Since his election in 2013, Pope Francis has tackled many issues of urgent reform within the church. *Mercy in Action* explores Pope Francis's efforts to renew Catholic social teaching—the guidance the church offers on matters that pertain to social justice in the world. The book examines what Pope Francis has said, done, and written on six critical social issues today—economic inequality, worker justice, preserving the environment, healthy family life, the plight of refugees, and peacemaking. The book also highlights both continuity and change in Catholic social teaching. Author Thomas Massaro illustrates how on each social issue—from expressing solidarity with unemployed workers to writing an encyclical addressing environmental degradation and climate change—Pope Francis has worked to update the church's message of social justice and mercy.

"This stimulating collection tackles the question that is uppermost in most of humanity's minds and hearts right now. The novel debating approach that is taken generates a rich understanding of the range of ways in which bad leadership is created, manifested and most importantly, remedied." - Professor Brad Jackson, Waikato Management School, The University of Waikato, New Zealand "In the midst of a world full of incompetent and incoherent leaders this book is exactly what we need: a veritable cornucopia of critical leadership studies." - Keith Grint, Professor Emeritus, Warwick Business School, UK "While we like to have leaders who guide, looking at the present state of the world, there are far too many leaders who misguide. It makes this anthology on bad leadership more than timely. The various contributors, taking many different perspectives, highlight the ways leaders can go astray. In these very difficult times, this book will be a must read for anybody interested in this subject." - Manfred F. R. Kets de Vries, Clinical Professor of Leadership "Debating Bad Leadership, edited by Anders Örténblad, is a book for this time! The rise of populism and the emergence of so-called 'strong' leaders in many countries have created a social, political, and economic climate that begs for closer examination of the origins, characteristics, and forms of, especially, bad leadership. Taking as its starting-point the question of why there are so many bad leaders in the corporate world, the impressive collection of chapters compiled in *Debating Bad Leadership* canvasses a comprehensive array of issues ranging from toxic, psychopathic, leadership and ethical failure to issues of poor selection, ill-considered recruitment, leader (in)competence, conflicted or weak followership, to the very concept of leadership itself. In debating these fundamental issues, this book illuminates and educates, and offers some remedies, both theoretically and practically. *Debating Bad Leadership* challenges scholars, students and practitioners of leadership to continue this fundamental discussion, for the benefit of us all." - Gabriele Lakomski Professor Emeritus, Melbourne Centre for the Study of Higher Education, University of Melbourne, Australia. In this book, leadership experts explore why there are so many bad leaders, and suggest remedies for how the current situation could be improved. Some of the experts suggest that reasons for why bad leaders are so common are searched for in people: more specifically leaders-to-become, acting leaders or followers. Others suggest that reasons are to be found in the leadership role (or expectations on those having such role), in the lack of support for leaders, or in beliefs about leadership. On the backdrop of their suggested explanations as to why there are so many bad leaders, the experts suggest remedies that could be taken to decrease the number of bad leaders as well as their negative impact. The very presumption that this book rests upon also gets its fair share of critique, by some of the experts. Anders Örténblad is Professor of Working Life Science at the University of Agder, Norway. He is the editing founder of the book series *Palgrave Debates in Business and Management*.

The Routledge Handbook of Collective Intentionality provides a wide-ranging survey of topics in a rapidly expanding area of interdisciplinary research. It consists of 36 chapters, written exclusively for this volume, by an international team of experts. What is distinctive about the study of collective intentionality within the broader study of social interactions and structures is its focus on the conceptual and psychological features of joint or shared actions and attitudes, and their implications for the nature of social groups and their functioning. This Handbook fully captures this distinctive nature of the field and how it subsumes the study of collective action, responsibility, reasoning, thought, intention, emotion, phenomenology, decision-making, knowledge, trust, rationality, cooperation, competition, and related issues, as well as how these underpin social practices, organizations, conventions, institutions and social ontology. Like the field, the Handbook is interdisciplinary, drawing on research in philosophy, cognitive science, linguistics, legal theory, anthropology, sociology, computer science, psychology, economics, and political science. Finally, the Handbook promotes several specific goals: (1) it provides an important resource for students and researchers interested in collective intentionality; (2) it integrates work across disciplines and areas of research as it helps to define the shape and scope of an emerging area of research; (3) it advances the study of collective intentionality.

