Winner of the Canadian Authors Association Award for Best Novel Noel Burun has synesthesia and hypermnesia: he sees words in vibrant explosions of colors and shapes, which collide and commingle to form a memory so bitingly perfect that he can remember everything, from the 1001 stories of The Arabian Nights to the color of his bib as a toddler. But for all his mnemonic abilities, he is confronted every day with a reality that is as sad as it is ironic: his beloved mother, Stella, is stricken with Alzheimer's disease, her memory slowly slipping into the quicksands of oblivion. The Memory Artists follows Noel, helped by a motley cast of friends, on his quest to find a cure for his mother's affliction. The results are at the same time darkly funny, quirkily inventive, and very moving. Alternating between third-person narratives and the diaries of Noel and Stella, Jeffrey Moore weaves a story filled with fantastic characters and a touch of suspense that gets at the very heart of what it means to remember and forget, and that is a testament to the uplifting power of family and friendship.

The Cycle of Juvenile Justice takes a historical look at juvenile justice policies in the United States. Tracing a pattern of policies over the past 200 years, the book reveals cycles of reforms advocating either lenient treatment or harsh punishments for juvenile delinquents. Bernard and Kurlychek see this cycle as driven by several unchanging ideas that force us to repeat, rather than learn from, our history. This timely new edition provides a substantial update from the original, incorporating the vast policy changes from the 1990s to the present, and placing these changes in their broader historical context and their place within the cycle of juvenile justice. The authors provide a provocative and honest assessment of juvenile justice in the 21st century, arguing that no policy can solve the problem of youth crime since it arises not from the juvenile justice system, but from deeper social conditions and inequalities. With this highly-anticipated new edition, The Cycle of Juvenile Justice will continue to provide a controversial, challenging, and enlightening perspective for a broad array of juvenile justice officials, scholars, and students alike.

Hamburg: Two women are killed in the same horrific, ritualistic manner. It seems clear that a serial killer is at work, selecting victims at random and living out some twisted fantasy. The murderer taunts the police with e-mails - but, as Jan Fabel and his murder team investigate further, nothing is clear cut or as it first seems. They are drawn into a dark half-world of Viking myth and legend, of obscure religious cults, of political intrigue and of a violent struggle to seize control of the city. As Fabel desperately races to track down the killer before more killings take place, he and his team come face to face with a cold, brutal menace they could never have predicted. A greater evil than they could ever have imagined.

"Noam Shpancer portrays the oft-hidden world of psychotherapy with unparalleled authenticity, compassion, and wit . . . An astonishing debut."—Jonathan Kellerman Noam Shpancer's stunning debut novel opens as a psychologist reluctantly takes on a new client—an exotic dancer whose severe anxiety is keeping her from the stage. The psychologist, a solitary professional who also teaches a lively night class, helps the client confront her fears. But as treatment unfolds, her struggles and secrets begin to radiate onto his life, upsetting the precarious balance in his unresolved relationship with Nina, a married former colleague with whom he has a child—a child he has never met. As the shell of his detachment begins to crack, he suddenly finds himself too deeply involved, the boundary lines between professional and personal, between help and harm, blurring dangerously. With its wonderfully distinctive narrative voice, rich with humor and humanity, The Good Psychologist leads the reader on a journey into the heart of the therapy process and beyond, examining some of the fundamental questions of the soul: to move or be still; to defy or obey; to let go or hold on.

Introduction to Probability Models, 8th Edition, continues to introduce and inspire readers to the art of applying probability theory to phenomena in fields such as engineering, computer science, management and actuarial science, the physical and social sciences, and operations research. Now revised and updated, this best-selling book retains its hallmark intuitive, lively writing style, captivating introduction to applications from diverse disciplines, and plentiful exercises and worked-out examples. The 8th Edition includes five new sections and numerous new examples and exercises, many of which focus on strategies applicable in risk industries such as insurance or actuarial work. The five new sections include: * Section 3.6.4 presents an elementary approach, using only conditional expectation, for computing the expected time until a sequence of independent and identically distributed random variables produce a specified pattern. * Section 3.6.5 derives an identity involving compound Poisson random variables and then uses it to obtain

an elegant recursive formula for the probabilities of compound Poisson random variables whose incremental increases are nonnegative and integer valued * Section 5.4.3 is concerned with a conditional Poisson process, a type of process that is widely applicable in the risk industries * Section 7.10 presents a derivation of and a new characterization for the classical insurance ruin probability. * Section 11.8 presents a simulation procedure known as coupling from the past; its use enables one to exactly generate the value of a random variable whose distribution is that of the stationary distribution of a given Markov chain, evenin cases where the stationary distribution cannot itself be explicitly determined. The Writer's Craft, the Culture's Technology explores the multiple ways in which a culture's technological resources shape its literary productions. Literature and style cannot be divorced from the particular technologised culture that sponsors them. This has always been true, as papers here on literature from earlier periods show. But many of the papers focus on contemporary culture, where literature vies for attention with film, the internet, and other multimodal cultural forms. These essays, from an international array of experts, are stylistics-based but not stylistics-bound. They should be of interest to all who are interested in discourse analytic commentaries on how technological horizons, as always, continue to shape the forms and functions of literature and other cultural productions.
