Harness the beauty of the natural world to create unique textile art pieces. Learn how to create beautiful textile art inspired by details in nature in this practical and inspirational guide. Acclaimed textile artist Marian Jazmik shows how to use unusual recycled and repurposed materials combined with traditional fabric and thread. Marian reveals the secrets of her lushly textured and sculptural embroidered pieces, from initial photograph to finished object. Exploring nature as a constant source of inspiration, she shows how to turn a chance spotting of lichen on a tree trunk or a scattering of autumn leaves into glorious textile or mixed-media art. Marian goes on to explore the myriad of techniques she uses in her work, including: How to begin with photography, homing in on details in nature. How to manipulate images to create microscopic and surprising detail. How to translate the images into 3-D work, using an eclectic mix of natural and man-made textiles, as well as unusual recycled materials otherwise be destined for landfill (packaging, plastics and household DIY products). Hand and machine embroidery. Dyeing, printing and painting. Using heat gun and soldering iron to create heavily textured surfaces. Packed with practical tips, inspiration and illustrated throughout with glorious examples of Marian's work, this book will provide you with endless imaginative ideas for distilling the wonders of nature into your own textile art.

"When my dragons are grown, we will take back what was stolen from me and destroy those who wronged me! We will lay waste to armies and burn cities to the ground!

Daenerys Targaryen Dragons are massive, flying reptiles which can breathe fire onto their enemies and cook their food with the same flame. They are rumored to have a strong connection to magic, which seems to be proven true when magic begins to return to the world after the birth of the first three in over two hundred years. Dragons possess awesome and devastating power, capable of laying waste to armies and burning entire cities to ashes. Men who were able to tame and ride dragons as beasts of war used them to burn their enemies and forge vast empires across the continents of Essos and Westeros. Tools and material you'll need 1 Craft Knife (X-Acto knife) 2 Scissors 3 White glue 4 12" Ruler 5 Color markers or pencils 6 Tweezers 7 Paint brush Useful tips - Completely read these instructions before cutting. Make sure you understood all instructions steps - Detach parts carefully as they are needed - Avoid over application of glue! This may cause paper to wrinkle. Use a paint brush to apply glue on parts - In some parts, you'll notice some white areas and yellow lines showing how pieces should line up when glued - When you cut paper, white edges will be apparent. Use a marker or pencil to color these edges, before gluing them - Mountain fold means printed surface should be on the outside - Valley fold means printed surface should be on the inside - When building, be sure the glue dries completely before proceeding to the next step - When joining opened parts, like partial cones and cylinders, start gluing two tabs. - - - - When completely dry, glue remaining tabs - There is an edge where you close the cylinder or cone. Let's call it the guide edge. - - - - Use this guide edge as an alignment mark when glueing one part to another. - Cut some stripes from textures file to hide some joints Difficulty level: medium NUMBER OF PARTS: 258 SCALE: 1/30 SIZE (CM): 72 x 50 x 22 (L x W x H) SIZE (in): 28.3 x 19.6 x 8.6 (L x W x H) The set includes: working sheets 14 pcs. + Assembly instruction. Art Workshop for Children is not just another book of straightforward art projects. The book's unique child-led approach provides a framework for cultivating creative thinking and encourages the wonder that comes when children are allowed to freely explore the creative process and their materials. As children work through these open-ended workshops, adults are guided on how to be facilitators who provide questions, encourage deep thinking, and help spark an excitement for discovery. Children explore basic materials and workshops that use minimal supplies, and then gradually add new materials to fill the art cabinets as well as new skills and more complex workshops. Most workshops are suitable to preschool-aged children, and each contains ideas for explorations and new twists to engage older or more experienced artists. Interspersed throughout are sidebar essays that introduce perspectives on mess-making, imperfection, the role of adult, collaborative art, and thoughts on the Reggio Emilia method, a self-guided teaching philosophy. These pieces underscore the value of art-making with children, and support the parent/teacher/care-giver on how to successfully lead, question, and navigate their children through the workshops to result in the fullest experiences.

Lily Gayle and the gang set out to find a killer after local baker Luxen Natolovich is found dead hours before the grand opening weekend at the new Bed and Breakfast in town, Midnight Dragonfly. As Lily Gayle deciphers the clues around Luxen's death she uncovers a conspiracy of lies and half-truths that could very well be tied to a refugee camp in Mississippi during World War II. The deeper Lily Gayle digs the deeper the conspiracy runs and the closer she comes to being the killers next victim. A 2017 Official Selection in mystery by New Apple Awards. This cozy mystery, Cherry Cake and a Cadaver, from Susan Boles is a new addition to the great southern cozy mystery tradition of Tonya Kappes, Miranda James and Larissa Reinhart.

The primary goal of the volume on "Visual Communication" is to provide a collection of high quality, accessible papers that offer an overview of the different academic approaches to Visual Communication, the different theoretical perspectives on which they are based, the methods of analysis used and the different media and genre that have come under analysis. There is no such existing volume that draws together this range of closely related material generally found in much less related areas of research, including semiotics, art history, design, and new media theory. The volume has a total of 34 individual chapters that are organized into two sections: theories and methods, and areas of visual analysis. The chapters are all written by quality theorists and researchers, with a view that the research should be accessible to non-specialists in their own field while at the same time maintaining a high quality of work. The volume contains an introduction, which plots and locates the different approaches contained in it within broader developments and history of approaches to visual communication across different disciplines as each has attempted to define its terrain sometimes through unique concepts and methods sometimes through those borrowed and modified from others.

In 3D Printing With MatterControl, Joan Horvath and Rich Cameron, the team behind Mastering 3D Printing, explain step-by-step how to use the MatterControl program, which allows you to control many common types of 3D printers (including both cartesian and delta style machines). 3D Printing With MatterControl can stand alone, or it can be a companion to Mastering 3D Printing to show you how to install, configure, and use best practices with your printer and printing software. The book includes both step by step software walkthroughs and case studies with typical 3D printed objects. Whether you are a "maker" or a teacher of makers, 3D Printing with MatterControl will show you how to get the most out of your printer with the new standard for open source 3D printing software. While there are books available on 3D printers, and even a few on software to make models for printers, there are few good sources covering the software that actually controls these printers. MatterControl is emerging as the leading open source software for 3D printers, and 3D Printing With MatterControl covers this new standard in this brief book.
