Road Vehicle Dynamics supplies students and technicians working in industry with both the theoretical background of mechanical and automotive engineering, and the know-how needed to perform numerical simulations. Bringing together the foundations of the discipline and its recent developments in a single text, the book is structured in three parts: it begins with a historical overview of road vehicles; then deals with the forces exchanged between the vehicle and the road, and the vehicle and the air; and finally, deals with the dynamic behavior of the vehicle in normal driving conditions with some extensions towards conditions encountered in high-speed racing. Coverage of contemporary automatic controls is included in this edition. This book provides a unique historical and qualitative review of ten foreign automakers with plants in developed North America from their early beginnings to their export entry into North America. It seeks to expand the knowledge of American and Canadian policymakers pursuing a new foreign motor vehicle assembly plant or Foreign Direct Investment.

As a recent college graduate and fledging newspaper reporter in the Lake Tahoe area, Jeremy Evans became immersed in ski bum culture—a carefree lifestyle whose mantra was simply: "Ski as much as possible." His snowboarding suffered when he left for a job in the Portland area; and when, at twenty-six, he suffered a stroke, he reexamined his priorities, quit his job, moved back to Tahoe, and threw himself into snowboarding. But while he had been away, the culture had changed. This book is Evans's paean to the disappearing culture of the ski bum. A fascinating look at a world far removed from the larger culture, it is also a curious account of a passion for powder and what its disappearance means. Evans looks at several prominent ski towns in the West (including Crested Butte, Jackson Hole, Telluride, Lake Tahoe, Park City, and Mammoth) and the ski bums

who either flourished or fled. He chronicles the American West transformed by rising real estate costs, an immigrant workforce, misguided values, and corporate-owned resorts. The story he tells is that of quintessentially American characters?rejecting materialism, taking risks, following their own path?and of the glories and pitfalls their lifestyle presents.

Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as

previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. This is the disturbing account of 31-year-old Joanna Dennehy, mother of two, the man under her spell, Gary Stretch, 47, and the murder investigation that led them and others to the Old Bailey for trial. A true crime short, plus 17 additional true crime stories. It was the day before Easter, 2013. A man out walking his dog on a rural road near Peterborough, United Kingdom found a dead body lying in a ditch. The grisly discovery preceded two other dead body discoveries under similar circumstances, thus launching police on a massive country-wide manhunt for a self-mutilating female psychopath with an affinity for knives and her 7-foot 3-inch tall companion and accomplice. Before their bloody rampage was brought to an end, they would attempt to kill two additional innocent people who likely never even saw them coming. This volume also includes the bizarre, compelling and frighteningly authentic true crime stories of several headline-grabbing cases, as well as more obscure cases that received little media attention. Within these pages you will find stories about serial killer Andrew Urdiales; Jodi Arias and the murder of Travis Alexander; the random serial stabber case; a killer who
