The Hindu scriptures the Upanishads are, according to German scholar PAUL DEUSSEN (1845-1919), the culminating point of the Indian doctrine of the universe, an achievement that had been reached even before the arrival of the Buddha. In this work—originally published in German in 1906 and translated into English two years later—Deussen explores the place of the Upanishads in the literature of the Veda and explains the theology, cosmology, and psychology of that holy book. A landmark for East-West cross-cultural scholarship, *The Philosophy of the Upanishads* helped create the European understanding of the mind and heart of India, a philosophical and cultural endeavor that consumed both academics and armchair truth-seekers of the day. Today, it is still essential reading for anyone wishing to obtain a deeper knowledge of Indian spiritual wisdom.
