The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Private investigator Poppy Harmon likes the anonymity of working behind the scenes for the hottest names in Palm Springs. But when solving a case demands dragging her old acting career out of retirement, it's lights . . . camera . . . murder! Cast in her first role since the 1980s, Poppy has never been more rattled or unprepared on a film set. It's an embarrassing but necessary cover to keep an eye on client Danika Delgado, a rising starlet and social media influencer with a large following—including a dangerous stalker who won't disappear. The leading lady's fame is growing, and so are the threats against her life . . . Unfortunately for Poppy, there's more to fear than flubbed lines. When she finds Danika smothered to death in her trailer at Joshua Tree National Park, the horrifying crime stirs up memories of a man known as the Pillow Talk Killer during her time as a young actress, bringing unsolved murders from the past back into focus . . . A trail of clues urges Poppy, hunky sidekick Matt Flowers, and the rest of the Desert Flowers Detective Agency gang on a frantic chase after Danika's crazed #1 fan. But as co-stars and production crew members start looking equally suspicious, Poppy must expose a slew of insidious industry secrets before a murderer rolls out the red carpet for someone else . . .

"911, what emergency situation do you wish to report, please?" "Yes, uhm—I think I need to go to a hospital to be checked out. I was just getting ready for bed, and all of a sudden I found myself waking up, on the floor." "Do you think you had a heart attack?" "I'm not sure—I'm not having any chest pain." "Okay, we will have an ambulance there shortly. Is the door unlocked?" "No, it's locked. I'll answer the door." "You might wish to go ahead and unlock it. That way they can get in if they need to." "Okay, will do." The rescue personnel recommend a place called the "MAC Center" (Mercy Hospital Ambulatory Care). It is only a couple of miles away. There they can do tests and recommend an appropriate hospital. As a police scanner listener, I am familiar with the transport procedure used by rescue personnel. What I hear the ambulance personnel say over their radio mike as the ambulance starts moving therefore sounds surreal to me. "We're en route to the MAC center with a forty-eight-year-old male patient, starting mileage is . . ." I can't believe that this time, I am the patient! Very scary thought.

The global automotive industry faces the most influential changes since the revolutionary introduction of mass production a century ago. Latecomer firms from Asia are challenging the western incumbents. They can change the rules of the game in the industry by leapfrogging several steps in their development process. This study seeks to contribute to the discussion of latecomer firms by gaining insights into the catch up processes of five automotive companies in the passenger car segment, namely BYD (PRC), Chery (PRC), Geely (PRC), Tata Motors (India) and Mahindra & Mahindra (India). Based on learning theories and the core processes of car manufacturers, the author develops a catch up framework in order to compare automotive latecomers. The Korean manufacturer Hyundai serves as an example for a successful catch up, and provides a contextual framing for catch up processes in the automotive sector. An analysis of empirical data provides evidence for the evaluation of the catch up status of the five challenger firms. The author emphasizes the influence of institutional settings in China and India and the role of business groups that can act as facilitators for the catch up process. Finally, the study clusters the catch up strategies of the five observed companies in order to compare their approach.

"The definitive book on camping in America. . . . A passionate, witty, and deeply engaging examination of why humans venture into the wild."—Cheryl Strayed, author of *Wild From the Sierras to the Adirondacks and the Everglades*, Dan White travels the nation to experience firsthand—and sometimes face first—how the American wilderness transformed from the devil's playground into a source of adventure, relaxation, and renewal. Whether he's camping nude in cougar country, being attacked by wildlife while "glamping," or crashing a girls-only adventure for urban teens, Dan White seeks to animate the evolution of outdoor recreation. In the process, he demonstrates how the likes of Emerson, Thoreau, Roosevelt, and Muir—along with visionaries such as Adirondack Murray, Horace Kephart, and Juliette Gordon Low—helped blaze a trail from Transcendentalism to Leave No Trace. Wide-ranging in research, enthusiasm, and geography, *Under the Stars* reveals a vast population of nature seekers, a country still in love with its wild places.

The automobile is an icon of modern technology because it includes most aspects of modern engineering, and it offers an exciting approach to engineering education. Of course there are many existing books on introductory fluid/aero dynamics but the majority of these are too long, focussed on aerospace and don't adequately cover the basics. Therefore, there is room and a need for a concise, introductory textbook in this area. *Automotive Aerodynamics* fulfils this need and is an introductory textbook intended as a first course in the complex field of aero/fluid mechanics for engineering students. It introduces basic concepts and fluid properties, and covers fluid dynamic equations. Examples of automotive aerodynamics are included and the principles of computational fluid dynamics are introduced. This text also includes topics such as aeroacoustics and heat transfer which are important to engineering students and are closely related to the main topic of aero/fluid mechanics. This textbook contains complex mathematics, which not only serve as the foundation for future studies but also provide a road map for the present text. As the chapters evolve, focus is placed on more applicable examples, which can be solved in class using elementary algebra. The approach taken is designed to make the mathematics more approachable and easier to understand. Key features: Concise textbook which provides an introduction to fluid mechanics and aerodynamics, with automotive applications Written by a leading author in the field who has experience working with motor sports teams in industry Explains basic concepts and equations before progressing to cover more advanced topics Covers internal and external flows for automotive applications Covers

emerging areas of aeroacoustics and heat transfer Automotive Aerodynamics is a must-have textbook for undergraduate and graduate students in automotive and mechanical engineering, and is also a concise reference for engineers in industry.

