Ethnic and Minority Cultures as Tourist Attractions Anya Diekmann, Melanie Kay Smith, 2015-01-15 This book focuses on ethnic and minority communities in urban contexts and the ways in which their cultures are represented in tourism development. It offers a multi-disciplinary approach which draws on examples and case studies of ethnic and minority communities and cultural tourism development from all around the world, including slums in India, favelas in Brazil, Chinatowns in Australia, Jewish quarters in Central and Eastern Europe, ethnic villages in China, the African district of Brussels, the gay quarter in Cape Town and a desert town in Israel. It offers a positive perspective on ethnic and minority cultures and communities at a time when social and political support is lacking in many countries. This book will be a useful resource for those studying and researching cultural and urban tourism, urban planning and development, community studies and urban and cultural geography.

The Albergo Diffuso Model Maurizio Droli,2019-12-02 The hospitality model called Albergo Diffuso (AD), or scattered hotel, has been engineered by Mr Giancarlo Dall'Ara and described by The New York Times as a way of bringing life back to historic towns and rural hamlets by utilizing unused rooms for tourism. This simple but genial model devised in Italy in the mid-90's received an award from the UNDP for its sustainability, but despite the spread of AD's, no peer-reviewed books have previously been published in English focusing on this innovation. In this book, the author therefore begins by exploring the AD as a community-based hospitality model, examining both its pros and cons. He then considers conviviality, sense of security, and other factors that Hans Magnus Enzensberger referred to as luxuries of our time for urban dwellers. These represent the key pre-requisites a location must possess to be deemed suitable for this innovation. Next, investors and co-interested private, public and not-for-profit associations are provided with a structured framework to help them achieve a defensible competitive advantage by harnessing the economic potential of valuable, rare, inimitable and non-substitutable (VRIN) resources. The final section assesses the AD as a business model, evaluating various aspects at the heart of any business plan.

Overbooked Elizabeth Becker,2016-02-23 Travel is no longer a past-time but a colossal industry, arguably one of the biggest in the world and second only to oil in importance for many poor countries. One out of 12 people in the world are employed by the tourism industry which contributes \$6.5 trillion to the world's economy. To investigate the size and effect of this new industry, Elizabeth Becker traveled the globe. She speaks to the Minister of Tourism of Zambia who thinks licensing foreigners to kill wild animals is a good way to make money and then to a Zambian travel guide who takes her to see the rare endangered sable antelope. She travels to Venice where community groups are fighting to stop the tourism industry from pushing them out of their homes, to France where officials have made tourism their number one industry to save their cultural heritage; and on cruises speaking to waiters who earn \$60 a month--then on to Miami to interview their CEO. Becker's sharp depiction reveals travel as a product; nations as stewards. Seeing the tourism industry from the inside out, the world offers a dizzying range of travel options but very few quiet getaways--

Education, Travel and the 'Civilisation' of the Victorian Working Classes Michele M. Strong,2014-01-23 Examining four major institutions, Michele Strong considers the experiences of working men and women, particularly artisans, but also young apprentices and clerks, who travelled abroad as participants in an educational reform movement spearheaded by middle-class liberals.

Tourism and Citizenship Raoul Bianchi,Marcus Stephenson,2014-02-24 More than sixty years since the 1948 Universal Declaration of Human Rights first enshrined the right to freedom of movement in an international charter of human rights, the issue of mobility and the right to tourism itself have become increasingly significant areas of scholarly interest and political debate. However, despite the fact that cross-border travel implies certain citizenship rights as well as the material

capacity to travel, the manifold intersections between tourism and citizenship have not received the attention they deserve in the literature. This book endeavours to fill this gap by being the first to fully examine the role of tourism in wider society through a critically-informed sociological reflection on the unfolding relationships between international tourism and distinct renderings of citizenship, with particular emphasis on the ideological and political alignments between the freedom of movement and the right to travel. The text weaves its analysis of citizenship and travel in the context of addressing large-scale societal transformations engendered by globalization, neoliberalism and the geopolitical realignments between states, as well as comprehending the internal reconfiguring of the relationship between citizens and states themselves. By doing so, it focuses on key themes including: tourism and social citizenship rights; race, culture and minority rights; states, markets and the freedom of movement; tourism, peace and geo-politics; consumerism and class; and, ethical tourism, global citizenship and cosmopolitanism. The book concludes that the advancement of genuinely democratic and just forms of tourism must be commensurate with demands for distributive justice and a democratic politics of mobility encompassing all of humanity. This timely and significant contribution to the sociology and politics of international tourism through the lens of citizenship is a must read for students and scholars in both in the fields of tourism and social science. The royalties received from this book will be donated to the International Porter Protection Group.

US-China Relations in the Twenty-First Century Michael Tai, 2015-04-24 The relationship between the United States and China will be of critical importance to the world throughout the twenty-first century. In the West China's rise is often portrayed as a threat and China seen in negative terms. This book explores the dynamics of this crucial relationship. It looks in particular at what causes an international relationship to be perceived negatively, and considers what can be done to reverse this, arguing that trust is a key factor. It goes on to discuss US and Chinese rhetoric and behaviour in three key areas - climate change, finance, and international security. The book contends that, contrary to much US rhetoric, China's actions

in these areas is often much more flexible and accommodating than the US position, and that the Chinese are much more knowledgeable about, and understanding and appreciative of, the United States than vice versa.

