55 vasche. Le guerre, il cancro e quella forza dentro Mimmo Candito,2016

55 vasche Mimmo Cándito,2016-01-14 Uno-due, respiro, uno-due, respiro, la bracciata lunga, il fiato rilassato, le gambe battevano il crawl come un piccolo motore, e via un'altra vasca e via una ancora. Ebbi appena un attimo di incertezza. Poi dissi a me stesso: ora fagli vedere tu, al tumore, chi sei. Lo dissi quasi parlando, come se non stessi nell'acqua, tanta era l'energia vitale che sentivo dentro di me. 26, 27, 28, ero una macchina furiosa che macina lo spazio e il tempo. Poi 40, poi 50, e non mi fermavo ancora, 51, 52, 53... Decisi che a 55 poteva bastare. Mi arrampicai su per la scaletta. Con un sospiro d'orgoglio, guardai in alto, il sole, e l'azzurro luminoso del cielo. Non basta aver visto mille volte la morte da vicino, brutale e vigliacca come può essere solo nelle guerre che non risparmiano i civili: bambini, donne, indifesi. Non basta a placare lo sgomento quando ti senti dire che hai un cancro al polmone, speranze di sopravvivenza 0,0. Non basta a Mimmo Cándito, inviato per decenni sui fronti più caldi del pianeta, dall'Afghanistan al Libano. Non basta, eppure aiuta a chiamare per nome la paura, a resistere al dolore. Così come non basta eppure aiuta l'amore per lo sport che Cándito ha sempre avuto, lui che da ragazzo è stato vicecampione juniores di sciabola e pivot in una squadra di pallacanestro che è stata Nazionale italiana all'estero. E soprattutto queste due esperienze - in guerra e come atleta - aiutano a guardarsi dentro per andare a scovare quelle energie nascoste che permettono di affrontare a testa alta la battaglia per la propria vita, per le persone che si amano. 55 vasche è un memoir da pelle d'oca in cui Cándito, con una penna nobile ed emozionante, racconta la sua lotta contro la malattia, intrecciandola con i ricordi toccanti di trent'anni da inviato. E spiega perché, e come, davanti al tumore abbia scelto di essere combattente e non condannato. In un libro che è un inno alla vita, e può spronare ciascuno di noi.

Primo Levi Ian Thomson,2014-03-11 Primo Levi, author of Survival in Auschwitz and The Periodic Table, wrote books that have been called the essential works of humankind. Yet he lived an unremarkable existence, remaining until his death in the house in which he'd been born; managing a paint and varnish factory for thirty years; and tending his invalid mother to the

last. Now, in a matchless account, Ian Thomson unravels the strands of a life as improbable as it was influential, the story of the most modest of men who became a universal touchstone of conscience and humanism. Drawing on exclusive access to family members and previously unseen correspondence, Thomson reconstructs the world of Levi's youth--the rhythms of Jewish life in Turin during the Mussolini years--as well as his experience in Auschwitz and difficult reintegration into postwar Italy. Thomson presents Levi in all his facets: his fondness for Louis Armstrong and fast cars, his insomnia and many near-catastrophic work accidents. Finally, he explores the controversy and isolation of Levi's later years, along with the increasing tensions in his life--between his private anguish and gift for friendship; his severe bouts of depression and passion for life and ideas; his pervasive dread and reasoned, pragmatic ethic. Praised in Britain as the best sort of history and a model of its kind, *Primo Levi: A Life* is certain to take its place as the standard biography and a necessary companion to the works themselves.

Letters Against the War Tiziano Terzani,2002 After 30 years as a war correspondent for a major European magazine, Tiziano Terzani turns into a correspondent against all wars.

Tunnel Thru The Air Or Looking Back From 1940 W. D. Gann,2016-08-09 In this inspirational masterpiece about the role of the human being in the universe, finance trader and author W. D. Gann uses the Bible to explore the secret to successful living. Through direct teachings from the Bible, the reader may learn how to understand, obey and apply the universal laws revealed in the Bible in order to bring about his own latent talents and powers, and in turn be firmly set on the road towards health, happiness and prosperity.

Censorship and Literature in Fascist Italy Guido Bonsaver,2007-01-01 The history of totalitarian states bears witness to the fact that literature and print media can be manipulated and made into vehicles of mass deception. *Censorship and Literature in Fascist Italy* is the first comprehensive account of how the Fascists attempted to control Italy's literary production. Guido Bonsaver looks at how the country's major publishing houses and individual authors responded to the new cultural directives imposed by the Fascists. Throughout his study, Bonsaver uses rare and previously unexamined materials to shed light on important episodes in Italy's literary history, such as relationships between the regime and particular publishers, as well as individual cases involving renowned writers like Moravia, Da Verona, and Vittorini. *Censorship and Literature in Fascist Italy* charts the development of Fascist censorship laws and practices, including the creation of the Ministry of Popular Culture and the anti-Semitic crack-down of the late 1930s. Examining the breadth and scope of censorship in Fascist Italy, from Mussolini's role as 'prime censor' to the specific experiences of female writers, this is a fascinating look at the vulnerability of culture under a dictatorship.

