What if the work of social change was abundant? It can be. What if, instead of being exhausted, worn out, disillusioned, and depressed, you were energized and inspired by your important work as a social change leader? What if you were surrounded by endless supporters helping to move your work forward? What if money flowed easily and endlessly to you and your organization? What if the social change you envision happened easily and joyfully? All of this—and more—is within your grasp. In *Reinventing Social Change*, author, speaker, and consultant Nell Edgington offers a bold new roadmap to overcoming the unfair and limiting system in which social change leaders have operated for too long. Through case studies, exercises, and practical tools, she shows you how to reclaim your power, kiss scarcity goodbye, and attract all the money and people necessary to achieve the social change you offer. An invaluable guide for nonprofit leaders, philanthropists, community activists, board members, social entrepreneurs, and government decision-makers alike, *Reinventing Social Change* is a critical roadmap for social change leaders who will lead the reinvention of our broken systems into ones that are stronger, healthier, and more equitable.

Agave dates back to the Aztec civilization as an important crop in Mexico. Since the 1600s, the people of western Mexico have cultivated blue agave from the red volcanic soil that blankets the region, to make what we know as tequila. *The Spirit of Tequila* celebrates the tradition, culture, and myth of this iconic drink. Joel Salcido traveled across the state of Jalisco capturing images of distilleries and artisanal tequileras, including blue agave fields at sunset, the agave's pineapple-like centers (piñas), elegantly shadowed barrel rooms (añejos), and, of course, the agave farmers themselves. Nearly ninety photographs, taken with a medium format camera—some in full-color, some in duotone—reveal not only the tequila making process but also the region's traditions of culture and religion. Haunting and beautiful, a church spire is juxtaposed with a firework celebration in honor of the Virgen de Guadalupe. A Mexican charro rides through the streets of Arandas. Near Atotonilco, a horse pulls a traditional plow through the fields to irrigate. Exploring the rooms and techniques hidden in the distilleries of legendary tequilas Herradura, Sauza, Jose Cuervo, Don Julio, and others, *The Spirit of Tequila* celebrates a craft that is rooted deep in the culture of Mexico.

*Voice Lessons* explores the rich personal and political terrain of Alice Embree, a 1960s activist and convert to the women's liberation movement of the 1970s, bringing a woman's perspective to a transformational time in US history. This riveting memoir traces the author's roots in segregated Austin and her participation in efforts to integrate the University of Texas. It follows her antiwar activism from a vigil in front of President Lyndon Johnson's ranch in 1965 to a massive protest after the shootings at Kent State in 1970. Embree's activism brought her and the Students for a Democratic Society into conflict with Frank Erwin, the powerful chairman of the UT Board of Regents, and inspired a campus free speech movement. She recounts her experiences living in New York during the tumultuous years of 1968 and 1969, including the Columbia University strike and the Woodstock music festival. She also tells about protesting at the Chicago Democratic Convention, her interactions with Yippies and poets, and her travels to Chile, Cuba, and Mexico. Embree highlights the radical roots of the women's liberation movement in Austin and the audacious women's community that challenged gender roles, fought for reproductive justice, and inspired a lifetime of activism.

“The authors look at art and science together to examine how innovations—from Picasso’s initially offensive paintings to Steve Jobs’s startling iPhone—build on what already exists and rely on three brain operations: bending, breaking and blending. This manifesto . . . shows how both disciplines foster creativity.” —The Wall Street Journal

*The Runaway Species* is a deep dive into the creative mind, a celebration of the human spirit, and a vision of how we can improve our future by understanding and embracing our ability to innovate. David Eagleman and Anthony Brandt seek to answer the question: what lies at the heart of humanity’s ability—and drive—to create? Our ability to remake our world is unique among all living things. But where does our creativity come from, how does it work, and how can we harness it to improve our lives, schools, businesses, and institutions? Eagleman and Brandt examine hundreds of examples of human creativity through dramatic storytelling and stunning images in this beautiful, full-color volume. By drawing out what creative acts have in common and viewing them through the lens of cutting-edge neuroscience, they uncover the essential elements of this critical human ability, and encourage a more creative future for all of us. “*The Runaway Species* approach[es] creativity scientifically but sensitively, feeling its roots without pulling them out.” —The Economist

