The International Union of Speleology (Union Internationale de Spéléologie, UIS) is a non-profit, non-governmental organization founded in 1965 in Slovenia (part of former Yugoslavia) on the initiative of the 4th International Congress of Speleology. Since 1953, these congresses are held every four years to promote interaction between academic and technical speleologists of different nationalities and with the purpose of developing and coordinating international speleology in all of its scientific, technical, cultural and economic aspects. The Union consists of member nations with voting rights, and each is represented by a delegate who represents all cavers and speleologists in its country. Until this book, the history of the International Union of Speleology was spread out in the minutes of the meetings and general assemblies, various UIS publications, and the proceedings of its International Congresses. Moreover, much of it was never

written and was available only from the memories of past presidents, secretaries and other members of the UIS. In this book, the author presents the purpose of the Union and summarizes all its events through the first 50 years of its existence. _____ Mednarodna

Mednarodnega speleološkega kongresa. Kongresi so organizirajo na vsake štiri leta že od leta 1949, z namenom spodbujanja sodelovanja med akademskimi in tehničnimi jamarji različnih narodnosti ter z namenom razvijanja in usklajevanju mednarodnega jamarstva iz znanstvenih, tehničnih, kulturnih in ekonomskih vidikov. Zvezo sestavljajo člani z volilno pravico, vsako državo pa zastopajo delegati, ki predstavljajo vse jamarje in speleologe v državi. Do te knjige je bila zgodovina Mednarodne speleološke zveze zapisana samo v zapisnikih sestankov, generalnih skupščin in različnih publikacijah ter zbornikih njenih mednarodnih kongresov. Veliko pa sploh ne, bilo je samo v spominih preteklih predsednikov, tajnikov in drugih upravnih članov UIS-a. V tej knjigi avtor povzema vse dogodke in namen zveze skozi 50 let njenega obstoja.

Since 1991, the popular and highly modifiable Ford 4.6-liter has become a modern-day V-8 phenomenon, powering everything from Ford Mustangs to hand-built hot rods and the 5.4-liter has powered trucks, SUVs, the Shelby GT500, and more. The wildly popular 4.6-liter has created an industry unto itself with a huge supply of aftermarket high-performance parts, machine services, and accessories. Its design delivers exceptional potential, flexibility, and reliability. The 4.6-liter can be built to produce 300 hp up to 2,000 hp, and in turn, it has become a favorite among rebuilders, racers, and high-performance enthusiasts. **4.6-/5.4-Liter Ford Engines: How to Rebuild** expertly guides you through each step of rebuilding a 4.6-liter as well as a 5.4-liter engine, providing essential information and insightful detail. This volume delivers the complete nuts-and-bolts rebuild story, so the enthusiast can professionally rebuild an engine at home and achieve the desired performance goals. In addition, it contains a retrospective of the engine family, essential identification information, and component differences between engines made at Romeo and Windsor factories for identifying your engine and selecting the right parts. It also covers how to properly plan a 4.6-/5.4-liter build-up and choose the best equipment for your engine's particular application. As with all Workbench Series books, this book is packed

with detailed photos and comprehensive captions, where you are guided step by step through the disassembly, machine work, assembly, start-up, break-in, and tuning procedures for all iterations of the 4.6-/5.4-liter engines, including 2-valve and 3-valve SOHC and the 4-valve DOHC versions. It also includes an easy-to-reference spec chart and suppliers guide so you find the right equipment for your particular build up.

Imagine an everyday world in which the price of gasoline (and oil) continues to go up, and up, and up. Think about the immediate impact that would have on our lives. Of course, everybody already knows how about gasoline has affected our driving habits. People can't wait to junk their gas-guzzling SUVs for a new Prius. But there are more, not-so-obvious changes on the horizon that Chris Steiner tracks brilliantly in this provocative work.

Consider the following societal changes: people who own homes in far-off suburbs will soon realize that there's no longer any market for their houses (reason: nobody wants to live too far away because it's too expensive to commute to work). Telecommuting will begin to expand rapidly. Trains will become the mode of national transportation (as it used to be) as the price of flying becomes prohibitive. Families will begin to migrate southward as the price of heating northern homes in the winter is too pricey. Cheap everyday items that are comprised of plastic will go away because of the rising price to produce them (plastic is derived from oil). And this is just the beginning of a huge and overwhelming domino effect that our way of life will undergo in the years to come. Steiner, an engineer by training before

turning to journalism, sees how this simple but constant rise in oil and gas prices will totally re-structure our lifestyle. But what may be surprising to readers is that all of these changes may not be negative - but actually will usher in some new and very promising aspects of our society. Steiner will probe how the liberation of technology and innovation, triggered by climbing gas prices, will change our lives. The book may start as an alarmist's exercise.... but don't be misled. The future will be exhilarating.

Exceptional managers know that they can create competitive advantages by basing decisions on performance response under alternative scenarios.

To create these advantages, managers need to understand how to use statistics to provide information on performance response under alternative scenarios. Statistics are created to make better decisions. Statistics are essential and relevant. Statistics must be easily and quickly produced using widely available software, Excel.

Then results must be translated into general business language and illustrated with compelling graphics to make them understandable and usable by decision makers. This book helps students master this process of using statistics to create competitive advantages as decision makers.

Statistics are essential, relevant, easy to produce, easy to understand, valuable, and fun, when used to create competitive advantage. The Examples, Assignments, And Cases Used To Illustrate Statistics For Decision Making Come From Business Problems McIntire Corporate Sponsors and Partners, such as Rolls-Royce, Procter & Gamble, and Dell, and the industries that they do business in, provide many realistic examples. The book also features a number of examples of global business

As a successful trial lawyer, Mike Beck uses his personality and his skill with the letter of the law to win in a courtroom. As a Marine Reservist ordered to Iraq on an unexpected deployment, he finds himself in a different world where the law of war often conflicts with common sense and his own feel for what's right and what's wrong. When an embedded female correspondent reveals what appears to be an illegal killing of Iraqi civilians by a U.S. Marine during the battle for Fallujah, Beck finds himself faced with a case that challenges both his legal skills and his conviction that something is very wrong with what seems to be a clear violation of the law of land warfare. Devoted to finding the truth about an ugly incident and keeping an innocent Marine from being convicted in a court-martial, Mike Beck defies orders, purloins evidence, and leads a combat team that must fight their way through a fanatical enemy force to investigate the scene of the alleged crime. Along the way as he battles his conscience, command influence, and a media giant clamoring for his head, Mike Beck finds a lot of truth about the case, about the brutal enemy in Iraq, about the nature of a very nasty war, about the Marines risking their lives in a confusing combat situation—and about himself as a

Marine, a lawyer, and a man. “A timely page-turner about war, honor, love, and Iraq justice told by a true Marine—Hooah!” Eugene Sullivan, Chief Judge (ret), U.S. Court of Appeals (Armed Forces) Author of *The Majority Rules* and *The Report to the Judiciary* Stone, a former Marine himself, blurs the lines between the good guys and the bad guys and shows us that in war, not everything and everyone is as they seem at first glance. His battle scenes are written from the perspective of a true soldier and are gripping and at times heart-breaking. Stone’s story is intriguing, action-packed—and hints at more to come.

At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.
