It was the most brutal corporate restructuring in Wall Street history. The 2015 bankruptcy brawl for the storied casino giant, Caesars Entertainment, pitted brilliant and ruthless private equity legends against the world's most relentless hedge fund wizards. In the tradition of Barbarians at the Gate and The Big Short comes the riveting, multi-dimensional poker game between private equity firms and distressed debt hedge funds that played out from the Vegas Strip to Manhattan boardrooms to Chicago courthouses and even, for a moment, the halls of the United States Congress. On one side: Apollo Global Management and TPG Capital. On the other: the likes of Elliott Management, Oaktree Capital, and Appaloosa Management. The Caesars bankruptcy put a twist on the old-fashioned casino heist. Through a \$27 billion leveraged buyout and a dizzying string of financial engineering transactions, Apollo and TPG—in the midst of the post-Great Recession slump—had seemingly snatched every prime asset of the company from creditors, with the notable exception of Caesars Palace. But Caesars' hedge fund lenders and bondholders had scooped up the company's paper for nickels and dimes. And with their own armies of lawyers and bankers, they were ready to do everything necessary to take back what they believed was theirs—if they could just stop their own infighting. These modern financiers now dominate the scene in Corporate America as their fight-to-the-death mentality continues to shock workers, politicians, and broader society—and even each other. In The Caesars Palace Coup, financial journalists Max Frumes and Sujee Indap illuminate the brutal tactics of distressed debt mavens—vultures, as they are condemned—in the sale and purchase of even the biggest companies in the world with billions of dollars hanging in the balance.

Award-winning speaker and business consultant Joey Coleman teaches audiences and companies all over the world how to turn a one-time purchaser into a lifelong customer. Coleman's theory of building customer loyalty isn't about focusing on marketing or closing the sale: It's about the First 100 Days® after the sale and the interactions the customer experiences. While new customers experience joy, euphoria, and excitement, these feelings quickly shift to fear, doubt, and uncertainty as buyer's remorse sets in. Across all industries, somewhere between 20%-70% of newly acquired customers will stop doing business with a company with the first 100 days of being a new customer because they feel neglected in the early stages of customer onboarding. In Never Lose a Customer Again, Coleman offers a philosophy and methodology for dramatically increasing customer retention and as a result, the bottom line. He identifies eight distinct emotional phases customers go through in the 100 days following a purchase. From an impulse buy at Starbucks to the thoughtful purchase of a first house, all customers have the potential to experience the eight phases of the customer journey. If you can understand and anticipate the customers' emotions, you can apply a myriad of tools and techniques -- in-person, email, phone, mail, video, and presents -- to cement a long and valuable relationship. Coleman's system is presented through research and case studies showing how best-in-class companies create remarkable customer experiences at each step in the customer lifecycle. In the "Acclimate" stage, customers need you to hold their hand and over-explain how to use your product or service. They're often too embarrassed to admit they're confused. Take a cue from Canadian software company PolicyMedical and their challenge of getting non-technical users to undergo a complex installation and implementation process. They turned a series of project spreadsheets and installation manuals into a beautiful puzzle customers could assemble after completing each milestone. In the "Adopt" stage, customers should be welcomed to the highest tier of tribal membership with both public and private recognitions. For instance, Sephora's VIB Rogue member welcome gift provides a metallic membership card (private recognition) and a members-only shade of lipstick (for public display). In the final stage,

"Advocate," loyal customers and raving fans are primed to provide powerful referrals. That's how elite entrepreneurial event MastermindTalks continues to sell-out their conference year after year - with zero dollars spent on marketing. By surprising their loyal fans with amazing referral bonuses (an all-expenses paid safari?!) they guarantee their community will keep providing perfect referrals. Drawing on nearly two decades of consulting and keynoting, Coleman provides strategies and systems to increase customer loyalty. Applicable to companies in any industry and of any size (whether measured in employee count, revenue, or total number of customers), implementing his methods regularly leads to an increase in profits of 25-100%. Working with well-known clients like Hyatt Hotels, Zappos, and NASA, as well as mom-and-pop shops and solo entrepreneurs around the world, Coleman's customer retention system has produced incredible results in dozens of industries. His approach to creating remarkable customer experiences requires minimal financial investment and will be fun for owners, employees, and teams to implement. This book is required reading for business owners, CEOs, and managers - as well as sales and marketing teams, account managers, and customer service representatives looking for easy to implement action steps that result in lasting change, increased profits, and lifelong customer retention.

Shadow is everything in us we can't see--everything we are not conscious of. Our Shadow self monitors hundreds of thousands of inputs from the world and our body/mind systems, processes the information, and constantly sends constructive and destructive messages into our conscious awareness in the forms of sensations, feelings, impulses, stories, and thoughts. This Shadow material is generated in less than a tenth of a second, and our conscious selves become more or less aware of it after one or two seconds, leaving our conscious awareness always one step behind the non-conscious flood of Shadow material. Personal development is largely growth of our Shadow selves--our adaptive unconscious in which resides our deepest senses of self, morality, intimacy, vulnerability, and spirituality. Shadow Light offers a wealth of research, ideas, and practices to help us grow our Shadow selves and accelerate personal evolution.

Now your students can become intelligent consumers of scientific research, without being overwhelmed by the statistics! Jaccard and Becker's text teaches students the basic skills for analyzing data and helps them become intelligent consumers of scientific information. Praised for its real-life applications, the text tells students when to use a particular statistic, why they should use it, and how the statistic should be computed and interpreted. Because many students, given a set of data, cannot determine where to begin in answering relevant research questions, the authors explicate the issues involved in selecting a statistical test. Each statistical technique is introduced by giving instances where the test is most typically applied followed by an interesting research example (each example is taken from psychology literature).
