A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal – that social and economic rewards should follow achievement rather than breeding – reigns supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if, both up and down the social ladder, meritocracy is a sham? Today, meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy, and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes. This is the radical argument that Daniel Markovits prosecutes with rare force. Markovits is well placed to expose the sham of meritocracy. Having spent his life at elite universities, he knows from the inside the corrosive system we are trapped within. Markovits also knows that, if we understand that meritocratic inequality produces near-universal harm, we can cure it. When The Meritocracy Trap reveals the inner workings of the meritocratic machine, it also illuminates the first steps outward, towards a new world that might once again afford dignity and prosperity to the American people.

This book explains the nuts and bolts of affordable housing development. Divided into two complementary sections, the book first provides an overview of the effectiveness of existing federal and state housing programs in the United States, such as the LIHTC and TIF programs. In turn, the book's second section presents an extensive discussion of and insights into the financial

feasibility of an affordable real estate development project. Researchers, policymakers and organizations in the public, private and nonprofit sectors will find this book a valuable resource in addressing the concrete needs of affordable housing development. "Luque, Ikromov, and Noseworthy's new book on Affordable Housing Development is a "must read" for all those seeking to address the growing and vexing problem of affordable housing supply. The authors provide important insights and practical demonstration of important financial tools often necessary to the financial feasibility of such projects, including tax-increment financing and the Low-Income Housing Tax Credit. Further, the authors provide important backdrop to the affordability crisis and homelessness. I highly recommend this book to all who seek both to articulate and enhance housing access." By Stuart Gabriel, Arden Realty Chair, Professor of Finance and Director, Richard S. Ziman Center for Real Estate at UCLA "Over several years Jaime Luque, Nuriddin Ikromov and William Noseworthy applied their analytical bent, and no small measure of empathy, to homelessness as actually experienced in Madison, Wisconsin – and they inspired multiple classes of urban economics students to join them. "Homelessness" is a complex web of issues affecting a spectrum of populations, from individuals struggling with addiction or emotional disorders, to families who've been dealt a bad hand in an often-unforgiving economy. Read this book to follow Jaime, Nuriddin, and William as they evaluate a panoply of housing and social programs, complementing the usual top-down design perspective with practical analysis of the feasibility of actual developments and their effectiveness. Analytical but written for a broad audience, this book will be of interest to anyone running a low-income housing program, private and public developers, students, and any instructor designing a learning-by-doing course that blends rigor with real-world application to a local problem." By Stephen Malpezzi, Professor Emeritus, James A. Graaskamp Center for Real Estate, Wisconsin School of Business, University of Wisconsin-Madison, and Dean, Weimer School of the Homer Hoyt Institute.

California was at the epicentre of the collapse of the real estate market in 2008, which had a devastating effect on the world economy. Taking this diverse and powerful state as a case study, this book presents a financial history of the property business, from the time Spanish Missions were established to the Great Recession. Financing California Real Estate provides the history of expansions and contractions in the real estate market, and describes factors in the state and nation which may have triggered changes in the direction of growth in real estate lending. It explores how financial institutions which provided funding for building and buying homes changed over time, from the establishment of Spanish Missions in 1769, to the Gold Rush, to rail transportation, all the way through to the real estate bubble that peaked in 2005. Using detailed information on financial institutions to explain the changing nature of the real estate market, this book ultimately suggests an alternative theory for what led to the Great Recession. This book will be of interest to researchers working in the area of real estate cycles in the economy, historians interested in the economy of California, and financial historians.