The prospect of international conflict over water has long been the subject of academic and popular concern, but subnational political conflict is considerably more common, and almost certainly imposes greater economic and environmental costs. Indeed, subnational hydrogeopolitics are an important feature of several large countries, including the United States, India, and China. Moreover, disputes between water users in shared river basins have often persisted despite repeated attempts by central governments to resolve them through both persuasion and coercion. Yet despite the growing threat of water scarcity around the world, little research exists on sub-national politics of shared water resources. This book attempts to fill the gap by explaining how and why hydrogeopolitics play out within countries, as well as between them. Subnational Hydrogeopolitics re-examines the issue of water conflict by examining conflicts at the subnational rather than international level. By examining several in-depth case studies of both conflict and cooperation, Scott Moore argues that increasing sub-national water conflict is driven

by two inter-linked forces, identity politics, which gives subnational politicians a reason to compete over shared water resources; and political decentralization, which provides them with the tools to do so. To understand politics at the subnational level, the book blends insights from both the environmental governance and comparative politics literatures. By examining the challenges many countries face in achieving cooperation over shared water resources, the book helps to shed light on different mechanisms and processes for solving cooperation problems at the regional scale lessons relevant to tackling a wide range of transboundary environmental problems, including air pollution, urbanization, and ecosystem protection. But at its core, this book promises a definitive contribution to the growing sub-field of environmental politics, centered on understanding how different countries attempt to solve the problems inherent in governing water resources in shared river basins.

Israel borders four states – Syria, Egypt, Jordan and Lebanon, and two entities – the Palestinian authority in the West Bank and Hamas in the Gaza strip. In recent years, despite incidents on the border with Syria and Egypt, the basic strategic status quo with these countries has not changed, and the overall balance of power between Israel and the Arabs has been maintained. Due to its military might, none of Israel's Arab neighbours are able to defeat it. Israel, however, for political, economic and military reasons, avoids enforcing its will and interfering in internal Arab matters and has successfully managed to stay out of the Arab turmoil. Israel, the Arabs and Iran gives a detailed overview of the various national security challenges that Israel has faced since 2011. It explains the key considerations and constraints Israel has had to deal with on several fronts, from its northern border with Lebanon to its southern border with Egypt. The book provides the reader with a deep understanding of why and how Israel has struggled to keep the status quo, whilst a large part of the Middle East remains in turmoil. The book is aimed at anyone studying Israel, its Foreign Policy, Middle Eastern Politics and International Relations. It will also appeal to government officials, military officers and anyone working or interested in national security issues concerning the Middle East and particularly Israel.

The 2011 general election in the Republic of Ireland, which took place against a backdrop of economic collapse, was one of the most dramatic ever witnessed. The most notable outcome was the collapse of Fianna Fáil, one of the world's most enduring and successful parties. In comparative terms Fianna Fáil's defeat was among the largest experienced by a major party in the history of parliamentary democracy. It went from being the largest party in the state (a position it had held since 1932) to being a bit player in Irish political life. And yet ultimately, there was much that remained the same, perhaps most distinctly of all the fact that no new parties emerged. It was, if anything, a 'conservative revolution'. A Conservative Revolution? examines underlying voter attitudes in the period 2002-11. Drawing on three national election studies the book follows party system evolution and voter behaviour from boom to bust. These data permits an unprecedented insight into a party system and its voters at a time of great change, as the country went through a period of rapid growth to become one of Europe's wealthiest states in the early twenty-first century to economic meltdown in the midst of the international Great Recession, all of this in the space of a single decade. In the process, this study explores many of the well-established norms and conventional wisdoms of Irish electoral behaviour that make it such an interesting case study for comparison with other industrialized democracies.

From the author of *The Sympathizer*, winner of the 2016 Pulitzer Prize for Fiction, *The Refugees* is the second piece of fiction from a powerful voice in American letters, praised as "beautiful and heartrending" (Joyce Carol Oates, *New Yorker*), "terrific" (*Chicago Tribune*), and "an important and incisive book" (*Washington Post*) Published in hardcover to astounding acclaim, *The Refugees* is the remarkable debut collection of short stories by Viet Thanh Nguyen, winner of the 2016 Pulitzer Prize for Fiction for his novel *The Sympathizer*. In these powerful stories, written over a period of twenty years and set in both Vietnam and America, Nguyen paints a vivid portrait of the experiences of people leading lives between two worlds, the adopted homeland and the country of birth. With the same incisiveness as in *The Sympathizer*, in *The Refugees* Viet Thanh Nguyen gives

voice to the hopes and expectations of people making life-changing decisions to leave one country for another, and the rifts in identity, loyalties, romantic relationships, and family that accompany relocation. From a young Vietnamese refugee who suffers profound culture shock when he comes to live with two gay men in San Francisco, to a woman whose husband is suffering from dementia and starts to confuse her for a former lover, to a girl living in Ho Chi Minh City whose older half-sister comes back from America having seemingly accomplished everything she never will, the stories are a captivating testament to the dreams and hardships of migration. The second work of fiction by a major new voice in American letters, *The Refugees* is a beautifully written and sharply observed book about the aspirations of those who leave one country for another, and the relationships and desires for self-fulfillment that define our lives.

