The importance of Sport Tourism as a developing science and Sport Events specifically is on the increase. This is especially true when experts say that sport tourism is big business. South Africa, like most other countries, hosts thousands of sport events each year. Therefore, destinations compete fiercely not only to host these events but also to offer quality events. All this is happening despite the fact that there is a lack of properly trained sport and event managers. Therefore, the purpose of this book is to equip the reader with specific knowledge and skills about the sport and events tourism phenomenon. The book deals with a wide variety of topics, stretching from the history of sport tourism to new and globally important issues such as the greening of sport events. The book is a useful tool for both students and practitioners alike, since it also provides guidelines and case studies.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to

kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than

others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

O conceito "pensar globalmente e agir localmente" tem sido considerado uma habilidade que pode determinar o sucesso de um profissional de marketing. Porém, muitas companhias têm descoberto que é igualmente importante "agir localmente e pensar globalmente". Isso significa, na prática, que estão descobrindo o valor de impulsionar as inovações que acontecem longe das sedes e trazê-las para dentro de casa. Em Marketing global, os autores trazem exemplos das estratégias de marketing utilizadas por companhias mundiais, como a Embraer (Brasil), Lukoil (Rússia), Cemex (México), Lenovo (China) e a Grande Tríplice da Índia - Wipro, Infosys e Tata. O livro aborda também o impacto progressivo das nações emergentes - Brasil, Rússia, Índia e China -, e examina o efeito da crise financeira mundial sobre a estratégia de marketing global. Além disso, estudos de caso bastante atuais inserem o leitor no contexto de cada capítulo, apresentando um panorama real dos desafios, controvérsias e inovações que todo estudante e profissional de marketing deve conhecer.

How do the rich get rich? An updated edition of the “remarkable” New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don’t live in Beverly Hills or on Park Avenue. They live next door. America’s wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don’t realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as “rich” are actually a tiny minority of America’s truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, The Millionaire Next Door was a groundbreaking examination of America’s rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the original content in the context of the financial crash and the twenty-first century. “Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today’s earn-and-consume culture.” —Library Journal
