John J. Collins's Introduction to the Hebrew Bible> is one of the most reliable and widely adopted critical textbooks at undergraduate and graduate levels alike, and for good reason. Enriched by decades of classroom teaching, it is aimed explicitly at motivated students, regardless of their previous exposure to the Bible or faith commitments. The approach is ecumenical, in the sense that it seeks not to impose any particular theological perspective but to provide information and raise questions that should be relevant to any student. Collins proceeds through the canon of the Old Testament and the Apocrypha, judiciously presenting the current state of historical, archaeological, and literary understanding of the biblical text, and engaging the student in questions of significance and interpretation for the contemporary world. The third edition is presented in a new and engaging format with new maps and images. An index has been added to the volume for the first time.

Mathematics Elsewhere is a fascinating and important contribution to a global view of mathematics. Presenting mathematical ideas of peoples from a variety of small-scale and traditional cultures, it humanizes our view of mathematics and expands our conception of what is mathematical. Through engaging examples of how particular societies structure time, reach decisions about the future, make models and maps, systematize relationships, and create intriguing figures, Marcia Ascher demonstrates that traditional cultures have mathematical ideas that are far more substantial and sophisticated than is generally acknowledged. Malagasy divination rituals, for example, rely on complex algebraic algorithms. And some cultures use calendars far more abstract and elegant than our own. Ascher also shows that certain concepts assumed to be universal--that time is a single progression, for instance, or that equality is a static relationship--are not. The Basque notion of equivalence, for example, is a dynamic and temporal one not adequately captured by the familiar equal sign. Other ideas taken to be the exclusive province of professionally trained Western mathematicians are, in fact, shared by people in many societies. The ideas discussed come from geographically varied cultures, including the Borana and Malagasy of Africa, the Tongans and Marshall Islanders of Oceania, the Tamil of South India, the Basques of Western Europe, and the Balinese and Kodi of Indonesia. This book belongs on the shelves of mathematicians, math students, and math educators, and in the hands of anyone interested in traditional societies or how people think. Illustrating how mathematical ideas play a vital role in diverse human endeavors from navigation to social interaction to religion, it offers--through the vehicle of mathematics--unique cultural encounters to any reader.

An annual favourite, the Canterbury Preacher's Companion provides a total of 150 complete sermons for the coming year, with hymn suggestions. For each Sunday of the year there are two sermons based on the Principal and Second Service lectionaries, plus a section of sermons for special occasions - Mothering Sunday, Harvest, baptism, marriage, funerals - and for all major saints' days.

The twenty-eight essays in this collection showcase cutting-edge research in manuscript studies, encompassing material from late antiquity to the Renaissance. The volume celebrates the exceptional contribution of John Lowden to the study of medieval books.

In recent history, men from a variety of backgrounds have come to the same conclusion: that the Bible is about Israel only. For example: In 1861, John Mason Neale translated an ancient twelfth century Latin hymn and its title was O Come, O Come Emmanuel. Ever since 1861, Christians have sung that hymn at Christmas time, especially at Advent. Do you know what the words really mean that you are singing? In 1878, Edward Hine wrote an article titled, Seven-Eighths of the Bible Misunderstood, wherein he explains that seven-eighths of the Bible is about national salvation, i.e. the national salvation of True Israel; whereas, only one-eighth of the Bible is about personal salvation. Did you know that? In the 1960's, Pastor Sheldon Emry wrote an article title, An Open Letter to Any Minister Who Teaches the Jews Are Israel, wherein he is of the opinion that the Israel that exists today since 1948 is not the True Israel of the Bible. In 1998, Arnold E. Kennedy wrote a book titled, The Exclusiveness of Israel, wherein he legally proves using the King James Version of the Bible that the Bible in general is only about True Israel. So, here we are in the Twenty-First Century, and the Gospel that is preached today is totally convoluted from that which was preached in the First Century A.D. by Yahshuah and His disciples, i.e. the Gospel of the Kingdom. So, where did the so-called churches and pastors go wrong? By the way, is there really a hierarchy in the Bible? In order to find out what the truth really is, we have to look at the original languages in which the Bible was written and then translated. For example, the Old Testament was written in Hebrew and Aramaic, then translated into Greek. The New Testament was written in Hebrew and Greek. Both Testaments were put together and translated into Latin, then German, and finally into English, from which the entire world received their own translation of the Bible. So, what was the original meaning of the words used in the original languages, i.e. the etymology of the words. Once that is determined, then we can go onto the next phase and discuss types in the Bible. From there, what is

