"It's not easy to stay alive with a \$1,000 bounty on your head." In 1967, a bullet cost thirteen cents, and no one gave Uncle Sam a bigger bang for his buck than the 5th Marine Regiment Sniper Platoon. So feared were these lethal marksmen that the Viet Cong offered huge rewards for killing them. Now noted Vietnam author John J. Culbertson, a former 5th Marine sniper himself, presents the riveting true stories of young Americans who fought with bolt rifles and bounties on their heads during the fiercest combat of the war, from 1967 through the desperate Tet battle for Hue in early '68. In spotter/shooter pairs, sniper teams accompanied battle-hardened Marine rifle companies like the 2/5 on patrols and combat missions. Whether fighting their way out of a Viet Cong "kill zone" or battling superior numbers of NVA crack troops, the sniper teams were at the cutting edge in the art of jungle warfare, showing the patience, stealth, combat marksmanship, and raw courage that made the unit the most decorated regimental sniper platoon in the Vietnam War. Harrowing and unforgettable, these accounts pay tribute to the heroes who made the greatest sacrifice of all—and leave no doubt that among 5th Marine snipers uncommon valor was truly a common virtue.

Engine production for the typical car manufactured today is a study in mass production. Benefits in the manufacturing process for the manufacturer often run counter to the interests of the end user. What speeds up production and saves manufacturing costs results in an engine that is made to fall within a wide set of standards and specifications, often not optimized to meet the original design. In short, cheap and fast engine production results in a sloppy final product. Of course, this is not what enthusiasts want out of their engines. To maximize the performance of any engine, it must be balanced and blueprinted to the exact tolerances that the factory should have adhered to in the first place. Four cylinder, V-8, American or import, the performance of all engines is greatly improved by balancing and blueprinting. Dedicated enthusiasts and professional racers balance and blueprint their engines because the engines will produce more horsepower and torque, more efficiently use fuel, run cooler and last longer. In this book, expert engine builder and veteran author Mike Mavrigian explains and illustrates the most discriminating engine building techniques and perform detailed procedures, so the engine is perfectly balanced, matched, and optimized. Balancing and blueprinting is a time consuming and exacting process, but the investment in time pays off with superior performance. Through the process, you carefully measure, adjust, machine and fit each part together with precision tolerances, optimizing the design and maximizing performance. The book covers the block, crankshaft, connecting rods, pistons, cylinder heads, intake manifolds, camshaft, measuring tools and final assembly techniques. For more than 50 years, balancing and blueprinting has been an accepted and common practice for maximi

Shakespeare, Spenser and the Matter of Britain examines the work of two of the most important English Renaissance authors in terms of the cultural, social and political contexts of early modern Britain. Andrew Hadfield demonstrates that the poetry of Edmund Spenser and the plays of William Shakespeare demand to be read in terms of an expanding Elizabethan and Jacobean culture in which a dominant English identity had to come to terms with the Irish, Scots and Welsh who were now also subjects of the crown.

This lavishly illustrated book examines Berlin in depth during a period of explosive growth between the two world wars. Between 1871 and 1919, the population of Berlin quadrupled, and the city became the political center of Germany, as well as the turbulent crossroads of the modern age. This was reflected in the work of artists, directors, writers, and critics of the time. As an imperial capital, Berlin was the site of violent political revolution and radical aesthetic innovation. After the German defeat in World War I, artists employed collage to challenge traditional concepts of art. Berlin Dadaists reflected upon the horrors of war, and the terrors of revolution and civil war. Between 1924 and 1929 as the spirit of modernity took hold, jazz, posters, magazines, advertisements, and cinema played a central role in the development of Berlin's urban experience. The concept of the "Neue Frau"--the modern, emancipated woman--helped move the city in a new direction. Finally, Berlin became a stage for political confrontation between the left and the right and was deeply affected by the economic crisis and mass unemployment at the end of the 1920s. This book explores in numerous essays and illustrations the artistic, cultural, and social upheavals in

Berlin between 1918 and 1933, and places them in a broader historical framework.
