Liz Steel

5-Minute Sketching -- Landscapes Virginia Hein,2017 A comprehensive guide to quick sketching of landscapes. 5 Minute Sketching-Landscapes is about drawing what you see, mostly in settings away from the modern world. It's especially appropriate for travelers. There are 60 exercises for new and aspiring artists which can be done in any number of locations and as often as desired. All will help to hone skills, increase speed, and help to promote a daily drawing routine. Sketchers will learn how look at a scene and deconstruct its elements quickly - for example, see natural features as colored geometric shapes; locate the source of light; divide the scene into planes (e.g., close, mid, far) for accurate perspective and color values; and note landmarks that support their observations. Readers will build an instinctive focus that pays off in speed and results. Experienced artists will refresh their skills, eliminate bad habits, and discover new ways of seeing. Landscapes, of course, feature color, and this is covered in some detail and with expert guidance thro.

Whether you are a habitual doodler or a seasoned artist, *The Urban Sketcher* will have you out in the world sketching from the very first page. By completing drawings on the spot, in one session, you achieve a fresh impression of not just what you see, but also what it feels like to be there . . . visual life stories as only you can experience them.

The Urban Sketching Handbook: Understanding Perspective Stephanie Bower, 2016-06-15 A good sketch starts with good bones—this guide from an architectural illustrator shows how to think like an architect and master accurate perspective. This book in the *Urban Sketching Handbook* series uses drawings and simple steps to explain the often challenging and overwhelming concepts of perspective in practical and useful ways for on-site sketching. Most books are either too abstract or don't provide enough information that relates to what you actually do when you're out in the busy, wide world about to start a drawing. Where do you start? How do you edit what you see to flatten and shrink it onto your paper? How does perspective work? *The Urban Sketching Handbook: Understanding Perspective* helps you learn to think like an architect, to draw buildings and spaces by reducing what you see to simple, basic shapes, then adding layers in simple steps, and finally finishing your sketch with detail, tone, and color—in accurate perspective. Full of helpful tips, it even deconstructs sketches to show you how to create them! Once you understand perspective, it will change the way you see the world—you'll see perspective everywhere. Key concepts explored in this volume include: Basic Terms * Basic Spatial Principles * Types of Perspective * Building a Sketch in Layers * Special Conditions

John Salminen - Master of the Urban Landscape John Salminen, 2016-10-27 Take a Journey with the Master of the Urban Landscape! John Salminen is one of the most accomplished watercolor artists working today, earning awards and recognition all over the world. Whether depicting the trees of Central Park, the architecture of San Francisco or the busy streets of Beijing, John Salminen's watercolor paintings are snapshots of urban life that are both rich in detail and universal in appeal. In *Master of the Urban Landscape*, Salminen shares over 150 pieces of his artwork, spanning his entire career. His early abstracts and recent plein air work in the book's Introduction set the groundwork for four chapters of remarkable watercolor paintings that highlight different aspects of his work: architectural form, organic form, human form and light and shadow. Throughout, Salminen shares the inspiration for his paintings, challenges he encountered and techniques he used to

capture unique scenes from cities around the world. Embark on an amazing watercolor journey with John Salminen—Master of the Urban Landscape. John Salminen is a master of the medium of watercolor. His sense of light and design sets him apart from his contemporaries, and he has emerged as one of the finest living artists of our times with a style very much his own. -- Dean Mitchell

We Build Drawings Mikkel Frost, 2019 A collection of sketches and watercolours by Mikkel Frost, co-founder of Danish architecture firm CEBRA, champions drawing as a communication tool. 'Architects do not actually build buildings,' says Frost. 'What we build is an idea. To visualize it, we build drawings.' The evolutionary process of how aphorisms develop into precise architectural concepts is illustrated through a collection of Frost's sketches and watercolours. Over 200 drawings are organized into 20 sections, each relating to one of CEBRA's projects. An index containing colour photographs and renders of their works further illuminates how the drawings are translated into reality. Introducing the book, a written version of Frost's TEDx talk Let your fingers do the talking elaborates on the book's impetus: to bring a spotlight to the craft of drawing as a powerful tool for creation and communication. Features • A collection of 200+ sketches and watercolours by Danish architect Mikkel Frost. • A curated selection of drawings is organized into 20 sections, each referring to one of the projects by internationally recognized architecture firm CEBRA. • The book provides insight into the architect's creative process, illustrating how an idea develops into a well-defined concept. • In a compact and handy format, the book champions drawing as a powerful and important communication tool for everyone.

The Barefoot Architect Johan van Lengen, 2008 A former UN worker and prominent architect, Johan van Lengen has seen firsthand the desperate need for a greener approach to housing in impoverished tropical climates. This comprehensive book clearly explains every aspect of this endeavor, including design (siting, orientation, climate consideration), materials (sisal, cactus, bamboo, earth), and implementation. The author emphasizes throughout the book what is inexpensive and sustainable. Included are sections discussing urban planning, small-scale energy production, cleaning and storing drinking water, and dealing with septic waste, and all information is applied to three distinct tropical regions: humid areas, temperate areas, and desert climates. Hundreds of explanatory drawings by van Lengen allow even novice builders to get started.

Making Marks Will Jones, 2019-03-19 A rich and varied glimpse into the creative processes of a broad array of contemporary architects. While digital technologies have pushed the boundaries of architectural creation, conceiving an original and appropriate design is as challenging as it has always been. As this book shows, however, a recent return to the basic act of putting pen or pencil to paper has produced some of the most successful buildings of the past decade. Making Marks follows the highly successful Architects' Sketchbooks, which presented the rich breadth of sketches created by contemporary architects post digital revolution. Taking a post-digital perspective, the sixty renowned architects whose work is collected here show how drawing and new forms of manual presentation have been refined since the reawakening of this

basic technique. Revealing why hand-drawing still matters, this global survey presents the freehand drawings, vibrant watercolors, and abstract impressions of a broad and eclectic array of rising talents and well-known names, including Jun Igarashi, Deborah Saunt, Daniel Libeskind, Meg Graham, and Brian MacKay-Lyons, to name but a few. Author Will Jones's introduction reviews the importance of the physical sketch and its vital role in the creative process. Spanning diverse approaches, styles, and physical forms, Making Marks is not merely a compendium of the preoccupations and stylistics of current practice, but a rich and varied insight into architectural creativity.