Biocentric Development: Studies on the Consequences of COVID-19 Towards Human Growth and Sustainability Marcus Stueck, Hamidreza Khankeh, Mariola Bidzan, Mehrdad Farrokhi, Dian Veronika Sakti Kaloeti, 2023-08-15 COVID-19 has resulted in drastic socio-political and economical changes on a global scale. On an individual level, the pandemic has significantly changed the lifestyle and personal values of millions of people. It can be argued that COVID-19 was a result of humans living in an anthropocentric way, in which humans are at the top of the hierarchy. The impact and spread of COVID-19 have forced us to face our affective relationship with the environment from a Biocentric perspective, rather than an anthropocentric perspective. The Biocentric perspective encourages us to reflect on the meaning of values of our social integration and emphasizes the importance of a sustainable affective interaction with nature. To improve human capacity of coping with crises like COVID-19 in the future, it would be important that we develop biocentric education and reinforce lifestyles that promote sustainability

Cultural Heritage, Creativity and Economic Development Silvia Cerisola, 2019 The book explores the relationship between cultural heritage and local economic development by introducing the original idea that one possible mediator between the two can be identified as creativity. The book econometrically verifies this idea and demonstrates that cultural heritage, through its inspirational role on different creative talents, generates an indirect positive effect on local economic development. These results justify important new policy recommendations in the field of cultural heritage.

Essentials of Sociology George Ritzer, 2015-12-10 Join the conversation with one of sociology's best-known thinkers.

Essentials of Sociology, Second Edition adapted from George Ritzer's Introduction to Sociology, Third Edition, provides the same rock-solid foundation in a shorter and more streamlined format. Like the original Ritzer text, Essentials of Sociology illuminates traditional sociological concepts and theories, and focuses on some of the most compelling contemporary social phenomena: globalization, consumer culture, the Internet, and the "McDonaldization" of society. As technology flattens the globe, students are challenged to apply a sociological perspective to their world, and to see how "public" sociologists are engaging with the critical issues of today.

Breaking the Dead Silence Christina Horvath, Richard S. White, 2024-06-21 An Open Access edition will be available on publication. The murder of George Floyd in 2020, the renewed international take up of the cry Black Lives Matter and the subsequent toppling of a statue commemorating slave-merchant-turned-philanthropist Edward Colston in Bristol provoked urgent questions on memorialisation, white privilege, social justice and repair. Debates on how legacies of colonialism and empire in Britain should be addressed spilled out of the scholarly world into the public discourse. In the immediate wake of the statue toppling this book offers a unique, distinctive and timely contribution to those debates: a series of voices and experiences are offered as critical commentaries and accounts of recent interventions on an official heritage narrative. It sets out to break the 'dead silence', by bringing together diverse perspectives from academics, artists, activists, heritage professionals and tourist guides. The book offers fresh insights, referencing work attending to the impacts and legacies of colonisation primarily in Bath and Bristol, augmented with comparative contributions from Lancaster and Mexico offering significant and pertinent resonances. A range of strategies are explored towards enabling silenced voices to be heard and engage in conversations about how the past is represented, including Co-Creation, new agonistic museum practices, innovative creative and somatic approaches.

The Political Economy of City Branding Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways. One of its manifestations is increased intercity competition, which compels cities to increase their attractiveness in terms of capital, entrepreneurship, information, expertise and consumption. This competition takes place in an asymmetric field, with cities trying to find the best possible ways of using their natural and created assets, the latter including a naturally evolving reputation or consciously developed competitive identity or brand. The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post-industrial cities in North America, Europe, East Asia and Australasia. Special attention is given to local economic development policy and industrial profiling, and global city rankings are used to provide empirical evidence for cities' characteristics and positions in the global urban hierarchy. On top of this, social and urban challenges such as creative class struggle are also discussed. The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization, but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal

results. This book will be of interest to scholars and practitioners working in the areas of local economic development, urban planning, public management, and branding.

Building Imaginary Worlds Mark J.P. Wolf, 2014-03-14 Mark J.P. Wolf's study of imaginary worlds theorizes world-building within and across media, including literature, comics, film, radio, television, board games, video games, the Internet, and more. Building Imaginary Worlds departs from prior approaches to imaginary worlds that focused mainly on narrative, medium, or genre, and instead considers imaginary worlds as dynamic entities in and of themselves. Wolf argues that imaginary worlds—which are often transnarrative, transmedial, and transauthorial in nature—are compelling objects of inquiry for Media Studies. Chapters touch on: a theoretical analysis of how world-building extends beyond storytelling, the engagement of the audience, and the way worlds are conceptualized and experienced a history of imaginary worlds that follows their development over three millennia from the fictional islands of Homer's Odyssey to the present internarrative theory examining how narratives set in the same world can interact and relate to one another an examination of transmedial growth and adaptation, and what happens when worlds make the jump between media an analysis of the transauthorial nature of imaginary worlds, the resulting concentric circles of authorship, and related topics of canonicity, participatory worlds, and subcreation's relationship with divine Creation Building Imaginary Worlds also provides the scholar of imaginary worlds with a glossary of terms and a detailed timeline that spans three millennia and more than 1,400 imaginary worlds, listing their names, creators, and the works in which they first appeared.