Recipient of three National Endowment for the Arts grants and with works exhibited at the prestigious Biennale de Paris, New York's Whitney Museum, the de Menil Collection in Houston, and other venues, Bob "Daddy-O" Wade started "keeping it weird" in 1961 when he arrived in Austin with his '51 custom Ford hot rod and his slicked-back hair. Primed to study art at the University of Texas, Wade's coif and dragster earned him his trademark moniker, and the abstract, welded sculptures he fashioned from automobile bumpers in his frat house basement laid the foundations for the distinctive, larger-than-life art pieces that would eventually make him famous. Daddy-O is the creator of the forty-foot iguana that perched atop the Lone Star Café in New York City, the immense cowboy boots (entered in the Guinness Book of World Records) outside San Antonio's North Star Mall, and Dinosaur Bob, who graces the roof of the National Center for Children's Illustrated Literature in Abilene, Texas. He is widely recognized as one of the progenitors of the "Cosmic Cowboy Culture" that emerged in Texas during the 1970s. Daddy-O's Book of Big-Ass Art features images of more than a hundred of Wade's most famous pieces, complete with the wild tales that lie behind the art, told in brief essays by both Wade and more than forty noted artists and writers familiar with Wade's work. This book provides a comprehensive description of the screening and clinical applications of digital breast tomosynthesis (DBT) and offers straightforward, clear guidance on use of the technique. Informative clinical cases are presented to illustrate how to take advantage of DBT in clinical practice. The importance of DBT as a diagnostic tool for both screening and diagnosis is increasing rapidly. DBT improves upon mammography by depicting breast tissue on a video clip made of cross-sectional images reconstructed in correspondence with their mammographic planes of acquisition. DBT results in markedly reduced summation of overlapping breast tissue and offers the potential to improve mammographic breast cancer surveillance and diagnosis. This book will be an excellent practical teaching guide for beginners and a useful reference for more experienced radiologists.

The 340B Drug Pricing Program (340B Program) and the Medicaid Drug Rebate Program require manufacturers to provide discounts on outpatient drugs in order to have their drugs covered by Medicaid. These discounts take the form of reduced sales prices for covered entities participating in the 340B Program--eligible hospitals and federal grantees--and rebates on drugs dispensed to Medicaid beneficiaries, shared by states and the federal government. This book looks at important issues pertaining to the 340B Drug Pricing Program.

Hungry for Revolution tells the story of how struggles over food fueled the rise and fall of Chile's Popular Unity coalition and one of Latin America's most expansive social welfare states. Reconstructing ties among workers, consumers, scientists, and the state, Joshua Frens-String explores how Chileans across generations sought to center food security as a right of citizenship. In so doing, he deftly untangles the relationship between two of twentieth-century Chile's most significant political and economic processes: the fight of an emergent urban working class to gain reliable access to nutrient-rich foodstuffs and the state's efforts to modernize its underproducing agricultural countryside.

The U.S. Census Bureau has reported that 56.7 million Americans had some type of disability in 2010, which represents 18.7 percent of the civilian noninstitutionalized population included in the 2010 Survey of Income and Program Participation. The U.S. Social Security Administration (SSA) provides disability benefits through the Social Security Disability Insurance (SSDI) program and the Supplemental Security Income (SSI) program. As of December 2015, approximately 11 million individuals were SSDI beneficiaries, and about 8 million were SSI beneficiaries. SSA currently considers assistive devices in the nonmedical and medical areas of its program guidelines. During determinations of substantial gainful activity and income eligibility for SSI benefits, the reasonable cost of items, devices, or services applicants need to enable them to work with their impairment is subtracted from eligible earnings, even if those items or services are used for

activities of daily living in addition to work. In addition, SSA considers assistive devices in its medical disability determination process and assessment of work capacity. The Promise of Assistive Technology to Enhance Activity and Work Participation provides an analysis of selected assistive products and technologies, including wheeled and seated mobility devices, upper-extremity prostheses, and products and technologies selected by the committee that pertain to hearing and to communication and speech in adults.

In 2016, the University of Texas at Austin celebrated two important milestones: the thirtieth anniversary of the Heman Sweatt Symposium on Civil Rights and the sixtieth anniversary of the first black undergraduate students to enter the university. These historic moments aren't just special; they are relevant to current conversations and experiences on college campuses across the country. The story of integration at UT against the backdrop of the Jim Crow South is complex and momentous—a story that necessitates understanding and sharing. Likewise, this narrative is inextricably linked to current conversations about students' negotiations of identity and place in higher education.

William P. “Will” Hobby Sr. and Oveta Culp Hobby were one of the most influential couples in Texas history. Both were major public figures, with Will serving as governor of Texas and Oveta as the first commander of the Women’s Army Corps and later as the second woman to serve in a presidential cabinet. Together, they built a pioneering media empire centered on the Houston Post and their broadcast properties, and they played a significant role in the transformation of Houston into the fourth largest city in the United States. Don Carleton’s dual biography details their personal and professional relationship—defined by a shared dedication to public service—and the important roles they each played in local, state, and national events throughout the twentieth century. This deeply researched book not only details this historically significant partnership, but also explores the close relationships between the Hobbys and key figures in twentieth-century history, from Texas legends such as LBJ, Sam Rayburn, and Jesse Jones, to national icons, including the Roosevelts, President Eisenhower, and the Rockefellers. Carleton's chronicle reveals the undeniable impact of the Hobbys on journalistic and political history in the United States.

