About the author: A retired engineer, where he worked in the military defense industry, involved in all sorts of technical development. Now hands-on with his Cadillacs and cruise controls. He has several vintage Cadillacs and he repairs everything in them. He spent hundreds to thousands of hours cumulatively, every day in the pursuit of the understanding of and the restoration of vintage Cadillacs. He tore apart every element in the cruise control systems of Cadillacs from the mid sixties cars to the late seventies cars. He learned what systems in the car had to be fixed and how to do so in order to get an acceptable cruise control experience. Here he captures this knowledge in order to help you out. That's a lot of bench time and lots and lots of road tests!
