today's rapidly evolving scholarly communications environment, and creating a production model that takes into account the

multiplicity of access possibilities and audiences is an essential task of HEB."--Back cover. McLynn provides the first comprehensive view of crime and its consequences in the eighteenth century: why was England notorious for violence? Why did the death penalty prove no deterrent? Was it a crude means of redistributing wealth?

In this brilliant work, the most influential philosopher since Sartre suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

This open access book is the culmination of many years of research on what happened to the bodies of executed criminals in the past. Focusing on the eighteenth and nineteenth centuries, it looks at the consequences of the 1752 Murder Act. These criminal bodies had a crucial role in the history of medicine, and the history of crime, and great symbolic resonance in literature and popular culture. Starting with a consideration of the criminal corpse in the medieval and early modern periods, chapters go on to review the histories of criminal justice, of medical history and of gibbeting under the Murder Act, and ends with some discussion of the afterlives of the corpse, in literature, folklore and in contemporary medical ethics. Using sophisticated insights from cultural history, archaeology, literature, philosophy and ethics as well as medical and crime history, this book is a uniquely interdisciplinary take on a fascinating historical phenomenon.

Capital punishment for murder was abolished in Britain in 1965. At this time, the way people in Britain perceived and understood the death penalty had changed – it was an issue that had become increasingly controversial, high-profile and fraught with emotion. In order to understand why this was, it is necessary to examine how ordinary people learned about and experienced capital punishment. Drawing on primary research, this book explores the cultural life of the death penalty in Britain in the twentieth century, including an exploration of the role of the popular press and a discussion of portrayals of the death penalty in plays, novels and films. Popular protest against capital punishment and public responses to and understandings of capital cases are also discussed, particularly in relation to conceptualisations of justice. Miscarriages of justice were significant to capital punishment's increasingly fraught nature in the mid twentieth-century and the book analyses the unsettling power of two such high profile miscarriages of justice. The final chapters consider the continuing relevance of capital punishment in Britain after abolition, including its symbolism and how people negotiate memories of the death penalty. *Capital Punishment in Twentieth-Century Britain* is groundbreaking in its attention to the death penalty and the effect it had on everyday life and it is the only text on this era to place public and popular discourses about, and reactions to, capital punishment at the centre of the analysis. Interdisciplinary in focus and methodology, it will appeal to historians, criminologists, sociologists and socio-legal scholars.

This study examines the considerable changes that took place in the criminal justice system in the City of London in the century after the Restoration, well before the inauguration of the so-called 'age of reform'. The policing institutions of the City were transformed in response to the problems created by the rapid expansion of the metropolis during the early modern period, and as a consequence of the emergence of a polite urban culture. At the same time, the City authorities were instrumental in the

establishment of new forms of punishment - particularly transportation to the American colonies and confinement at hard labour - that for the first time made secondary sanctions available to the English courts for convicted felons and diminished the reliance on the terror created by capital punishment. The book investigates why in the century after 1660 the elements of an alternative means of dealing with crime in urban society were emerging in policing, in the practices and procedures of prosecution, and in the establishment of new forms of punishment.

During the eighteenth century English defendants, victims, witnesses, judges, and jurors spoke a language of the mind. With their reputations or lives at stake, men and women presented their complex emotions and passions as grounds for acquittal or mitigation of punishment. Inside the courtroom the language of excuse reshaped crimes and punishments, signalling a shift in the age-old negotiation of mitigation. Outside the courtroom the language of the mind reflected society's preoccupation with questions of sensibility, responsibility, and the self.

Based upon an extensive gathering and analysis of previously untapped resources, it takes the reader on a journey from the courtrooms of Scotland to the theatre of the gallows. It introduces them to several of the malefactors who faced the hangman's noose and explores the traditional hallmarks of the spectacle of the scaffold. It demonstrates that the period between 1740 and 1834 was one of discussion, debate and fundamental change in the use of the death sentence and how it was staged in practice. In addition, the study provides an innovative investigation of the post-mortem punishment of the criminal corpse. It offers the reader an insight into the scene at the foot of the gibbets from which criminal bodies were displayed and around the dissection tables of Scotland's main universities where criminal bodies were used as cadavers for anatomical demonstration. In doing so it reveals an intermediate stage in the long-term disappearance of public bodily punishment.

Crime narratives, he argues, vividly embody the struggles of individuals to define their place in the suddenly unfamiliar world of modernity.