the Law of First Mention? How should Bible prophecy be Interpreted? Who are the keys to Bible prophecy? Where are we in the Bible prophecy timeline? During these discussions, we will find out who Yahweh chose of all the families of the earth to make His own. The churches teach universalism. The question then becomes, Who was Yahweh's Law given to? What are the Laws of Yahweh? And then the even bigger question becomes, Who was Yahshuah sent to? All of these questions and more will be answered as you read this book...

Our most basic relationship with the world is one of technological mediation. Nowadays our available tools are digital, and increasingly what counts in economic, social, and cultural life is what can be digitally stored, distributed, replayed, augmented, and switched. Yet the digital remains very much materially configured, and though it now permeates nearly all human life it has not eclipsed all older technologies. This Handbook is grounded in an understanding that our technologically mediated condition is a condition of organization. It maps and theorizes the largely uncharted territory of media, technology, and organization studies. Written by scholars of organization and theorists of media and technology, the chapters focus on specific, and specifically mediating, objects that shape the practices, processes, and effects of organization. It is in this spirit that each chapter focuses on a specific technological object, such as the Battery, Clock, High Heels, Container, or Smartphone, asking the question, how does this object or process organize? In staying with the object the chapters remain committed to the everyday, empirical world, rather than being confined to established disciplinary concerns and theoretical developments. As the first sustained and systematic interrogation of the relation between technologies, media, and organization, this Handbook consolidates, deepens, and further develops the empirics and concepts required to make sense of the material forces of organization.

Will Israel and the U.S. be destroyed or partially destroyed in 2012-2019 or 2026-2030 and beyond and Muslims, Catholics and communism take over most of the world? Were there strange things going around the sun, the moon changing degrees and phases, stars that aren't where there suppose to be and the magnetic poles changing mostly reported secretly in 2001-2011? Did NASA or scientists and astronomers brush the pictures of them away so not to scare people? Did the Bible Code predict strange behavior of the moon in 2011? Will a great tidal wave hit the U.S. East Coast in 2012-2019 and Yellowstone Park super volcano erupt or a comet or asteroid hits the earth or Ocean in 2026-2030 and utterly destroy the entire United States if it still around after the war of 2012-2019? Will the Muslims, communism and Catholics persecute Christians, Americans and Jews all over the world bringing them before Kings and have them sent to prisons and torture and killed if they don't deny Christ and convert to Islam? Will Muslims and people all over the world begin to mock and scoff at Christians and the Bible because Israel and the U.S. are destroyed and no Rapture or end or Second Coming of Christ happened? Several of the Bible prophecies predict God will not make a full end of the U.S., Israel and the world at this time and pockets of people and nations may or may not survive. God may save the U.S., Israel and the world if the people repent and turn from their sins and begin to humble themselves and heed the harbingers. But if they don't then these events may start to happen. This book was written by June 12, 2012.