A baby can be a good excuse to skip a party, but . . . goodbye alone time, hello awkward new social obligations. All parents want the same things: to balance work and home life, to raise happy kids, to never attend a baby drumming class, and to build a secret room in their home where they can hide (preferably not the bathroom). Yes, an introverted parent would more keenly want to be free of the slew of attention and expectations that accompany both pregnancy and parenthood, but even the most outgoing person is sure to reach their limit eventually. Here, with laugh-out-loud humor and well-earned experience, Julie Vick offers coping mechanisms for everything from sharing the news that you are becoming a parent to the moment the baby is born (one way or another, it will happen), from managing doctor's visits to handling playdates. She offers advice on finding childcare and ignoring the nursing versus formula conversation with strangers. Witty yet valuable, her tips, checklists, and the occasional chart focus on the time from pregnancy through preschool.

Now a Major Motion Picture titled Whiskey Tango Foxtrot starring Tina Fey, Margot Robbie, Martin Freeman, Alfred Molina, and Billy Bob Thornton. From tea with warlords in the countryside to parties with drunken foreign correspondents in the "dry" city of Kabul, journalist Kim Barker captures the humor and heartbreak of life in post-9/11 Afghanistan and Pakistan in this profound and darkly comic memoir. As Barker grows from awkward newbie to seasoned reporter, she offers an insider's account of the region's "forgotten war" at a time when all eyes were turned to Iraq. Candid, self-deprecating, and laugh-out-loud funny, Barker shares both her affection for the absurdities of these two hapless countries and her fear for their future stability.

Lemon-Aid Used Cars and Trucks 20102011 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years of production. This book offers an exposé gas consumption lies, a do-it-yourself service manual, an archive of service bulletins granting free repairs, and more.

If you are a .NET or Java developer who wants to develop and customize Dynamics AX 2012 R3, this book is for you. Some experience with object-oriented development technologies is expected, but no experience in development with AX is required.

Naming What We Know: Threshold Concepts of Writing Studies, published in 2015, contributed to a discussion about the relevance of identifying key concepts and ideas of writing studies. (Re)Considering What We Know continues that conversation while simultaneously raising questions about the ideas around threshold concepts. Contributions introduce new concepts, investigate threshold concepts as a framework, and explore their use within and beyond writing. Part 1 raises questions about the ideologies of consensus that are associated with naming threshold concepts of a discipline. Contributions challenge the idea of consensus and seek to expand both the threshold concepts framework and the concepts themselves. Part 2 focuses on threshold concepts in action and practice, demonstrating the innovative ways threshold concepts and a threshold concepts framework have been used in writing courses and programs. Part 3 shows how a threshold concepts framework can help us engage in conversations beyond writing studies. (Re)Considering What We Know raises new questions and offers new ideas that can help to advance the discussion and use of threshold concepts in the field of writing studies. It will be of great interest to scholars and graduate students in writing studies, especially those who have previously engaged with Naming What We Know. The story about a team who figured out how to build the perfect vehicle, without building a single vehicle, using digital computing technology.

This book aims to show that fuzzy set theory constitutes a highly expressive framework for modeling preference queries. It presents a study of the algorithmic aspects related to the evaluation of such queries in order to demonstrate that this framework offers a good trade-off between expressivity and efficiency. Numerous examples and proofs are liberally and lucidly demonstrated throughout, and greatly enhance the detailed theoretical aspects explored in the book.

A guide to buying a used car or minivan features information on the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips.

In Vibe, bestselling author Robyn Openshaw reveals the difference between low vibration emotions (fear, anger, inertia) and high vibration emotions (love, inner peace, gratitude) and helps you dramatically impact your physical and mental well-being by raising your vibrational frequencies. The great Austrian scientist Nikola Tesla is a household name among today's scientific community, known for his finding that all matter has vibrational energy, or electrical frequency, and that we are all electrical beings, made up of rapidly vibrating cells. Most of us are vaguely familiar with this concept, but we don't realize the powerful implications this has for our choices every day—which foods to eat, how much water to drink, what we think about when we're in the car or the shower, what our risk of disease is, and how we feel at any given moment are all affected by the power of vibration. Everything in health and wellness should revolve around the basic concept that what we choose to eat and what we choose to do lowers or raises our vibration. And that makes all the difference. Vibe explores the foods, natural substances, and lifestyle practices that can raise our vibrations. Robyn Openshaw reveals evidence that shows how drinking green juice, using certain essential oils, and engaging in yoga and meditation raises the frequency of the human brain and other organs. Living in a "high vibe" state can make us resilient to illness, fatigue, burnout, and depression. Readers will learn all about the low vibration emotions (fear, anger, inertia) and the high vibration emotions (love, peace, gratitude) and how to achieve higher vibrations in everyday living. Openshaw explores how the smallest changes in our life—from what we eat to how we think—can radically improve our mood, overall health, and quality of life.

Return Specialist Simon Fisk is about to go on his most dangerous mission: rescuing the granddaughter of the US Secretary of State from terrorists. Simon Fisk, a specialist in recovering abducted children, is on a routine case in Cape Town when he suddenly finds the body of the suspect he has been following. Believing he is being framed for murder, he runs and soon discovers the job was merely a ruse to lure him to the continent. There, Simon will be tasked with his most dangerous mission yet: trekking through the African bush to locate a group of terrorists responsible for abducting the granddaughter of the US Secretary of State. Although Simon prefers to work alone, he is accompanied by university professor Jadine Visser, an old flame, who quickly proves adept at survival. But why is she involved? And how will they locate the underground militant group bent on using the girl in a high-profile terror attack before it's too late?