A groundbreaking new vision for public safety that overturns more than 200 years of fear-based discrimination, othering, and punishment As the effects of aggressive policing and mass incarceration harm historically marginalized communities and tear families apart, how do we define safety? In a time when the most powerful institutions in the United States are embracing the repressive and racist systems that keep many communities struggling and in fear, we need to reimagine what safety means. Community leader and lawyer Zach Norris lays out a radical way to shift the conversation about public safety away from fear and punishment and toward growth and support systems for our families and communities. In order to truly be safe, we are going to have to dismantle our mentality of Us vs. Them. By bridging the divides and building relationships with one another, we can dedicate ourselves to strategic, smart investments—meaning resources directed toward our stability and well-being, like healthcare and housing, education and living-wage jobs. This is where real safety begins. Originally published in hardcover as We Keep Us Safe: Building Secure, Just, and Inclusive Communities, Defund Fear is a blueprint of how to hold people accountable while still holding them in community. The result reinstates full humanity and agency for everyone who has been dehumanized and traumatized, so they can participate fully in life, in society, and in the fabric of our democracy.

A revelatory study of how climate change will affect individual economic decisions, and the broad impact of those choices Selected by Publishers Weekly as one of its Top Ten books in Business and Economics for Spring 2021 It is all but certain that the next century will be hotter than any we've experienced before. Even if we get serious about fighting climate change, it's clear that we will need to adapt to the changes already underway in our environment. This book considers how individual economic choices in response to climate change will transform the larger economy. Using the tools of microeconomics, Matthew E. Kahn explores how decisions about where we live, how our food is grown, and where new business ventures choose to locate are impacted by climate change. Kahn suggests new ways that big data can be deployed to ease energy or water shortages to aid agricultural operations and proposes informed policy changes related to public infrastructure, disaster relief, and real estate to nudge land use, transportation options, and business development in the right direction.

California is a region of rich geographic and human diversity. The Elusive Eden charts the historical development of California, beginning with landscape and climate and the development of Native cultures, and continues through the election of Governor Gavin Newsom. It portrays a land of remarkable richness and complexity, settled by waves of people with diverse cultures from around the world. Now in its fifth edition, this up-to-date text provides an authoritative, original, and balanced survey of California history incorporating the latest scholarship. Coverage includes new material on political upheavals, the global banking crisis, changes in education and the economy, and California's shifting demographic profile. This edition of The Elusive Eden features expanded coverage of gender, class, race, and ethnicity, giving voice to the diverse individuals and groups who have shaped California. With its continued emphasis on geography and environment, the text also gives attention to regional issues, moving from the metropolitan areas to the state's rural and desert areas. Lively and readable, The Elusive Eden is organized in ten parts. Each chronological section begins with an in-depth narrative chapter that spotlights an individual or group at a critical moment of historical change, bringing California history to life. Climate change impacts-more heat, drought, extreme rainfall, and stronger storms-have already harmed communities around the globe. Even if the world could cut its carbon emissions to zero tomorrow, further significant global climate change is now inevitable. Although we cannot tell with certainty how much average global temperatures will rise, we do know that the warming we have experienced to date has caused significant losses, and that the failure to prepare for the consequences of further warming may prove to be staggering. Building a Resilient Tomorrow does not dwell on overhyped descriptions of apocalyptic climate scenarios, nor does it travel down well-trodden paths surrounding the politics of reducing carbon emissions. Instead, it starts with two central facts: climate impacts will continue to occur, and we can make changes now to mitigate their effects. While squarely confronting the scale of the risks we face, this pragmatic guide focuses on solutions-some gradual and some more revolutionary-currently being deployed around the globe. Each chapter presents a thematic lesson for decision-makers and engaged citizens to consider, outlining replicable successes and identifying provocative recommendations to strengthen climate resilience. Between animated discussions of ideas as wide-ranging as managed retreat from coastal hot-zones to biological approaches for resurgent climate-related disease threats, Alice Hill and Leonardo Martinez-Diaz draw on their personal experiences as senior officials in the Obama Administration to tell behind-the-scenes stories of what it really takes to advance progress on these issues. The narrative is dotted with tales of on-the-ground citizenry, from small-town mayors and bankers to generals and engineers, who are chipping away at financial disincentives and bureaucratic hurdles to prepare for life on a warmer planet. For readers exhausted by today's paralyzing debates on yearly "fluke" storms or the existence of climate change, Building a Resilient Tomorrow offers better ways to manage the risks in a warming planet, even as we work to limit global temperature rise.
