It's not easy to find out exactly what you can and can't do—legally—with the human resources you employ to help run a business in China. That is, unless you have this well informed, insightful, information-packed guide at hand. Although it's concise and easy to understand, it offers—in clear English—comprehensive, accurate and up-to-date guidance on the best HR practice in China for tackling such crucial (and often tricky) employment issues as: recruitment and induction; the employment contract; benefits, retirement, and tax issues; rules covering expatriate and foreign workers; training and development; industrial relations; dispute resolution; and termination and redundancy. Especially useful in this new edition is its coverage of the recently implemented Labour Contract Law of the PRC, which took effect on 1 January 2008, with its important clarifications in such areas as written contracts and severance pay. Translations of laws, rules, and regulations manifest CCH's unchallenged standards of accuracy and clarity. Employment Law in China will prove immeasurably valuable to line managers, human resource practitioners, company lawyers and other professionals involved in running day-to-day business operations in China.

The Law of Shipbuilding Contracts examines the principles of English contract law as these apply to shipbuilding. The leading text on shipbuilding and marine construction, widely used by the global maritime community, this new edition is updated to account for the "long tail" effects of the global economic crisis on the sector. The authors provide expert analysis on the key shipbuilding contract forms, including sections dealing with agreements ancillary to the shipbuilding contract and ship conversion contracts, together with — for the first time — contracts for the construction of offshore oil and gas vessels and units. The new edition has been comprehensively updated, including commentary on recent High Court decisions on shipbuilding contracts and, in particular, associated refund guarantees. The contractual and legal consequences of global economic turbulence and the resultant increase in the number and size of disputes in the shipbuilding sector are discussed, alongside coverage of other contemporary regulatory and legal issues resulting from environmental pressures and the trend for "cleaner", more efficient tonnage. A comprehensive and authoritative resource, this book is essential reading for buyers and charterers of newbuilding tonnage, shipbuilders and offshore construction yards, shipbrokers, banks and other finance providers, lawyers and insurers working in the maritime and offshore oil and gas sectors, as well as students of maritime law.