The language of crime and punishment is everywhere, especially in the context of building new global orders where old imperial relationships between the west and the rest of the world are being redefined and redesigned. This book is about one of the formative moments of this rhetorical strategy of representing empires. By looking at a variety of British narratives about India being produced from the later half of the eighteenth century onwards, it suggests that the discourse of crime was one of the major representative tools which the British employed to understand, imagine, and rule the vast country. However, to understand the full implication of this strategy for British understanding of both the colonised 'others' and a particular image of 'self', we must study the formation of this discourse not only in the context of the colony, but of its peculiar importance within 'domestic' Britain itself. Nineteenth-Century British society placed a huge amount of importance on issues of crime, punishment, order, and policing. These issues became fundamental to British claims of being a civilised nation. Naturally, they

became an important part of British colonial/imperial strategy. But, since in Britain these issues were sites of contest and not consent, of debate and opposition and not unquestioned hegemonic power, they were inherently risky tools to use in building an ideology of empire. As the various readings of the narratives employing 'fictions' of crime offered here shows, an opposition or critique of empire was formed through these fictions even as they were used to build a consensus for empire-building. The slippages and ambiguities associated with imperial narratives then, are not products of some inherent semiotic disorder. Rather, they grew out of a particular history within which the rhetoric employed by these narratives took shape. This book is an attempt to recover the traces of that history within the various imperial fictions of crime.

Barry Redfern, retired Chief Superintendent, Northumbria Police, turns his detective's eye to 18th century Northumberland, and uncovers astonishing real life stories of murder, robbery, high treason and counterfeiting and investigates the hangings, brandings, whippings and other punishments meted out to criminals.

Why was the era of Augustan elegance also that of Hogarthian squalor? How far was the Industrial Revolution responsible for the rise of street gangs and highwaymen? Was it a coincidence that the autocratic monarchies of Europe suffered less from violent crime? Were such heroes as Dick Turpin motivated by Robin Hood impulses? Why were public executions regarded as entertainment and not deterrents? The author attempts to answer all these questions in this study of a society he characterizes as riddled with insecurities and governed by envies and fears. The book is aimed at students - graduate and undergraduate - of 18th European and British history, and those interested in crime, the law, criminality, and punishment.

The little-examined genre of legal case narratives is represented in this fascinating volume, the first collection translated into English of criminal cases - most involving homicide - from late imperial China. These true stories of crimes of passion, family conflict, neighborhood feuds, gang violence, and sedition are a treasure trove of information about social relations and legal procedure. Each narrative describes circumstances leading up to a crime and its discovery, the appearance of the crime scene and the body, the apparent cause of death, speculation about motives and premeditation, and whether self-defense was involved. Detailed testimony is included from the accused and from witnesses, family members, and neighbors, as well as summaries and opinions from local magistrates, their coroners, and other officials higher up the chain of judicial review. Officials explain which law in the Qing dynasty legal code was violated, which corresponding punishment was appropriate, and whether the sentence was eligible for reduction. These records began as reports from magistrates on homicide cases within their jurisdiction that were required by law to be tried first at the county level, then reviewed by judicial officials at the prefectural, provincial, and national levels, with each administrator adding his own observations to the

file. Each case was decided finally in Beijing, in the name of the emperor if not by the monarch himself, before sentences could be carried out and the records permanently filed. All of the cases translated here are from the Qing imperial copies, most of which are now housed in the First Historical Archives, Beijing. Designed to complement "Crime and Punishment: An Introductory History" UCL Press, 1996, this sourcebook contains documents specifically selected to illuminate major issues raised in the textbook. In the first part of the book, extracts of laws and royal, local and church records from Anglo- Saxon England to the 18th century reveal changing patterns of crime and punishment. The first sociology of English crime Harman's Caveat, 1566 as well as Henry Fielding's reform proposals of the mid-eighteenth century are included and the growing use of imprisonment is reflected in the later sections.; The second part covers the 19th century. Documents range from commentaries on the day-to-day crimes of theft, drunkenness And Assault To The Sensationalism Of Garroting And Murder. Documents charting the impressive growth of the police force are included. Criminal justice is approached through the minutiae of police charge books and newspaper column's, the personal reminiscences of magistrates, the sweeping arguments of law reformers and the pleading voices of Petitioners For Mercy. In A Chapter On Punishment, The Emotions Unleashed by public hanging and transportation can be compared with the relentless monotony of prison life. Throughout the western world public opinion has played an important role in shaping criminal justice policy. At the same time opinion polls repeatedly demonstrate that the public knows little about crime and justice, and holds negative views of the criminal justice system. This book, consisting of chapters from leading authorities in the field, is concerned to address this problem, and draws upon research in a number of different countries to address the issues arising from this state of affairs. Its main aims are: to explore the changing and evolving nature of public attitudes to sentencing to examine the factors that influence public opinion and to bring together recent international research which has demonstrated ways in which public attitudes can be changed to propose specific strategies to respond to the crisis in public confidence in criminal justice. Acknowledged as one of the best introductions to the history of crime in the eighteenth and nineteenth centuries, Crime and Society in England 1750-1900 examines the developments in policing, the courts, and the penal system as England became increasingly industrialised and urbanised. The book challenges the old but still influential idea that crime can be attributed to the behaviour of a criminal class and that changes in the criminal justice system were principally the work of far-sighted, humanitarian reformers. In this fourth edition of his now classic account, Professor Emsley draws on new research that has shifted the focus from class to gender, from property crime to violent crime and towards media constructions of offenders, while still maintaining a balance with influential early work in the area. Wide-ranging and accessible, the new edition examines: the value of criminal statistics the effect that contemporary ideas about class and gender had on perceptions of criminality changes in the patterns of crime developments in policing and the spread of summary

