Volume II of Major Poems of the Hebrew Bible deals with 85 Psalms (83 poems) and the poems in Job 4-14, and aims at presenting an integrated prosodical theory which is able to bypass the highly controversial question of metrics. There are two approaches which initially are kept apart on grounds of method: structural analysis and the counting of the original, i.e. pre-Masoretic, syllables. Each poem receives a compact description of structure which gives a reasoned delimitation of cola, verses, and strophes. In a separate operation, the syllable counts for each word, colon, verse, strophe, stanza, section and poem are recorded in a comprehensive Appendix. All the poems under discussion show a precise integer as the average of syllables per colon. For half of them this is 8.00, the others have either 7.00 or 9.00. The 9.00 is a ceiling: there is no Psalm with a higher average. Combining the two approaches, the author shows that the poets themselves did count their syllables, and how they were able to mesh the syllable figures with the structural units of their compositions in a virtuoso combination. The greatest challenge of this enterprise is to delimit and objectify the correct colometry for all the songs, as the figure of syllables per colon depends on the right amount of cola. There are only about 30 Psalms which have a cola figure that can be considered beyond doubt. Fortunately, in the Book of Job the correct number of cola is certain for most chapters. Here we meet the number 8 again as a normative figure

Discover the brilliantly funny True Confessions of Margaret Hilda Roberts by Sue Townsend, 'the funniest person in the world' - Caitlin Moran, The Times Tuesday May 24th Had a lie in until 6am. Then got out of bed and had a brisk rub down with the pumice stone. I opened the curtains and saw that the sun was shining brightly. (A suspicion is growing in my mind that the BBC is not to be trusted.) Margaret Hilda Roberts is a rather ambitious 14 1/2 year old grocer's daughter from Grantham. She can't abide laziness, finds four hours of chemistry homework delightful and believes she is of royal birth - or at least destined for great things. But Margaret knows that good things never come to those who wait . . . These are the secret diary entries of a girl born into an ordinary life, yet who might just go on to become something really rather extraordinary, and she is brilliantly brought vividly to life by bestselling author Sue Townsend, Britain's favourite comic writer for over three decades. 'Essential reading for Mole followers' Times Educational Supplement 'Wonderfully funny and sharp as knives' Sunday Times

Thinking History 4-14 Teaching, Learning, Curricula and Communities Routledge

Based on the principle that the Gospels should be considered authentic source material.

Composing is part of the mainstream music curriculum for many children yet children's music does not receive the same attention as their art or creative writing. *Children Composing 4-14* traces the ways in which composing can be organised and taught within the school music curriculum, drawing on children's own music-making activities. This practical book looks at how teaching composing can enable children to progress by acquiring musical skills and understanding, whilst developing their own sense of musical purpose. One of the main concerns of the book is the need to sustain continuity and quality in children's composing experience as they move through each phase of music education. *Children's Composing* is considered in relation to the wider musical context in which they grow up, including cultural differences in composing roles and in perceptions of composing and composers. Projects that bring children into contact with professional composers are critically examined, and suggestions are made for ways of ensuring that composing in schools is rooted in the musical world outside. A reference book on metals which includes information on isotopes, crystallography, crystal chemistry, gas-metal systems, electron emission, magnetic properties, heat treatment, corrosion control and superplasticity.

Vols. for 1972/73- include statistical data compiled by the Bureau under its earlier name: Commonwealth Bureau of Census and Statistics.

Vols. for 1841-1914 include Rates of box and pocket chronometers on trial for purchase by the Board of Admiralty (varies slightly); 1888-1914 include Rates of chronometer watches on trial for purchase by the Board of Admiralty (varies slightly); 1838, 1845- include Reports of the Astronomer Royal to the Board of Visitors (these titles also issued separately).

Red Sonja and Wallace have faced the darkness and made their way out from Hell - or have they? They've crossed the River Styx, but the land of the living looks just as desolate as the land of the Dead - and it soon becomes all too clear that this is the handiwork of Kulan Gath, enraging Sonja. She didn't travel back and forth through time and escape from Hell just to find her homelands in ruin...Kulan Gath may be more powerful than ever, but a reckoning is coming!

In this book the author looks at the past, present and the future of history teaching in primary schools in an attempt to provide a practical framework for teachers. Section one reviews relevant literature with an aim to clarify the dilemmas and advance present thinking and practice in history teaching in primary schools. Section two offers case studies, curriculum materials and designs, teaching ideas and methods, teacher-development and curriculum development materials, at the same time as tying it in to the existing knowledge-base. Section three considers the 'perennial dilemmas' for school history in the 21st century, including: how can history survive in an increasingly over-crowded and competitive school curriculum? How can history be harnessed to improvements in literacy and numeracy? What should the primary history curriculum contain? How can IT secure easier access to historical information and evidence?
