The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.

This is the world's most comprehensive, well documented, and well illustrated book on this subject. With extensive subject and geographical index. 91 photographs and illustrations - mostly color, Free of charge.

Caldecott Honor-winning team Steve Jenkins and Robin Page explore the astonishing lives of sharks in this brilliantly illustrated picture book. Perfect for Shark Week and all year round, this ode to the notorious ocean predator with more than four hundred species will blow you out of the water! Sharp teeth, super senses, and those infamous fins—what's not to love about sharks?

Caldecott Honor-winning team Steve Jenkins and Robin Page explore one of the world's most notorious—and fearsome—animals. Learn what makes a shark a shark, what sharks like to eat, and how these predators of the deep have evolved. Ever wonder which shark is the smallest? Or the fastest? Even the most deadly? You'll find your answers in The Shark Book, with countless others. In this magnificently illustrated picture book, celebrate one of the worlds oldest species that has continued to capture our imaginations and astonish us for thousands of years.

Used by physicians, pharmacists, nurses, physician assistants, dentists and medical transcriptionist, the Tarascon Pocket Pharmacopoeia® 2019 Deluxe Lab-Coat Edition continues its tradition as the leading portable drug reference packed with vital drug information to help clinicians at point of care.

Help students build content area literacy through interactive notetaking! This resource provides creative strategies for developing students' interactive notetaking skills across the content areas. Lessons focus on topics including partner work, vocabulary, comprehension, and summarizing to engage students in critical thinking and analysis. This grade-range-specific resource differentiates instruction to support the needs of students at each grade level. Aligned to standards, this essential classroom resource will allow students to practice effective learning strategies, increasing retention and achievement in mathematics, language arts, social studies, and science.

2018 - 2019Tropical Amazing Paradise Beach. 2 - Years Pocket Planner. Lettering Journal (Monthly Calendar 2018 - 2019)

A comprehensive resource describing innovative technologies and digital health tools that can revolutionize the delivery of health care in low- to middle-income countries, particularly in remote rural impoverished communities Revolutionizing Tropical Medicine offers an up-to-date guide for healthcare and other professionals working in low-resource countries where access to health care facilities for diagnosis and treatment is challenging. Rather than suggesting the expensive solution of building new bricks and mortar clinics and hospitals and increasing the number of doctors and nurses in these deprived areas, the authors propose a complete change of mindset. They outline a number of ideas for improving healthcare including rapid diagnostic testing for infectious and non-infectious diseases at a point-of-care facility, together with low cost portable imaging devices. In addition, the authors recommend a change in the way in which health care is delivered. This approach requires task-shifting within the healthcare provision system so that nurses, laboratory technicians, pharmacists and others are trained in the newly available technologies, thus enabling faster and more appropriate triage for people requiring medical treatment. This text: Describes the current burden of communicable and non-communicable diseases in low- to middle-income countries throughout the world

Describes the major advances in healthcare outcomes in low-to middle-income countries derived from implementation of the United Nations/World Health Organisation's 2000 Millennium Development Goals Provides a review of inexpensive rapid diagnostic point-of-care tests for infectious diseases in low-resource countries, particularly for people living in remote rural areas Provides a review of other rapid point-of-care services for assessing hematological function, biochemical function, renal function, hepatic function and status including hepatitis, acid-base balance, sickle cell disease, severe acute malnutrition and spirometry Explores the use of low-cost portable imaging devices for use in remote rural areas including a novel method of examining the optic fundus using a smartphone and the extensive value of portable ultrasound scanning when x-ray facilities are not available Describes the use of telemedicine in the clinical management of both children and adults in remote rural settings Looks to the future of clinical management in remote impoverished rural settings using nucleic acid identification of pathogens, the use of nanoparticles for water purification, the use of drones, the use of pulse oximetry and the use of near-infrared spectroscopy Finally, it assesses the potential for future healthcare improvement in impoverished areas and how the United Nations/World Health Organization 2015 Sustainable Development Goals are approaching this. Written for physicians, infectious disease specialists, pathologists, radiologists, nurses, pharmacists and other health care workers, as well as government healthcare managers, *Revolutionizing Tropical Medicine* is a new up-to-date essential and realistic guide to treating and diagnosing patients in low-resource tropical countries based on new technologies.