In 1959, advertising illustrator and artist, Andy Warhol, got together with socialite Suzie Frankfurt to produce a limited edition cookbook for New York's beau monde. They called it Wild Raspberries (Ingmar Bergman's Wild Strawberries had just been released) and Warhol produced 19 colour illustrations to accompany their recipes. The camp, humorous and fanciful cookbook provides recipes for dishes including A&P Surprise, Gefilte of Fighting Fish, Seared Roebuck, Baked Hawaii and Roast Igyuana Andalusian among others - that were conceived by Frankfurt and hand-lettered, spelling mistakes and all, by Mrs Warhola - Andy's mother.

The best-selling author of *How Children Succeed* returns with a powerful, mind-changing inquiry into higher education in the United States: Does college still work? Is the system designed just to protect the privileged and leave everyone else behind? Or can a college education today provide real opportunity to young Americans seeking to improve their station in life? *The Years That Matter Most* tells the stories of students trying to find their way, with hope, joy, and frustration, through the application process and into college. Drawing on new research, the book reveals how the landscape of higher education has shifted in recent decades and exposes the hidden truths of how the system works and whom it works for. And it introduces us to the people who really make higher education go: admissions directors trying to balance the class and balance the budget, College Board officials scrambling to defend the SAT in the face of mounting evidence that it favors the wealthy, researchers working to unlock the mysteries of the college-student brain, and educators trying to transform potential dropouts into successful graduates. With insight, humor, and passion, Paul Tough takes readers on a journey from Ivy League seminar rooms to community college welding shops, from giant public flagship universities to tiny experimental storefront colleges. Whether you are facing your own decision about college or simply care about the American promise of social mobility, *The Years That Matter Most* will change the way

you think--not just about higher education, but about the nation itself.

Ohio State students, faculty and staff were photographed by artist and professor Ann Hamilton through a semi-transparent membrane that registers in focus only what immediately touches its surface while rendering more softly the gesture or outline of the body. In these images, touch—something we feel more than we see—is visible. In them, we feel the glance of cloth's fall, the weight of a hand, the press of a cheek, the possibility of recognition in portraits haunted by contact. Standing behind the semi-opaque film, one can hear but can not see, hidden until stepping toward the surface, guided by my voice. Each press of the object, the face, a hand, or cloth touching the membrane is revealed in focus, the shallow depth of field a consequence of the membrane's optical qualities. The images made in this exchange—between a subject that offers self or object and a voice that stands in for the visually absent camera—record an interiority that is perhaps more private, more vulnerable than the self we offer up in the world of a constantly present camera. Following and trusting the voice while having a sense of being hidden makes a space for this vulnerability. Each image is a tactile register of an exchange.

What if you got a call from Lyndon Johnson to be in Washington DC tomorrow to take a trip around the world? If you are twenty-four-year-old broadcast journalist Neal Spelce, you buckle up. A two-week diplomatic dream trip turned into a lifelong rollercoaster ride. Spelce began his career as a part-time journalist in the LBJ family-owned Austin TV station in 1956, which vaulted him into a lifetime of memorable experiences with Johnson and many icons of the twentieth century. From his live reporting during the UT Tower shooting tragedy to his lifelong association with LBJ, Spelce found himself behind the scenes in many of the twentieth century's crucial moments. The Austin-based journalist shares candid moments with LBJ and five other US presidents, including a rare interview with father and son presidents George Bush while the three were cramped together in a small bass boat on a Texas lake. During his lengthy media career, Spelce saw Austin grow from a college town to a thriving city. Along the way he interacted with Texas legends such as Darrell Royal, Willie Nelson, Dan Rather, and more, all part of entertaining stories that he tells, as LBJ liked to say, “with the bark off.”

A best-of collection of literary humour cartoons from the critically-acclaimed Guardian cartoonist In his inimitable style, British cartoonist Tom Gauld has opened comics to a crossover audience and challenged perceptions of what the medium can be. Noted as a “book-lover's cartoonist,” Gauld's weekly strips in *The Guardian*, Britain's most well-regarded newspaper, stitch together the worlds of literary criticism and pop culture to create brilliantly executed, concise comics. Simultaneously silly and serious, Gauld adds an undeniable lightness to traditionally highbrow themes. From sarcastic panels about the health hazards of being a best-selling writer to a list of magical items for fantasy writers (such as the Amulet of Attraction, which summons mainstream acceptance, Hollywood money, and fresh coffee), Gauld's cartoons are timely and droll—his trademark British humour, impeccable timing, and distinctive visual style sets him apart from the rest. Lauded both for his frequent contributions to *New Scientist*, *The Guardian* and *The New York Times*, and his Eisner-nominated graphic novels, Tom Gauld is one of the most celebrated cartoonists working today. In *Baking with Kafka*, he proves this with one witty, sly, ridiculous comic after another.
