A courageous look at a historic figure. From Oscar®-winner Oliver Stone, Snowden is a riveting personal look at one of the most polarizing figures of the twenty-first century, the man responsible for what has been described as the most far-reaching security breach in US intelligence history. This official motion picture screenplay edition, written by Kieran Fitzgerald and Oliver Stone, includes a foreword by David Talbot and dozens of photos from the film. In 2013, Edward Snowden (Joseph Gordon-Levitt) quietly leaves his job at the NSA and flies to Hong Kong to meet with journalists Glenn Greenwald (Zachary Quinto) and Ewen MacAskill (Tom Wilkinson), and filmmaker Laura Poitras (Melissa Leo) to reveal US government cyber surveillance programs of epic proportions. A top security contractor with virtuoso programming skills, Ed has discovered that a virtual mountain of data on digital communication is being assembled—not just from foreign governments and terror groups, but from ordinary Americans. Disillusioned with his work in the intelligence community, Snowden meticulously gathers hundreds of thousands of secret documents that will expose the full extent of the abuses. Leaving his longtime love Lindsay Mills (Shailene Woodley) behind, Ed finds the courage to act on his principles. Snowden opens the door on the untold story of Edward Snowden, examining the forces that turned a conservative young eager patriot into a historic whistleblower and posing provocative questions about which liberties we are willing to trade for protection.

Now fifteen, Eva clings to life inside the body she shares with Addie, although she can no longer speak or even move. Addie does everything she can to hide the presence of her sister soul. Eva's very existence is illegal. If their secret is revealed, it could mean death for both of them. "A modern classic of courage and excitement." —The New Yorker • The source for the iconic prison-escape film starring Steve McQueen Henri Charrière, nicknamed "Papillon," for the butterfly tattoo on his chest, was convicted in Paris in 1931 of a murder he did not commit. Sentenced to life imprisonment in the penal colony of French Guiana, he became obsessed with one goal: escape. After planning and executing a series of treacherous yet failed attempts over many years, he was eventually sent to the notorious prison, Devil's Island, a place from which no one had ever escaped . . . until Papillon. His flight to freedom remains one of the most incredible feats of human cunning, will, and endurance ever undertaken. Charrière's astonishing autobiography, Papillon, was first published in France to instant acclaim in 1968, more than twenty years after his final escape. Since then, it has become a treasured classic--the gripping, shocking, ultimately uplifting odyssey of an innocent man who would not be defeated. "A first-class adventure story." — New York Review of Books

A frightening, prophetic vision of our world... In Moscow's Sheremetyevo airport, fugitive US intelligence officer Joshua Kold is held in limbo, unable to leave the airport's transit area. He is on the run, after blowing the lid off the terrifying reach of covert American global surveillance operations. Will the Russian authorities grant him asylum, or will they hand him over the clutches of the global octopus eager for revenge for his betrayal? As this gripping psychological and political thriller unfolds, a Moscow lawyer takes Kold to a secret bunker and grills him intently on just why he did it. Upon Kold's answers hang not only his own fate, but much, much more as the true extent of this chilling 1984 world unfolds. Anatoly Kucherena is the famous Russian lawyer who took on the case of the American whistleblower Edward Snowden whose revelations about US intelligence operations sent shockwaves around the world in 2013. Time of the Octopus is a fiction, but it is based on Kucherena's own interviews with Snowden at Sheremetyevo, and provides the basis for Oliver Stone's major Hollywood movie 'Snowden' starring Joseph Gordon-Levitt, one of the movie events of 2016. According to Stone, "Anatoly has written a 'grand inquisitor'-style Russian novel weighing the soul of his fictional whistleblower against the gravity of a 1984 tyranny that has achieved global proportions. His meditations on the meaning of totalitarian power in the 21st century make for a chilling, prescient horror story." Is Kold simply a traitor, or the courageous hero of a terrifying struggle against the dark forces of oppression? Translated by John Farndon with Akbota Sultanbekova and Olga Nakston.

SOON TO BE A NETFLIX ORIGINAL MOVIE A gripping feat of reportage that exposes—for the first time in English—the sensational life and mysterious death of Ashraf Marwan, an Egyptian senior official who spied for Israel, offering new insight into the turbulent modern history of the Middle East. As the son-in-law of Egyptian president Gamal Abdel Nasser and a close advisor to his successor, Anwar Sadat, Ashraf Marwan had access to the deepest secrets of the country's government. But Marwan himself had a secret: He was a spy for the Mossad, Israel's intelligence service. Under the codename "The Angel," Marwan turned Egypt into an open book for the Israeli intelligence services—and, by alerting the Mossad in advance of the joint Egyptian-Syrian attack on Yom Kippur, saved Israel from a devastating defeat. Drawing on meticulous research and interviews with many key participants, Uri Bar Joseph pieces together Marwan's story. In the process, he sheds new light on this volatile time in modern Egyptian and Middle Eastern history, culminating in 2011's Arab Spring. The Angel also chronicles the discord within the Israeli government that brought down Prime Minister Golda Meir. However, this nail-biting narrative doesn't end with Israel's victory in the Yom Kippur War. Marwan eluded Egypt's ruthless secret services for many years, but then somebody talked. Five years later, in 2007, his body was found in the garden of his London apartment building. Police suspected he had been thrown from his fifth-floor balcony, and thanks to explosive new evidence, Bar-Joseph can finally reveal who, how, and why.

