An entire volume dedicated to detailing and preserving the iconic muscle car dealerships of the 1960s and early 1970s, many whose doors are now closed. Text is supported with more than 350 historic photos and illustrations. Muscle car historian Duncan Brown revisits this glorious automotive era when Nickey 427 Camaros and supercharged Dodge Demons by Grand Spaulding Dodge terrorized the streets. Drag sponsored cars from Reynolds Buick, Yeakel Chrysler-Plymouth, and Mel Burns Ford informed buyers that if you came to their dealership, you too could have a screaming fast muscle car just like the ones you saw at the dragstrip. It was these dealerships that created the lasting muscle car legacy through their innovative advertising and over-the-top performance. The majority of these dealerships floundered, unable to re-attract the customers they had prior to the muscle car. Thankfully, a volume has been dedicated to preserving the history of those less fortunate and revisiting the past success of these Lost Muscle Car Dealerships.

How can great companies do everything right—identify real customer needs, deliver excellent innovations, beat their competitors to market—and still fail? The truth is that many companies fail because they focus too intensely on their own innovations, while neglecting the ecosystems on which their success depends. In our increasingly interdependent world, winning requires

more than just delivering on your own promises. It means ensuring that a host of partners—some visible, some hidden—deliver on their promises, too. Ron Adner draws on over a decade of research and field testing to reveal the hidden structure of success, from Michelin's failed run-flat tires to Apple's path to market dominance. The Wide Lens offers a powerful new set of frameworks and tools that will multiply your odds of innovation success.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

For most of its lifespan, the Honda Odyssey has been a favored pick among minivans. Although the vehicle had a rather humble debut, it quickly hit its stride once Honda came out with the second-generation model, which featured a spacious cabin and an innovative third-row seat that folds into the floor. Now in its fourth generation, the Odyssey is one of the top minivans currently available. The Honda Odyssey has made a strong showing, usually earning top honors in every minivan comparison test we've held. There are other minivans that rival the Odyssey's family-friendly features, but the Honda combines those attributes with confident driving dynamics and a long-standing record of reliability, making it an all-around family favorite.