Shifting cultivation supports around 200 million people in the Asia-Pacific region alone. It is often regarded as a primitive and inefficient form of agriculture that destroys forests, causes soil erosion and robs lowland areas of water. These misconceptions and their policy implications need to be challenged. Swidden farming could support carbon sequestration and conservation of land, biodiversity and cultural heritage. This comprehensive analysis of past and present policy highlights successes and failures and emphasizes the importance of getting it right for the future. This book is enhanced with supplementary resources. The addendum chapters can be found at:

This book examines controversies surrounding the seizure of the Baathist security files and the discovery of an Iraqi Jewish archive amid the Kurdish uprising and the US-led invasion of Iraq. The author analyzes how the events ignited a fierce struggle for the files, which document Saddam Hussein's vast humanitarian crimes.

This book combines academic wisdom and practitioners' insights to critically examine the challenges faced by civil service systems in the 21st Century. Moreover, the book evaluates what types of civil servants are needed to tackle critical issues such as rapidly ageing populations, increased urbanisation, environmental degradation, swift technological advancement, and globalisation of the market place in the social and economic realm of the 21st Century. Its topics range from civil service development in post-Soviet countries indicating that peer-to-peer learning is the way forward, to civil service reforms in China, Japan, and Korea in their quest to satisfy their citizens demands and expectations in the 21st Century. Other topics span across regional analyses by focusing on current dominant trends and challenges confronting administrative and civil service systems, vis-à-vis technology, innovation and "big data", and their disruptive effects on society and government. This book will be of interest to both academics and practitioners, and would-be builders of the 21st Century world.

The German novelist, poet and critic W. G. Sebald (1944-2001) has in recent years attracted a phenomenal international following for his evocative prose works such as *Die Ausgewanderten* (The Emigrants), *Die Ringe des Saturn* (The Rings of Saturn) and *Austerlitz*, spellbinding elegiac narratives which, through their deliberate blurring of genre boundaries and provocative use of photography, explore questions of Heimat and exile, memory and loss, history and natural history, art and nature. *Saturn's Moons: a W. G. Sebald Handbook* brings together in one volume a wealth of new critical and visual material on Sebald's life and works, covering the many facets and phases of his literary and academic careers -- as teacher, as scholar and critic, as colleague and as collaborator on translation. Lavishly illustrated, the Handbook also contains a number of rediscovered short pieces by W. G. Sebald, hitherto unpublished interviews, a catalogue of his library, and selected poems and tributes, as well as extensive primary and secondary bibliographies, details of audiovisual material and interviews, and a chronology of life and works. Drawing on a range of original sources from Sebald's Nachlass - the most important part of which is now held in the Deutsches Literaturarchiv Marbach - *Saturn's Moons* will be an invaluable sourcebook for future Sebald studies in English and German alike, complementing and augmenting recent critical works on subjects such as history, memory, modernity, reader response and the visual. The contributors include Mark Anderson, Anthea Bell, Ulrich von Buelow, Jo Catling, Michael Hulse, Florian Radvan, Uwe Schuette, Clive Scott, Richard Sheppard, Gordon Turner, Stephen Watts and Luke Williams. Jo Catling teaches in the School of Literature at the University of East Anglia and Richard Hibbitt in the Department of French at the University of Leeds.

Young adults are actively looking for anything that connects them with the changes happening in their lives, and the books discussed throughout *Literature for Young Adults* have the potential to make that connection and motivate them to read. It explores a great variety of works, genres, and formats, but it places special emphasis on contemporary works whose nontraditional themes, protagonists, and literary conventions make them well suited to young adult readers. It also looks at the ways in which contemporary readers access and share the works they're reading, and it shows teachers ways to incorporate nontraditional ways of accessing and sharing books throughout their literature programs. In addition to traditional genre chapters, *Literature for Young Adults* includes chapters on literary nonfiction; poetry, short stories, and drama; cover art, picture books, illustrated literature, and graphic novels; and film. It recognizes that, while films can be used to complement print literature, they are also a literacy format in their own right-and one that

young adults are particularly familiar and comfortable with. The book's discussion of literary language--including traditional elements as well as metafictional terms--enables readers to share in a literary conversation with their students (and others) when communicating about books. It will help readers teach young adults the language they need to articulate their responses to the books they are reading.