punishment the increasing formality of the courts the growth of the prison as the principal form of punishment and debates about the decline in corporal and capital punishments Thoroughly updated throughout, the fourth edition also includes, for the first time, illuminating contemporary illustrations.

Beginning with an atmospheric account of Tyburn, we are set up for a grisly excursion through London as a city of ne'er do wells, taking in beheadings and brutality at the Tower, Elizabethan street crime, cutpurses and con-men, through to the Gordon Riots and Highway robbery of the 18th century and the rise of prisons, the police and the Victorian era of incarceration. As well as the crimes, Arnold also looks at the grotesque punishments meted out to those who transgressed the law throughout London's history - from the hangings, drawings and quarterings at Tyburn over 500 years to being boiled in oil at Smithfield. This popular historian also investigates the influence of London's criminal classes on the literature of the 19th and 20th centuries, and ends up with our old favourites, the Krays and Soho gangs of the 50s and 60s. London's crimes have changed over the centuries, both in method and execution. Underworld London traces these developments, from the highway robberies of the eighteenth century, made possible by the constant traffic of wealthy merchants in and out of the city, to the beatings, slashings and poisonings of the Victorian era.

In a book of compelling power and vision, Newman brings the heated debate over the control of crime back to where it belongs: the nature of punishment. And he argues that the crucial question we must ask is what kind of punishment, rather than how much of it, fits the crime. Although talking of corporal punishment without conjuring visions of torture is not easy; Newman makes his case persuasively.

In the first half of the 18th century there was an explosion in the volume and variety of crime literature published in London. This was a 'golden age of writing about crime', when the older genres of criminal biographies, social policy pamphlets and 'last-dying speeches' were joined by a raft of new publications, including newspapers, periodicals, graphic prints, the Old Bailey Proceedings and the Ordinary's Account of malefactors executed at Tyburn. By the early 18th century propertied Londoners read a wider array of printed texts and images about criminal offenders – highwaymen, housebreakers, murderers, pickpockets and the like – than ever before or since. *Print Culture, Crime and Justice in 18th-Century London* provides the first detailed study of crime reporting across this range of publications to explore the influence of print upon contemporary perceptions of crime and upon the making of the law and its administration in the metropolis. This historical perspective helps us to rethink the relationship between media, the public sphere and criminal justice policy in the present.

This book analyses the different types of post-execution punishments and other aggravated execution practices, the reasons why they were advocated, and the decision, enshrined in the Murder Act of 1752, to make two post-execution punishments, dissection and gibbeting, an integral part of sentences for murder. It traces the origins of the Act, and then explores the ways in which Act was actually put into practice. After identifying the dominance of penal dissection throughout the period, it looks at the abandonment of burning at the stake in the 1790s, the rapid decline of hanging in chains just after 1800, and the final abandonment of both dissection and gibbeting in 1832 and 1834. It concludes that the Act, by creating differentiation in levels of penalty, played an important role within the

broader capital punishment system well into the nineteenth century. While eighteenth- and early nineteenth-century historians have extensively studied the 'Bloody Code' and the resulting interactions around the 'Hanging Tree', they have largely ignored an important dimension of the capital punishment system – the courts extensive use of aggravated and post-execution punishments. With this book, Peter King aims to rectify this neglected historical phenomenon.

Most people know that England shipped thousands of convicts to Australia, but few are aware that colonial America was the original destination for Britain's unwanted criminals. In the 18th century, thousands of British convicts were separated from their families, chained together in the hold of a ship, and carried off to America, sometimes for the theft of a mere handkerchief. What happened to these convicts once they arrived in America? Did they prosper in an environment of unlimited opportunity, or were they ostracized by the other colonists? Anthony Vaver tells the stories of the petty thieves and professional criminals who were punished by being sent across the ocean to work on plantations. In bringing to life this forgotten chapter in American history, he challenges the way we think about immigration to early America. The book also includes a helpful appendix with tips on researching individual convicts transported to America.