The flagship volume in the popular Pocket Notebook series, *Pocket Medicine, 7th Edition*, is a must-have resource for fast answers to diagnostic questions you'll face on rounds and exams. It provides up-to-date, dependable guidance on the internal medicine information needed to make an accurate diagnosis and develop a treatment plan. Compiled by residents and attending physicians at Massachusetts General Hospital, this best-selling reference ensures that quick access to key clinical information and solutions to common problems in internal medicine is as close as your pocket!

Sub-Saharan Africa is facing an unprecedented health and economic crisis that threatens to throw the region off its stride, reversing the encouraging development progress of recent years. Furthermore, by exacting a heavy human toll, upending livelihoods, and damaging business and government balance sheets, the crisis threatens to retard the region's growth prospects in the years to come. Previous crises tended to impact affect countries in the region differentially, but no country will be spared this time.

WHO has published a global TB report every year since 1997. The main aim of the report is to provide a comprehensive and up-to-date assessment of the TB epidemic, and of progress in prevention, diagnosis and treatment of the disease at global, regional and country levels. This is done in the context of recommended global TB strategies and targets endorsed by WHO's Member States and broader development goals set by the United Nations (UN). The 2018 edition of the global TB report was released on 18 September, in the lead up to the first-ever UN High Level Meeting on TB on 26 September 2018.

The fifth edition includes• for the first time, stunning color photographs throughout• chapters rearranged and grouped to best reflect phylogenetic relationships, with updated numbers of genera and species for each family• updated mammalian structural and functional adaptations, as well as ordinal fossil histories• recent advances in mammalian phylogeny, biogeography, social behavior, and ecology, with 12 new or revised cladograms reflecting current research findings• new breakout boxes on novel or unique aspects of mammals; new work on female post-copulatory mate choice, cooperative behaviors, group defense, and the role of the vomeronasal system• discussions of the current implications of climate change and other anthropogenic factors for mammalsMaintaining the accessible, readable style for which Feldhamer and his coauthors are well known, this new edition of *Mammalogy* is the authoritative textbook on this amazingly diverse class of vertebrates.

Used by physicians, pharmacists, nurses, physician assistants, dentists and medical transcriptionist, the *Tarascon Pocket Pharmacopoeia*® 2018 Deluxe Lab-Coat Edition continues its tradition as the leading portable drug reference packed with vital drug information to help clinicians at point of care.

Global health is at a crossroads. The 2030 Agenda for Sustainable Development has come with ambitious targets for health and health services worldwide. To reach these targets, many more billions of dollars need to be spent on health. However, development assistance for health has plateaued and domestic funding on health in most countries is growing at rates too low to close the financing gap. National and international decision-makers face tough choices about how scarce health care resources should be spent. Should additional funds be spent on primary prevention of stroke, treating childhood cancer, or expanding treatment for HIV/AIDS? Should health coverage decisions take into account the effects of illness on productivity, household finances, and children's educational attainment, or just focus on health outcomes? Does age matter for priority setting or should it be ignored? Are health gains far in the future less important than gains in the present? Should higher priority be given to people who are sicker or poorer? *Global Health Priority-Setting* provides a framework for how to think about evidence-based priority-setting in health. Over 18 chapters, ethicists, philosophers, economists, policy-makers, and clinicians from around the world assess the state of current practice in national and global priority setting, describe new tools and methodologies to address establishing global health priorities, and tackle the most important ethical questions that decision-makers must consider in allocating health resources.

Most tax rates have been reduced. The 2018 tax rates are 10%, 12%, 22%, 24%, 32%, 35%, and 37%. Standard deduction amount increased. For 2018, the standard deduction amount has been increased for all filers. The amounts are: ? Single or Married filing separately?\$ 12,000. ? Married filing jointly or Qualifying widow(er)?\$24,000. ? Head of household?\$18,000. See chapter 21. Personal exemption suspended. For 2018, you can't claim a personal exemption for yourself, your spouse, or your dependents. See chapter 3. Increased child tax credit and additional child tax credit. For 2018, the maximum child tax credit has increased to \$2,000 per qualifying child, of which \$1,400 can be claimed for the additional child tax credit. In addition, the modified adjusted gross income threshold at which the credit begins to phase out has increased to \$200,000 (\$400,000 if married filing jointly). See chapter 33.

