Is your child just beginning to say words? Does your child already talk but have difficulty saying the ending sounds on words? Easy-To-Say First Words was designed by a licensed and ASHA certified speech-language pathologist to help your child learn first words and improve articulation. Easy-To-Say First Words is perfect for early talkers because it encourages children to imitate easy-to-say one-syllable words with early-developing consonants (bat, up, cake, hop, eat). Difficult-to-say words (for example: elephant, strawberry, flower) are not included in the book. Unique and engaging illustrations will capture your child's attention and the interactive nature of the book will motivate your child to say new words. If your child is struggling with articulation of final consonants, this book is designed to stimulate awareness of final consonants through repetition. A guide explaining how to read this book with your child and how to help your child with his/her speech and language skills is included.

This is a book for tall people, those who relate to them, and anyone interested in height in general. Being tall coincides with considerable professional, athletic, and social benefits. Yet there are also some problems, and these raise some questions. For instance, if longer levers and more cells really are behind increased risk of injuries and cancer, then how is it that giraffes get by? And why is it that society reveres tall stature but then compromises our safety with cramped cars and other things? And, as tall women might be pondering, where have all the tall, dark, and handsome men gone? Lastly, what can be done about all this? These questions and more will all be answered by a tall protagonist over eight chapters: Evolution, Scaling, Spine, Manufactured, Ergonomics, Growth, Longevity, and Society.

In this set of interdisciplinary essays leading scholars discuss the future of the Rule of Law, a concept whose meaning and import has become ever more topical and elusive. Historically the term denoted the idea of 'government limited by law'. It has also come to be equated, more broadly, with certain goods suggested by the idea of legality as such, including the preservation of human dignity and other individual and social benefits predicated upon or conducive to a rule-based social order. But in both its narrow and broader senses the Rule of Law remains a much contested concept. These essays seek to capture the main areas and levels of controversy by 'relocating' the Rule of Law not just at the philosophical level, but also in its main contemporary arenas of application - both national, and increasingly, supranational and international.

that rivaled some fashion shows. It showcased some of the most revolutionary and innovative prototype and dream cars ever built. And it captured the imagination of the car-buying public from 1950 to 1961. Motorama expert and experienced author David Temple has comprehensively researched the show, the cars, and the personalities to create a fascinating new story with many new photos of these magnificent cars. Because television was in its infancy, GM's President Alfred Sloan believed that the Motorama was the most effective way to market GM products and design prowess. Legendary stylist Harley Earl led a talented group of designers and engineers to dream up, style, and develop some of the most remarkable prototype cars of all time. While current production Buick, Chevy, Cadillac, and Pontiac cars were showcased, the bold, radical, awe-inspiring prototype and dream cars stole the show. These included the GM Le Sabre, replete with aerospace design and an aluminum engine; the fiberglass-bodied Corvette dream car, which went into production after overwhelmingly positive response; and the jet engine-powered Firebird. Temple goes into fascinating detail on the body, frame, engine, drivetrain, and all the special features of each model. He has also retraced the ownership histories of some of these cars. Within the pages of this volume, you get to relive this glorious era of automotive history and revisit the advanced show cars that inspired so many new models. This book features fascinating period photography of Motorama cars at the show, in development, and at different locales. No other automotive show rivaled the Motorama for stunning productions and awe-inspiring cars, which makes this a must-have book.

The paper investigates the divergence between inflation and monetary expansion in Zimbabwe since late 2003. The substantial decline in velocity and increasing levels of real money balances during 2004 are at odds with a record of inflation closely tracking the growth rates of monetary aggregates in the past. Possible explanations for the divergence include an unstable demand for money, a sudden shift in the underlying demand for real balances due to a sharp change in an explanatory variable, and a structural break or aberration in a normally stable money demand relation reflecting some unexplained factor such as repressed inflation (given administered prices) or measurement errors in the consumer price index. The results of the study point to the last possibility as the most likely explanation.
