This textbook provides a comprehensive introduction to the novel concepts of pneumopedics and craniofacial epigenetics. Clinically, these mechanisms are delivered through biomimetic oral appliance therapy. The text, therefore, covers both genetics and epigenetics of craniofacial development, as well as growth and development of the craniofacial architecture. Despite being complex subjects, the style of writing allows the general reader to assimilate this information and sets the scene for how these principles might best be utilized. For example, the clinical application of biomimetic tooth movement achieved through epigenetic orthodontics is presented. Prior to pneumopedic treatment, the significance of craniofacial diagnostics and treatment planning is discussed, before detailing the principles of designing a biomimetic oral appliance. Next, the book goes over the practicalities of clinical adjustments of oral biomimetic devices. Moving onto patient selection and management, the book also provides an overview and introduction to pediatric craniofacial epigenetics, which touches upon the preventive aspects of healthcare, including nutrition. This section is followed by an introduction to sleep and sleep disordered breathing in both children and adults, which includes a comprehensive approach to the potential elimination of obstructive sleep apnea. Finally, clinical biomimetic correction is illustrated with examples of non-surgical upper airway remodeling using various cases. The book also contains a Glossary containing definitions of common terms as well as an Appendix of documents that might be useful for both implementation and further study.

This book on the local and systemic manifestations and correlates of temporomandibular joint disorders (TMDs) encompasses the two intertwined facets of translational science – translational research and translational effectiveness – as they relate specifically to TMDs. The first part of the book, on recent translational research, focuses on topics such as the neuroanatomy and neurophysiology of the trigeminal nerve and trigeminal network system, the manifestations of neuroinflammation in TMDs, and the molecular mechanisms underlying TMDs. The second part discusses the clinical effectiveness of treatment approaches from the perspective of evidence-based dentistry, with careful attention to the critical relationships between dental malocclusions, the signs and symptoms of TMDs, and airway/breathing disorders. Interventions to correct for malocclusal conditions that lead to TMDs are examined, with explanation of the ways in which they can ameliorate a variety of local and systemic symptoms. This will be an excellent reference book for established practitioners, residents, interns, and students as well as a powerful cutting-edge document for researchers in the field.

Conceived as the meanings that individuals attach to their selves, a substantial stockpile of theory related to identities accumulated across the arts, social sciences, and humanities over many decades continues to nourish contemporary research on self-identities in organizations. In times which are more reflexive, narcissistic, and fluid, the identities of participants in organizations are increasingly less fixed and less certain, making identity issues both more salient and more interesting. Particular attention has been given to processes of identity construction, often styled 'identity work'. Research has focused on how, why, and when such processes occur, and their implications for organizing and individual, group, and organizational outcomes. This has resulted in a burgeoning stream of research from discursive, dramaturgical, symbolic, socio-cognitive, and psychodynamic perspectives that most often casts individuals' efforts to fabricate identities as intentional, relational, and consequential. Seemingly intractable debates centred on the nature of identities - their relative stability or fluidity, whether they are best regarded as coherent or fractured, positive (or not), and how they are fabricated within relations of power - combined with other conceptual issues continue to invigorate the field. However, these debates have also led to some scepticism regarding the future potential of identities research. Yet as the chapters in this Handbook demonstrate, there are considerable grounds for optimism that identity, as root metaphor, nexus concept, and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies.

Este libro está compuesto por siete capítulos de sólida base empírica en campos que incluyen policías e integrantes de fuerzas de seguridad, vínculos en las cárceles entre detenidos y servicio penitenciario y vigilantes privados de Argentina y Brasil. En todos los casos se ofrecen discusiones y resultados para comprender cómo las lógicas de las deudas, los consumos y los salarios inciden en las relaciones de los agentes uniformados y sus formas de intervenir en la seguridad y el control del delito. A lo largo de este trabajo se despliega una extrema atención por pensar la relación entre dinámicas monetarias y órdenes institucionales en contextos socio-históricos específicos. Por un lado, a través de los casos que se abordan, podemos tener una entrada privilegiada al proceso de financiarización de la economía en nuestro país y sobre cómo eso redefine algunas lógicas de las fuerzas de seguridad, a la vez que estas traducen a sus propias dinámicas los nuevos modos de consumo y crédito que gobiernan la economía capitalista contemporánea. Por otro lado, la secularización de las fuerzas de seguridad también tiene su impacto en los modos en que el dinero contribuye a producir un orden institucional. Este movimiento de decline del componente vocacional en la integración a las fuerzas de seguridad y su reemplazo por un ethos profesional tiene en el dinero un indicador clave. En síntesis, este libro contribuye a mostrar, una vez más, que los estudios del dinero son un capítulo central de los análisis sobre los procesos de democratización institucional.