This book provides a contemporary overview of the social-ecological and economic vulnerabilities that produce food and nutrition insecurity in various small island contexts, including both high islands and atolls, from the Pacific to the Caribbean. It examines the historical and contemporary circumstances that have accompanied the shift from subsistence production to the consumption of imported, processed foods and drinks, and the impact of this transition on nutrition and the rise of non-communicable diseases. It also assesses the challenges involved in reversing this trend, and how more

effective social and economic policies, agricultural and fisheries strategies, and governance arrangements could promote more resilient and sustainable small island food systems. It offers both theoretical and practical perspectives, and brings together a broad range of policy areas, e.g. agriculture, food, commerce, health, planning and socio-economic policy. Given its scope, the book offers a valuable resource for a range of disciplines in a number of regional contexts, and for the growing number of scholars and practitioners working on and in small island states. It will be of particular value as the first book to examine the diversity and commonalities of island states around the globe as they confront issues of food security.

Berlitz Pocket Guides: iconic style, a bestselling brand, this is the quintessential pocket-sized travel guide to the French Riviera, and now comes with a bi-lingual dictionary Plan your trip, plan perfect days and discover how to get around - this pocket-sized guide with new bi-lingual dictionary is a convenient, quick-reference companion to discovering what to do and see in the French Riviera, from top attractions like Cannes, Monaco, Monte Carlo and Vieux Nice, to hidden gems, including Grasse's perfume factories and the canals of Port-Grimaud. You can check all design by click link creative planner above under the book title name. The monthly spreads come with notes and address book sections which helps you manage your day with the most comfortable. It's also for lovely gift for anyone. Use it and you will loves it.

The global loss of biodiversity is occurring at an unprecedented pace. Despite the considerable effort devoted to conservation science and management, we still lack even the most basic data on the distribution and density of the majority of plant and animal species, which in turn hampers our efforts to study changes over time. In addition, we often lack behavioural data from the very animals most influenced by environmental changes; this is largely due to the financial and logistical limitations associated with gathering scientific data on species that are cryptic, widely distributed, range over large areas, or negatively influenced by human presence. To overcome these limitations, conservationists are increasingly employing technology to facilitate such data collection. Innovative solutions have been driven by dramatic advances in the conservation-technology interface. The use of camera traps, acoustic sensors, satellite data, drones, and computer algorithms to analyse the large datasets collected are all becoming increasingly widespread. Although specialist books are available on some of these individual technologies, this is the first comprehensive text to describe the breadth of available technology for conservation and to evaluate its varied applications, bringing together a team of international experts using a diverse range of approaches. Conservation Technology is suitable for graduate level students, professional researchers, practitioners and field managers in the fields of ecology and conservation biology. In keeping with the previous edition - which was independently rated as the best global health book for undergraduates - Global Health 101, Fourth Edition is a clear, concise, and user-friendly introduction to the most critical issues in global health, illustrating key themes with an extensive set of case studies, examples, and the latest evidence. Drawing from his 40 years of experience working in international development and global health, as well as extensively teaching at both Yale and George Washington University, Richard Skolnik has substantially revised his bestselling textbook. This edition offers a significant amount of new and updated information, while maintaining the clarity, simplicity, and ease of use that has made this text so popular. Global Health 101, Fourth Edition builds in unique ways on evidence from a number of fundamental sources, including the Global Burden of Disease Studies, Disease Control Priorities, Third Edition, (DCP3), and Millions Saved.

Ideal itineraries and top travel tips in a pocket-sized package. Plan your trip, plan perfect days and discover how to get around - this Insight Guides pocket-sized book is a convenient, quick-reference companion to discovering what to do and see in the French Riviera, from top attractions like Fondation Maeght, to hidden gems, including Domaine du Rosaire. - Compact, concise, and packed with essential information about Where to Go and What Do, this is an ideal on-the-move companion when you're exploring the French Riviera - Covers Top Ten Attractions, including Vieux Nice, Cannes and Monaco and Perfect Day itinerary suggestions - Offers an insightful overview of landscape, history and culture - Contains an invaluable pull-out map, and essential practical information on everything from Eating Out to Getting Around - Sharp design and colour-coded sections make for an engaging reading experience About Insight Guides: Insight Guides is a pioneer of full-colour guide books, with almost 50 years' experience of publishing high-quality, visual travel guides with user-friendly, modern design. Learn the essentials of tropical fish with this useful and portable reference book. The tremendous abundance of fish seen during a single scuba dive or snorkeling session in the tropics is just staggering. Indeed in some areas there are dozens of species

