The automobile sector is one of the most archetypal global industries and is seen by many as one of the main drivers behind the homogenisation of world markets due to firms' internationalization strategies and the social practices that firms impose. This book argues that this is not entirely the case due to the heterogeneity of firms and the diversity of strategies pursued. It highlights the diversity and forms of internationalization and the preference for regionalization rather than globalization that has occurred over the past decade. This book looks specifically at the American and Asian car industry.

For introductory courses on digital design in an Electrical Engineering, Computer Engineering, or Computer Science department. A clear and accessible approach to teaching the basic tools, concepts, and applications of digital design. A modern update to a classic, authoritative text, Digital Design, 6th Edition teaches the fundamental concepts of digital design in a clear, accessible manner. The text presents the basic tools for the design of digital circuits and provides procedures suitable for a variety of digital applications. Like the previous editions, this edition of Digital Design supports a multimodal approach to learning, with a focus on digital design, regardless of language. Recognising that three public-domain languages-Verilog, VHDL, and SystemVerilog-all play a role in design flows for today's digital devices, the 6th Edition offers parallel tracks of presentation of multiple languages, but allows concentration on a single, chosen language.

Packed with professional techniques and tips, The Dressmaker's Handbook of Couture Sewing Techniques takes the mystery out of the sewing and finishing techniques that many dressmakers assume are either extremely difficult or are only for professional fashion designers. Fashion designer and expert sewist Lynda Maynard tackles each professional technique with clear instructions in simple step-by-step stages. Once these skills are understood, sewists will embrace their dressmaking projects with more confidence and the ability to create chic, refined looks. The Dressmaker's Handbook of Couture Sewing Techniques unlocks the door to stunning results with better shaping, simpler construction methods, and professional finishing touches. Lynda also explains several seemingly difficult "secrets," from making bindings and finishing for hems, armholes, and necklines to underpinnings and structuring techniques. Plus, she teaches how to master finishing touches from textured stitches to couching and applique. A complete guide to the fabrics suited to each technique and inspirational fashion photography are also included.

This volume teaches calculus in the biology context without compromising the level of regular calculus. The material is organized in the standard way and explains how the different concepts are logically related. Each new concept is typically introduced with a biological example; the concept is then developed without the biological context and then the concept is tied into additional biological examples. This allows readers to first see why a certain concept is important, then lets them focus on how to use the concepts without getting distracted by applications, and then, once readers feel more comfortable with the concepts, it revisits the biological applications to make sure that they can apply the concepts. The book features exceptionally detailed, step-by-step, worked-out examples and a variety of problems, including an unusually large number of word problems. The volume begins with a preview and review and moves into discrete time models, sequences, and difference equations, limits and continuity, differentiation, applications of differentiation, integration techniques and computational methods, differential equations, linear algebra and analytic geometry, multivariable calculus, systems of differential equations and

probability and statistics. For faculty and postdocs in biology departments.

The second book of Shaftal. The country has a ruler again, Karis, a woman who can heal the war-torn land and expel the invaders. But she lives in obscurity with her fractious found family. With war and disease spreading, Karis must act. And when Karis acts, the very stones of the earth sit up and take notice.

A medical thriller that asks: What if we had the cure for a catastrophic illness—but it lay hidden inside the blood and bones of just one man? A mysterious new contagion is decimating the population. It starts in the lungs, like the flu, then moves to the bones, where it weakens and breaks them, eventually killing the host. The disease's origin, methods of propagation, and means of contraction are all unknown. There is no vaccine, and none is expected, as the virus is protean and elusive. If it remains unchecked and mutates into a more virulent form, it will become an extinction level event. Jason Kramer has the disease, known by its nickname "Trips Lite"—the CDC doctor who discovered it was a fan of *The Stand*—but his body produces a unique antibody that kills the viruses inside him. This component in Jason's blood can be harvested and given to anyone who needs it. His blood can heal. But pharmaceutical magnate Phillip Porter needs to keep people believing that only his expensive drug cocktail will slow Trips Lite down, and so if there's any chance someone with the disease will live, Phillip Porter must make sure that Jason Kramer does not . . . "If Stephen King and Michael Crichton had written *Double Indemnity*, it would have been *The Cure*." —D.J. Butler

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.
