The IMF's principal statistical publication, International Financial Statistics (IFS) Online, is the standard source of international statistics on all aspects of international and domestic finance. For most countries, IFS Online reports data on balance of payments, international investment position, international liquidity, monetary and financial statistics, exchange rates, interest rates, prices, production, government accounts, national accounts, and population. Updated monthly. Japanese distribution was long seen as archaic and difficult to understand, but today that has changed. Domestic firms stretching across all retail formats and categories have taken control of channels and now lead the consumer market from the front. They are now so advanced that the very best are bursting out of the Japanese market and operating across Asia and even as far as Western Europe. Through case studies and concrete examples, this book provides the most detailed analysis of retailing in Japan ever written; it is the definitive guide to how Japan has changed and what to expect in the future.