inhabiting only one or two hectares of reef. But whether you get underwater, view marine life from the comfort of a glass-bottomed boat or just visit an aquarium, Handy Pocket Guide to Tropical Coral Reef Fishes provides an excellent introduction to 68 of the most commonly encountered tropical reef fishes. Written by Dr. Gerald Allen, international authority on reef fishes, it features stunning color shots by some of the world's best underwater photographers. Periplus Handy Pocket Guides are practical field guides, useful for identifying various natural objects ranging from plants and animals to gemstones and seashells. Each page of each title throughout the series is filled with clear, precise photographs and informative text. Scientific and local language names are given.

This book covers all aspects of Neglected Tropical Diseases in the region of South Asia. NTDs constitute a significant part of the total disease burden in this geographic area, including soil borne helminth infections, vector borne viral infections, protozoan infections and a few bacterial infections. The current volume covers the most common neglected viral, bacterial and protozoan infections. On top of that, the last part of the volume is dedicated to the management of neglected tropical diseases.

Berlitz Pocket Guides Stockholm: iconic style, a bestselling brand, this is the quintessential pocket-sized travel guide to Stockholm Compact, concise, and packed with essential information, this is an iconic on-the-move companion when you're exploring Stockholm Covers Top Ten Attractions, including Drottningholm Palace, Vasamuseet and Millesgården and Perfect Day itinerary suggestions Includes an insightful overview of landscape, history and culture Handy colour maps on the inside cover flaps will help you find your way around Essential practical information on everything from Eating Out to Getting Around Inspirational colour photography throughout Sharp design and colour-coded sections make for an engaging reading experience About Berlitz: Berlitz draws on years of travel and language expertise to bring you a wide range of travel and language products, including travel guides, maps, phrase books, language-learning courses, dictionaries and kids' language products.

First flown in 1969, Concorde was the first supersonic aircraft to go into commercial service in 1976 and made her final flight in 2003. She was operated primarily by British Airways and Air France. British Airways' Concorde made just under 50,000 flights and flew more than 2.5m passengers supersonically. A typical London to New York crossing would take a little less than three and a half hours compared to around eight hours for a 'subsonic flight'. In November 1986 a Concorde flew around the world, covering 28,238 miles in 29 hours, 59 minutes. Today, Concorde can be viewed at museums across the UK and in France, including at IWM Duxford, Brooklands and Fleet Air Arm Museum, as well as at Heathrow, Manchester and Paris-Orly airports. However, there have been recent reports suggest that a Concorde may start operating commercially again. Through a series of key documents the book tells the story of how the aircraft was designed and developed as well as ground-breaking moments in her commercial history.

This meeting, held in Berlin, Germany, on 18-27 September 2018, reviewed pesticide use patterns and good agricultural practices, data on the chemistry and composition of the pesticides, and methods of analysis for pesticide residues and recommended maximum residue levels. The report also contains information on acceptable daily intakes and acute reference doses of pesticides for humans, and general principles for the evaluation of pesticides. The recommendations of the joint FAO and WHO meeting, including further research and information, are proposed for use by Member governments of the respective agencies and other interested parties. The meeting was held in pursuance of recommendations, made by previous meetings and accepted by the governing bodies of FAO and WHO, that studies should be undertaken jointly by experts to evaluate possible hazards to humans arising from the occurrence of pesticide residues in foods.

The Pocket Guide to Mycological Diagnosis provides useful and concise information for microbiologists and professionals diagnosing the most medically relevant fungal species. Cellular and molecular techniques, immunological methods, and more accurate microscopy equipment available in most mycology laboratories now make diagnosis more routine. Furthermore, information regarding medical mycology, including identification of specific fungal pathogens, is widely available. This book helps mycologists address the emerging challenges of diagnosis. Key Features Succinct summary of fungal disease diagnosis Includes opportunistic fungal infections that can afflict immunocompromised patients Permits the identification of common fungal pathogens Reviews antifungal drugs Related Titles Ghannoum, M. A. & John R. Perfect, eds. Antifungal Therapy, 2nd ed. (ISBN 978-1-4987-6814-6) Miyaji, M., ed. Animal Models in Medical Mycology (ISBN 978-1-3158-9059-3) Razzaghi-Abyaneh, M., M. -Sharp design and colour-coded sections make for an engaging reading experience About Berlitz: Berlitz draws on years of travel and language expertise to bring you a wide range of travel and language products, including travel guides, maps, phrase books, language-learning courses, dictionaries and kids' language products.