"Apart from Irish whiskey, good cigars, Pontiac motor cars, and a pistol grip baby .410 shotgun with solid load shells, what I love the most is kidnapping smartarse gangsters and taking their money. To the human filth I have bashed, belted, iron barred, axed, shot, stabbed, knee capped, set on fire and driven to their graves, I can only quote from the motto of the French Foreign Legion, 'Je Ne Regrette Rien'...I REGRET NOTHING." Mark Brandon "Chopper" Read is the son of a strict Seventh Day Adventist mother and a shell-shocked former soldier who slept with a loaded gun at his side. Bullied at school, he grew up dreaming of revenge ('there are none so merciless as those who have been shown no mercy', as he later noted). He became a criminal legend who terrorized drug dealers, pimps, thieves and armed robbers on the streets and in jail - but boasts he never hurt an innocent member of the public. This first volume of Chopper's memoirs, written from inside jail and laced with his trademark brutal humour, tells the story of his early life of crime - from streetfighter to standover man, gunman to long-term prisoner - and launched his career as a bestselling author.

Tarzan of the Apes is a novel by American writer Edgar Rice Burroughs, the first in a series of books about the title character Tarzan. It was first published in the pulp magazine The All-Story in October 1912.[1] The story follows Tarzan's adventures, from

his childhood being raised by apes in the jungle, to his eventual encounters with other humans and Western society. So popular was the character that Burroughs continued the series into the 1940s with two dozen sequels.[2] For the novel's centennial anniversary, Library of America published a hardcover edition based on the original book with an introduction by Thomas Mallon in April 2012 (ISBN 978-1-59853-164-0). Scholars have noted several important themes in the novel: the impact of heredity on behavior; racial superiority; civilization, especially as Tarzan struggles with his identity as a human; sexuality; and escapism. The next generation of computer system designers will be less concerned about details of processors and memories, and more concerned about the elements of a system tailored to particular applications. These designers will have a fundamental knowledge of processors and other elements in the system, but the success of their design will depend on the skills in making system-level tradeoffs that optimize the cost, performance and other attributes to meet application requirements. This book provides a new treatment of computer system design, particularly for System-on-Chip (SOC), which addresses the issues mentioned above. It begins with a global introduction, from the high-level view to the lowest common denominator (the chip itself), then moves on to the three main building blocks of an SOC (processor, memory, and interconnect). Next is an overview of what makes SOC unique (its customization ability and the applications that drive it). The final chapter presents future challenges for system design and SOC possibilities.

The Next Africa, an Axiom Best Business Book Award winner, will change the way people think about the continent. The old narrative of an Africa disconnected from the global economy, depicted by conflict or corruption, and heavily dependent on outside donors is fading. A wave of transformation driven by business, modernization, and a new cadre of remarkably talented Africans is thrusting the continent from the world's margins to the global mainstream. In the coming decades the magnitude of Africa's markets and rising influence of its people will intersect with other key trends to shape a new era, one in which Africa's progress finally overshadows its challenges, transforming an emerging continent into a global powerhouse. The Next Africa captures this story. Authors Jake Bright and Aubrey Hruby pair their collective decades of Africa experience with several years of direct research and interviews. Packed with profiles; personal stories, research and analysis, The Next Africa is a paradigm-shifting guide to the events, trends, and people reshaping Africa's relationship to the world. Bright and Hruby detail the cross-cutting trends prompting Silicon Valley venture capital funds and firms like GE, IBM, and Proctor & Gamble to make major investments in African economies, while describing how Africans are stimulating Milan runways, Hollywood studios, and London pop charts. The Next Africa introduces readers to the continent's burgeoning technology movement, rising entrepreneurs, groundbreaking philanthropists, and cultural innovators making an impact in music, fashion, and film. Bright and Hruby also connect Africa's transformation to its contemporary immigrant diaspora, illustrating how this increasingly affluent group will serve as the thread that pulls the continent's success together. Finally, The Next Africa suggests a fresh framework for global citizens, public policy-makers, and CEOs to approach Africa. It will no longer be "The Hopeless Continent", nor will it become an overnight utopia. Bright and Hruby offer a more nuanced, net-sum, and data-rich approach to analyzing an increasingly complex continent, reconciling its continued challenges with rapid progress. The Next Africa describes a future of a more globally-connected Africa where its leaders and citizens wield significant economic, cultural, and political power--a future in which Americans will be more likely to own African stocks, work for companies doing business in Africa, buy African hits from iTunes, see Nigerian actors win Oscars, and learn new African names connected to tech moguls and billionaires.

On 21 August 2015, Ayoub al-Khazzani boarded a train in Brussels bound for Paris. We now know that he was an ISIS terrorist. Khazzani's mission was clear: he had an AK-47, a pistol, a box cutter, and enough ammunition to obliterate the 554 passengers on the crowded train. But as he began to execute his plan, he encountered an unstoppable line of defence: three American friends. The 15:17 to Paris is a gripping account of the foiled attack by the three men who lived it—Anthony Sadler, Alek Skarlatos and Spencer Stone. It is also the story of what compelled three lifelong friends to run towards danger instead of from it—towards humanity, not away from terror.