At the Crossroads of the Earth and the Sky Gary Urton, 2013-12-18 Above Misminay, the sky also is so divided by the alternation of the two axes of the Milky Way passing through the zenith. This mirror-image quadri-partition of terrestrial and celestial spheres is such that a point within one of the quarters of the earth is related to a point within the corresponding celestial quarter. The transition between the earth and the sky occurs at the horizon, where sacred mountains are related to topographic and celestial features. Based on fieldwork in Misminay, Peru, Gary Urton details a cosmology in which the Milky Way is central. This is the first study that provides a description and analysis of the astronomical and cosmological system in a contemporary community in the Americas. Separate chapters take up the sun, the moon, meteorological phenomena, the stars, and the planets. Star-to-star constellations, the animal dark-cloud constellations that cut through the Milky Way, and certain twilight- and midnight-zenith stars are analyzed in terms of their spatial and temporal integration within an indigenous cosmological framework. Urton breaks new ground by demonstrating the indigenous merging of such forms of precise knowledge as astronomy, meteorology, agriculture, and the correlation of astronomical and biological cycles within a single calendar system. More than sixty diagrams clarify this Quechua system of astronomy and relate it to more familiar principles of Western astronomy and cosmology.

Beyond Beef Jeremy Rifkin, 1994 In the first three parts of this book an exploration of the historical role of cattle in Western civilization is given. Part four examines the human impact of the modern cattle complex and the world beef culture. The range of environmental threats that have been created, in part, by the modern cattle complex is described in part five. Part six examines the psychology of cattle complexes and the politics of beef eating in Western society. The author hopes that this book will contribute to moving our society beyond beef

The Periodic Table Primo Levi, 1996-10-01 The Periodic Table is largely a memoir of the years before and after Primo Levi's transportation from his native Italy to Auschwitz as an anti-Facist partisan and a Jew. It recounts, in clear, precise, unfailingly beautiful prose, the story of the Piedmontese Jewish community from which Levi came, of his years as a student and young chemist at the inception of the Second World War, and of his investigations into the nature of the material world. As such, it provides crucial links and backgrounds, both personal and intellectual, in the tremendous project of remembrance that is Levi's gift to posterity. But far from being a prologue to his experience of the Holocaust, Levi's masterpiece represents his most impassioned response to the events that engulfed him. The Periodic Table celebrates the pleasures of love and

friendship and the search for meaning, and stands as a monument to those things in us that are capable of resisting and enduring in the face of tyranny.

So the Wind Won't Blow It All Away Richard Brautigan,2011-12-01 In a small Pacific Northwest town we meet a young man who has shot dead his best friend with a gun. The novel deals with the repercussions of this tragedy: the anguish, regret, despair and bittersweet romance. Typical of Brautigan's singular style, *So the Wind Won't Blow It All Away* is a beautifully written, brooding novel. Its autobiographical prose is a fitting epitaph to this complex, contradictory and often misunderstood writer.

Recharting the Black Atlantic Annalisa Oboe,Anna Scacchi,2011-04-13 This book focuses on the migrations and metamorphoses of black bodies, practices, and discourses around the Atlantic, particularly with regard to current issues such as questions of identity, political and human rights, cosmopolitics, and mnemo-history.

Signs of the Inka Khipu Gary Urton,2003-08-01 In an age when computers process immense amounts of information by the manipulation of sequences of 1s and 0s, it remains a frustrating mystery how prehistoric Inka recordkeepers encoded a tremendous variety and quantity of data using only knotted and dyed strings. Yet the comparison between computers and khipu may hold an important clue to deciphering the Inka records. In this book, Gary Urton sets forth a pathbreaking theory that the manipulation of fibers in the construction of khipu created physical features that constitute binary-coded sequences which store units of information in a system of binary recordkeeping that was used throughout the Inka empire. Urton begins his theory with the making of khipu, showing how at each step of the process binary, either/or choices were made. He then investigates the symbolic components of the binary coding system, the amount of information that could have been encoded, procedures that may have been used for reading the khipu, the nature of the khipu signs, and, finally, the nature of the khipu recording system itself—emphasizing relations of markedness and semantic coupling. This research constitutes a major step forward in building a unified theory of the khipu system of information storage and communication based on the sum total of construction features making up these extraordinary objects.

Time On My Hands Giorgio Vasta,2013-06-18 Palermo, Sicily, 1978. The Christian Democrat leader Aldo Moro has just been kidnapped in Rome by members of the notorious Red Brigades. Two months after his disappearance on 9th May, Moro is found dead in the boot of a car. A trio of eleven-year-old schoolboys, Nimbo, Raggio, and Volo, avidly follow the news of the abduction as their admiration for the brigatisti grows. When the boys themselves resolve to abduct a classmate and incarcerate him in a makeshift 'people's prison', the darkness within their world, and the world of the novel, becomes all-pervasive. A vivid and hellish description of Sicily in the late seventies, *Time on my Hands* is an unforgettable novel from a significant new voice in Italian fiction.

The Right to Useful Unemployment and Its Professional Enemies Ivan Illich,1978 Monograph on a philosophy for

restoring quality of life to modern society - contends that autonomous activities, in which both rich and poor people might find a sense of creativity and freedom, have been thwarted by professionalism, technocracy, and the pursuit of productivity.