This volume provides a unique collection of contributions addressing both the 'too much' and 'too little' sides of the nitrogen story. Building on analyses started at the 6th International Nitrogen Conference, Kampala, the book explores the idea of 'just enough nitrogen': sufficient for sustainable food production, but not so much as to lead to unsustainable pollution and climate problems. The range of nitrogen threats examined, solutions evaluated and science-policy analyses presented here has provided the foundation to agree the 'Kampala Statement-for-Action on Nitrogen in Africa and Globally,' as reported in this volume. Humanity today faces unprecedented challenges: How to feed a growing population? How to reduce air pollution, water pollution and climate change? How to handle regional differences in an era of increasing globalization? These questions are at the heart of this edited volume which examines the multi-dimensional nature of the global nitrogen challenge. While humans have massively altered the nitrogen cycle, the consequences have become polarized. Some regions have too much nitrogen, associated with pollution and wasteful use of a valuable resource, while other regions have too little nitrogen, leading to constraints on food production and depletion of soil nutrient stocks. The volume provides a unique collection of contributions addressing both the 'too much' and 'too little' sides of the nitrogen story. Building on analyses started at the 6th International Nitrogen Conference, Kampala, the book explores the idea of 'just enough nitrogen': sufficient for sustainable food production, but not so much as to lead to unsustainable pollution and climate problems. The range of nitrogen threats examined, solutions evaluated and science-policy analyses presented here has provided the foundation to agree the 'Kampala Statement-for-Action on Nitrogen in Africa and Globally,' as reported in this volume. Together, the contributions in this book are now informing actions by the International Nitrogen Initiative (INI) in working with the United Nations Environment Programme and others to establish the International Nitrogen Management System (INMS). A key outcome has been to catalyse development of the first Resolution on Sustainable Nitrogen Management, as adopted by the fourth UN Environment Assembly (UNEA/EA.4/Res.14). The work is written for researchers and policy makers and all those interested in seeing how sustainable nitrogen management can contribute to meeting many of the UN Sustainable Development Goals.

This book presents contributions from leading international experts in the field of nephrology. Each chapter is independent and discusses nephrology in the author's country, including the history of nephrology development, kidney disease epidemiology, clinical nephrology, dialysis practice in acute and chronic renal failure settings (hemodialysis, hemodiafiltration, peritoneal dialysis), pediatric nephrology, and kidney transplantation. In addition, the book covers topics such as the job market for nephrologists, reimbursement, nephrology education, and the number of professionals in the private and public sectors. With 53 chapters and more than 300 authors from all continents offering a unique perspective on nephrology practice, it provides a much-needed information source for nephrologists around the globe. The reader will be able to travel through "Nephrology Worldwide", a pleasant reading experience with not only relevant information and updated data, but also a comprehensive look at the history, countries' peculiarities, and a critical analysis of the scenario of nephrology and renal replacement therapy. A valuable resource for healthcare professionals and other stakeholders interested in learning about the status quo of Nephrology Worldwide. "Both the failings and the successes are outlined in a way that should make this book a compelling read, not just for the well-informed renal physician, but also for planners and policy makers whose thinking and actions are integral to the way we practice medicine." - Sir Peter J. Ratcliffe, Nephrologist and 2019 Nobel Prize Winner More information on the Nephrology Worldwide initiative can be found at www.nephrologyworldwide.com.

Medicinal Chemistry of Neglected and Tropical Diseases: Advances in the Design and Synthesis of Antimicrobial Agents consolidates and describes modern drug discovery and development approaches currently employed to identify effective chemotherapeutic agents for the treatment of Neglected Tropical Diseases (NTDs) from a medicinal chemistry perspective. Chapters are designed to cater to the needs of medicinal chemists who work with chemotherapeutic developments for NTDs, as well as serve as a guide to budding medicinal chemists who wish to work in this area. It will introduce rational drug design approaches adopted in designing chemotherapeutics and validated targets available for the purpose.
