

currency, payments crises, bankrupt banks, economic stagnation, loss of public confidence. After centuries of ruinous experiences, some governments learnt, others haven't, to control themselves, create self-governing Central banks and let them manage money and regulate banks. Sometime in 2015, news of unsustainable bad debts (non-performing assets or NPAs) in the Indian banking sector started to first trickle out, and then became a flood. In the forefront were some of India's largest government banks, and a series of tycoons who were running their empires on unpaid debts. The banks' problems landed on the table of Urjit Patel when he became Governor of Reserve Bank of India in September 2016. Based on thirty years of macroeconomic experience, he worked out the '9R' strategy which would save our savings, rescue our banks and protect them from unscrupulous racketeers. In this book, he explains the problem and how it blew up; and how he would have resolved it if he had not been prevented.

In *The Book of Women: A Celebration of Women and the Female Spirit*, one of the twentieth century's greatest spiritual teachers discusses the importance and value of feminine strengths. "The woman should search into her own soul for her own potential and develop it, and she will have a beautiful future."—Osho Osho explores the role of women in our society. Up until now, he says, both religious institutions and politics have remained male-dominated—not only male-dominated but male-chauvinistic. This has created so many of the crises that we see in the world now, brought about by excesses of ambition, competitiveness, and greed. In these pages, Osho challenges readers to reclaim and assert the feminine qualities of love, joy, and celebration to bring a reunion of the intellect and the heart that is so desperately needed. He looks to the female spirit in all of us as a way to nurture the soul and cultivate a healthy relationship with spirituality. Osho challenges readers to examine and break free of the conditioned belief systems and prejudices that limit their capacity to enjoy life in all its richness. He has been described by the *Sunday Times* of London as one of the "1000 Makers of the 20th Century" and by *Sunday Mid-Day*(India) as one of the ten people—along with Gandhi, Nehru, and Buddha—who have changed the destiny of India. Since his death in 1990, the influence of his teachings continues to expand, reaching seekers of all ages in virtually every country of the world.

The *Lal Kitab*, a rare book in urdu, was popular in north-west India, Pakistan, Iran and many other countries. This English version has added new dimensions to make it more lucid and easier to understand.

Differential equations find its applications in all fields of science and engineering because it can describe the modeling of nearly all systems involving rate of change. Due to this fact, it has widespread use in physics, engineering, economics, social science and also in biology. Many systems involving differential equations are so complex, or the systems they describe are so large, that a purely mathematical analysis is not possible and it provides only the existence of the solution, therefore, we have to seek the approximate solution by means of the numerical methods. Hence in these types of complex systems, the computer simulations and numerical approximations are useful. The techniques for solving differential equations based on numerical approximations can nowadays be used to handle the complex systems of differential equations on a common PC. This is the first book in which the numerical solution procedures of six important methods are given for all three types of boundary conditions with programs in C. "I have seen letters shredding people to bits, and silences feeding thunderous war cries So, you see I do not know what heals, and what scathes, what saves, and what breaks" Through a myriad of sensational imageries, Abhiviyakti Singh takes us through the deeper ends of loss and abandonment. Her style is subtle, hard-hitting, and rhythmically melts into the tones of performance poetry. Cobalt talks about ruins and salvation in the milieu of an urban hubbub, extending a nostalgic nod to rural sentiments. It strikes a chord with astounding simplicity and earnestly celebrates the dawn of emotional redemption.

Parashari Jaimini and Tajik are the three most popular systems of Vedic Astrology. Parashar gives more importance to the planets while Jaimini considers the rashis to be more important. Tajik is mainly used in Prashna Shastra and in Varshaphal. Tajik diverts slightly always from the main stream of the traditional methods and employs newer techniques of Astrology. 'Tajik Neelakanthi', of Acharya Neelakantha, which was composed in the 16th century AD, is the base of Taik Jyotish. This does not mean that Varshaphal and Prashna techniques were not practised in vedic Astrology before this. 'Uttar Kalamrit' of Kalidas mentions and describes the computation of Varshaphal dasha which is different from the 'Mudda dasha' of Varshaphal. Apart from this, 'Shat Panchashikha' of Prithyushyas is the established classic of Prashna Shastra, which was composed centuries before 'Tajik Neelakanthi'. Ancient Kairaleeya Jyotish is also well known for considering Prashna to be their main technique. The influence of Greek and Arab culture is clearly seen on the word 'Tajik'. Arrival of the invaders from Western Asia initiated the exchange of culture between India and West Asia. This exchange introduced some newer techniques to our Vedic Astrology. One of these techniques was Tajik. This has been marked as the beginning of Tajik jyotish. Tajik word does not belong to Sanskrit. There are different opinions regarding this issue. Some scholars consider it to be a distorted form of the word 'Jatak'. Another view is that meaning of Tajik is a horse in Turkish and Persian language. The speed of this technique has been compared to that of a horse and for this reason it has been named Tajik. In any case the influence of Mohammedans on this knowledge is very clear. This is also confirmed by the other words of Tajik, namely mudda, muntha, saham and the names of the Tajik yogas like Ithasal, Ikkabal, Ishraf, nakta, radda and khallasar etc. Moving at the average speed of 1° per day, Sun completes one round of the Zodiac in one year. For casting the annual horoscope we select the time when Sun reaches the longitude of the natal Sun. The horoscope cast for that date and time becomes the annual horoscope and the Varshaphal is decided on the basis of this horoscope. In a similar manner prediction for any year of the person's life can be given on the basis of the annual horoscope. In other words the annual horoscope is based on the longitude of the natal Sun and not on the date and time of birth. This also means that the date, day and time of the annual horoscope is generally different from that of the birth horoscope.

know it, is but one of eight branches of the body of knowledge that is yoga. In fact, yoga is a sophisticated system of self-empowerment that is capable of harnessing and activating inner energies in such a way that your body and mind function at their optimal capacity.
