An alpha wolf, a seductive vampire, and a dominant fae all walk into a bar. What do they have in common? Being mated to me, apparently. My dreams of retirement crashed and burned when the rogue shifter bit me. Not only have I changed into something neither world has ever seen before, but my mission just became even more impossible. To find the answers about what I am, I enlist the help of an infamous ex-poltergeist, a shifter freak, and my least favorite pigeon. What a team we make. Oh, and did I forget to mention that my mate's bloodthirsty daughter is awake and hunting my ass now? Because that's a thing too. Why? I have no idea, but we have every intention of finding out. An angel is playing games with me, but little do they know-I've got three alphas by my side, and this dark horse plays for keeps.

Rowan faces her most dangerous monster-slaying challenge yet, confronting what could be the most infamous monster of all, in the third book in this fantastical series by New York Times bestselling author, Kelley Armstrong. Rowan is Tamarel's Royal Monster Hunter, and her twin brother, Rhydd, will be its king. After the events of *The Gryphon's Lair*, Rowan, along with her friends, her brother and an entourage of monstrous companions, makes her way back to the Dunnian Woods to deal with the pack of dropbears the group trapped in an abandoned cabin after a vicious attack. The dropbears are just one of a number of rare monster species acting erratically in Tamarel. After a swarm of colocolos nearly tramples the group, Rowan becomes convinced that someone (or something) is driving these monsters out of their natural habitats. But nothing can prepare the Royal Monster Hunter for the truth of the matter: monsters even bigger and deadlier than gryphons have returned to the world, and their nest-building, as well as the actions of the humans trying to drive them out, has upset the balance of nature in Tamarel. Do Rowan's "monster magnet" skills work against the most fearsome monsters imaginable? Find out in this exciting third book in the Royal Guide to Monster Slaying series!

My husband killed me. Instead of spending my immortal Afterlife pissed off and angry, I moved on. I became someone. Sure, that someone was a demon with the highest track record of reform, AKA punishment, in Hell. But who's bragging? I'm right on my way to retirement behind the pearly gates. Everything was going fine . . . until the Risk Witches saw a terrible vision. Three men. Each scarred in their own way, born with powers that haven't been seen in eons. Upper Management sent the best to correct their path. Angels. Poltergeists. Nothing worked. These men were too stubborn. Too bad. Too untamed... So they sent me. Roman. Ezra. Dorian. Combined, they have enough power to end the world-and they will. Unless I find a way to stop them first. Breaking people is my job. But this time... my job might break me.

Where would we be without conversation? Throughout history, conversations have allowed us to see different perspectives, build ideas, and solve problems. Conversations, particularly academic conversations ... push students to think and learn in lasting ways. Academic conversations are back-and-forth dialogues in which students focus on a topic and explore it by building, challenging, and negotiating relevant ideas. [The] authors ... have identified five core communication skills to help students hold productive academic conversations across content areas. These skills are: elaborating and clarifying, supporting ideas with evidence, building on and/or challenging ideas, paraphrasing and synthesizing. This books shows teachers how to weave the cultivation of academic conversation skills and conversations into current teaching approaches.

Finally! Board member orientation truly simplified. Serving on a nonprofit board can be an incredibly rewarding experience for the properly prepared board member. This book is for the generous and busy people who agree to give of