"More than 60 years ago," remembered Mr. Stvarnik, "I read the books From Ancient Philosophy to Modern Science of Atoms by prof. dr. Ivan Supek, and the Images from the Lives of Great Scientists by prof. dr. Milutin Milankovic, and for me these are still the most beautiful scientific texts." From that time, as a much loving hobby, Mr. Stvarnik has studied biographies of great scientists. "I have grown up in an atheistic country," he once said, "and therefore it was a surprise to find that there were very few atheistic or agnostic scientists; the majority of them were some kind of believers in God. Actually, a good number of the greatest scientific minds were or are Bible-believing Christians." That realization, along with discoveries of some deliberate distortions of historical facts that made certain Bible-believing scientists look as having an atheistic bent, prompted writing a book The Portraits of the Great Bible-believing Scientists that was published in Croatian and in Serbian languages. Now he has written the same in English, but since many years elapsed from the mentioned publications, he enriched the text with new findings and added 12 new portraits into the book.

Ancient calendars found around the world are designed to end one point in time. They communicate an urgent warning to everyone alive

today! Complex bronze and gold clocks with multiple dials are found in museums around the world. Why they have such advanced intricacy has stumped scientists for hundreds of years. This book reveals why the ancients built so many pyramids, observatories as well as those complex gold and bronze clocks with more than one dial. It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012. It amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time, history and prophecy, which is history written in advance. The most famous example is the Mayan-Aztec calendar, which ends its 25,626-year cycle on that momentous date. Some researchers have also found 21 December 2012 in what is called, the Bible Code. Using very different research methods, I discovered it in the Bible's book of Revelation and Daniel's prophecies. It is one of the most important dates in the plan of God for all humanity!

The Bible predicts the future, but scholars widely disagree on what the Bible says! How can the average person sort out fact from fiction? Daniel 12:10 boldly states that the wise will understand prophetic chronology in the last days. Have those days already begun? Retired hi-tech inventor and author Herbert R. Stollorz discovered that the dates of many key events predicted in the books of Daniel and Revelation fall between the years 2008 and 2018. Two of the keys that unlocked this mystery are the Hebrew Alphabet Number System and the Jewish feast and fast days. One of those fast days, Tammuz 17, commemorates the fall of Jerusalem prior to the destruction of God's Temple in that ancient city.

This easy-to-read biblical reference highlights times before, during, and after God's revelations became written words. Judith Marie Judy draws readers in by sharing her own recollections as she relates to biblical times and events of long ago. Her personal thoughts, at the beginning of each chapter and elsewhere in the book, are in italicized print. Key topics include ancient civilizations, the Hebrew Bible, Jewish revolts against Rome, the Roman world of Jesus, the New Testament, and related interests beyond the Bible. The book concludes with a brief review of current countries linked to the Holy Land. A glossary defines key terms and timelines present dates in a precise format. Maps provide readers a physical location of key places referenced in the Bible. Lastly, an index helps in locating specific subjects. The intent of the book is not to prove or persuade others of any religious or spiritual matters but to unravel the somewhat bewildering and overwhelming information of the Bible.

In Apocalyptic Thinking leading experts critically engage with John Collins' seminal study The Apocalyptic Imagination and advance the debate on ancient Jewish apocalyptic with articles on current topics with a special focus on the Dead Sea Scrolls.

Lesser Feasts and Fasts has not been updated since 2006. This new edition, adopted at the 79th General Convention (resolution A065), fills that need. Biographies and collects associated with those included within the volume have been updated; a deliberate effort has been made to more closely balance the men and women represented within its pages.

In this important collection of essays James A. Sanders offers his most significant work on the text and canon of the Hebrew Bible, along with his seminal studies of the Qumran Scrolls. He has been at the forefront of the study of canon formation, history of interpretation, and textual criticism, with specialty in the Dead Sea Scrolls and the use of the Old Testament in the New. These studies document the variety of textual traditions, as well as the diversity and unsettled, incipient state of the collection of sacred literature that was regarded as authoritative or canonical in the late Second Temple period. They laid the foundation on which today's scholarly discussion is focused.

A CHRISTIAN PLANNER AND BIBLE STUDY JOURNAL ALL IN ONE - The 7 Goal Planner is based on powerful principles from the Bible that show us how to identify God's priorities for our life, how to integrate them with our daily schedule, and how to maintain a constant focus that leads us to accomplishing our goals.
