As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says:

Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

Volkswagen's Golf (Rabbit) and Jetta models are popular and enduring cars. Well-known for their robustness and need for minimum maintenance, these vehicles often suffer from neglect by their owners. Restoration expert Lindsay Porter fills you in on VW history and development, tells you what to look for and what to avoid when buying an older model, and how to bring it back to first-class condition. Fully illustrated sequences guide you step-by-step through a mechanical overhaul and show you how to restore bodywork, interior and electrics. Includes soft-top mechanism replacement.

Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. "Dr. Phil," along with George Iny and the Editors of the Automobile Protection Association, pull no punches.