their time and talents by serving on nonprofit boards. Nonprofit boards often fail to do a good job of board member orientation for a variety of reasons. It takes a significant amount of time and effort to plan and conduct quality board member orientation programs, and every time a new board member arrives, it's time to do it again! Because of the challenges associated with providing quality board member orientation, many nonprofit organizations do not do it at all, leaving their board members to wing it. This book provides help and support to the truly great men and women serving on nonprofit boards whose service makes a positive difference in the lives of countless people every day. This book is a concise and appropriately comprehensive guide to nonprofit board service designed especially for new board members. It is a quick read, (about one hour), yet it addresses with accuracy the most significant elements of board service, such as mission, responsibility, duty, risk, liability, and board meeting dynamics. Hooey Alerts! Watch for Hooey Alerts! where the author identifies and dispels common myths and legends about nonprofit board service. There are many sources of false or misleading information about the nonprofit board service environment. A perfect example is the often vaguely-worded and intimidating assertion or implication that the Sarbanes-Oxley Act passed by Congress in 2002 applies to nonprofit organizations in a manner similar to how it applies to publicly-traded companies. (It does not.) Reviews "This book is the perfect guide for every nonprofit board member! Concise, highly informative, and loaded with nuggets of wisdom, it's a must read that will take board members to the next level of successful board governance." -- J. Todd Chasteen, General Counsel, Samaritan's Purse "Mike Batts has put his quarter century of advising and serving on nonprofit boards to good use in this accurate and easy-to-read book. In addition to describing major principles of nonprofit law and governance, the book provides helpful questions to guide board members in understanding the practical applications of the concepts discussed. While geared primarily toward helping new board members get up to speed quickly, it should also help veteran board members discharge their stewardship roles wisely and efficiently." -- Chuck Hartman, Associate Professor of Business Law and Accounting, Cedarville University "This book, Board Member Orientation, is exactly what a busy volunteer board member needs. The board member's duties are presented in a clear and concise manner from the perspective of someone who has been around many boards. With a focus on those issues that are most common and/or most important, it is perfect for board member orientation and for quick reference reminders for the experienced board member." -- Doug Starcher, Partner, Broad & Cassel "This book provides clear, no-nonsense guidance on the basic issues for new nonprofit board members. Using this book for board member orientation will ensure your organization has communicated fundamental governance issues and will assist the board in determining risk management strategies." -- Dan Busby, President, ECFA \*\*\*\*\*

Electricity can be easy to understand! A fruitful model of simple electric circuits is developed and applied in these pages. The approach is highly pictorial: electric potential (Volts) and electric current (Amps) are represented by simple diagrams. The student is expected to use these diagrams as the principal mode of analyzing circuits. When algebra and equations are introduced, the student already has an understanding of V, I, R and P from the diagrams. As in all of the Ross Lattner IntuitivScience series, diagrams are an important mode of expression. Parents and teachers, you get one half of the book! We provide solid pedagogical supports, recipes, and methods of presentation. The unit itself is further subdivided into four sections, approximating four weeks of 70-minute classes. 1. Static electricity and the electrical structure of matter 2. Characteristics of electric current, and development of a model of current, potential, resistance and power 3. Mathematical treatment of series and parallel circuits 4. Projects that are either an application of the model or an extensions of the model. At the end of sections 1 - 3 is a thorough quiz, in the same pictorial style. Because this unit involves fundamental forces and concepts, we recommend that it be placed first in the series of the four Ross Lattner Grade Nine Academic IntuitivScience books. In particular, this book should be placed before chemistry.

What happens when a snarky hitman and a by-the-book PI cross paths? Leland Being a hitman has its perks, but I never thought getting an accidental mooning by an attractive PI while he's caught on a fence would be one of them. While it's not exactly love at first sight, he's captured my interest and won't let go. Suddenly, I find myself caught in a game of cat and mouse, determined to attract the attention of Jackson, the PI who should be my enemy. He pretends like he's not flattered by my flowers and the mentions of my totally-not-fictitious blow-up doll Randy (or was it Dandy?), but I know better. Why else would he be teaming up with me to bring down Hardek, one of the city's most ruthless criminals?

Jackson Even though the cops are telling me that the hitman is a notorious contract killer, I can't help but admit that I'm drawn to him. He's funny, charismatic, and attractive. There's no way this ridiculous man can be the person the cops are after. But when Leland ends up at my doorstep injured, I'm faced with a tough choice. It's my duty to hand him over to law enforcement, but my heart has other plans. I want to keep him. To protect him. To be with him. Though one question remains: why in the world does the man have so many d\*mn guns? Contains: shenanigans on a swing that you would NOT find at a playground, a car chase that sadly doesn't have flips or explosions, a horsey ride sans horse, cuddles, an exuberant mutt, a suspicious chief of police, and lots and lots of laughs.
