

6 The Second Industrial Revolution Tri Valley Local

In *Don't Mess It Up: How Founders and Their Successors Can Avoid the Clichés That Inhibit Growth*, author and six-time second CEO Les Trachtman offers his expertise on the most effective ways to successfully hand off your company to a worthy successor. He also has advice for those who are inheriting a business and want to take it to the next level, as well as for boards who are dealing with these leadership transitions. In his direct, no-nonsense approach, Les shows readers how seemingly harmless business clichés such as “get it right” and “be careful” can have a detrimental effect on a company’s future by conveying that such imperative ingredients such as risk and innovation are things to now be avoided. Readers will learn how to:

- Understand the metamorphosis required to transition from great founder to great CEO
- Know when, and if, it’s time to replace yourself
- Pick the right successor
- Prepare yourself and your company for the fragile transition
- Create a successful CEO transition
- Separate yourself from the company

There is likely no one more experienced in founder transitions than Les Trachtman. He has been an innovative and respected successor at six different companies; let his hard-won advice guide you through your transition and toward success.

The convergence of various fields of technology is changing the fabric of society. Big data and data mining, Internet of Things, artificial intelligence and blockchains are already affecting business models and leading to a social and economic transformations that have been dubbed by the fourth industrial revolution. Focusing on the framework of intellectual property rights, the contributions to this book analyse how the technical background of this massive transformation affects intellectual property law and policy and how intellectual property is likely to change in order to serve the society. Well-known authorities in intellectual property law offer in-depth chapters on the roles in this revolution of such concepts and actualities as the following: power and role of data as the raw material of the revolution; artificial inventors and creators; trade marks in the dimension of avatars and fictional game characters; concept of inventive step change where the person skilled in the art is virtual; data rights versus intellectual property rights; transparency in the context of big data; interrelations of data, technology transfer and antitrust; self-executable and ‘smart’ contracts; redefining the balance among exclusive rights, development, technology transfer and contracts; and proprietary information versus the public domain. The chapters also provide complete analyses of how big data changes decision-making processes, how sustainable development requires redefinition, how technology transfer is re-emerging as technology diffusion and how the role of contracts and blockchain as instruments of monitoring and enforcement are being defined. Offering the first in-depth legal commentary and analysis of this highly topical issue, the book approaches the fourth industrial revolution from the perspectives of technical background, society and law. Its authoritative analysis of how the data-driven economy influences innovation and technology transfer is without peer. It will be welcomed by practicing lawyers in intellectual property rights and competition law, as well as by academics, think tanks and policymakers.

Discusses the changes of the Progressive era, focusing on the Industrial Revolution and its effects on American society
How Paris, London, Chicago, Berlin, and Tokyo created modernity through science and technology by means of urban planning, international expositions, and museums. At the close of the nineteenth century, industrialization and urbanization marked the end of the traditional understanding of society as rooted in agriculture. *Urban Modernity* examines the construction of an urban-centered, industrial-based culture—an entirely new social reality based on science and technology. The authors show that this invention of modernity was brought about

Get Free 6 The Second Industrial Revolution Tri Valley Local

through the efforts of urban elites—businessmen, industrialists, and officials—to establish new science- and technology-related institutions. International expositions, museums, and other such institutions and projects helped stem the economic and social instability fueled by industrialization, projecting the past and the future as part of a steady continuum of scientific and technical progress. The authors examine the dynamic connecting urban planning, museums, educational institutions, and expositions in Paris, London, Chicago, Berlin, and Tokyo from 1870 to 1930. In Third Republic Paris, politicians, administrators, social scientists, architects, and engineers implemented the future city through a series of commissions, agencies, and organizations; in rapidly expanding London, cultures of science and technology were both rooted in and constitutive of urban culture; in Chicago after the Great Fire, Commercial Club members pursued civic ideals through scientific and technological change; in Berlin, industry, scientific institutes, and the popularization of science helped create a modern metropolis; and in Meiji-era Tokyo (Edo), modernization and Westernization went hand in hand.

NAMED ONE OF THE BEST BOOKS OF 2018 BY THE SAN FRANCISCO CHRONICLE AND SMITHSONIAN MAGAZINE By a prize-winning young historian, an authoritative work that reframes the Industrial Revolution, the expansion of British empire, and emergence of industrial capitalism by presenting them as inextricable from the gun trade "A fascinating and important glimpse into how violence fueled the industrial revolution, Priya Satia's book stuns with deep scholarship and sparkling prose."--Siddhartha Mukherjee, Pulitzer Prize-winning author of *The Emperor of All Maladies* We have long understood the Industrial Revolution as a triumphant story of innovation and technology. *Empire of Guns*, a rich and ambitious new book by award-winning historian Priya Satia, upends this conventional wisdom by placing war and Britain's prosperous gun trade at the heart of the Industrial Revolution and the state's imperial expansion. Satia brings to life this bustling industrial society with the story of a scandal: Samuel Galton of Birmingham, one of Britain's most prominent gunmakers, has been condemned by his fellow Quakers, who argue that his profession violates the society's pacifist principles. In his fervent self-defense, Galton argues that the state's heavy reliance on industry for all of its war needs means that every member of the British industrial economy is implicated in Britain's near-constant state of war. *Empire of Guns* uses the story of Galton and the gun trade, from Birmingham to the outermost edges of the British empire, to illuminate the nation's emergence as a global superpower, the roots of the state's role in economic development, and the origins of our era's debates about gun control and the "military-industrial complex" -- that thorny partnership of government, the economy, and the military. Through Satia's eyes, we acquire a radically new understanding of this critical historical moment and all that followed from it. Sweeping in its scope and entirely original in its approach, *Empire of Guns* is a masterful new work of history -- a rigorous historical argument with a human story at its heart.

The Fourth Industrial Revolution

Currency
Set on the whaling port of Monkshaven, the plot of *Sylvia's Lovers* unravels the unscrupulous activities of press-gangs. Sylvia's lover is carried off by a press-gang, but writes to her, promising constancy. Unfortunately, the letter is entrusted to Sylvia's cousin, Philip, who keeps it from her in order to marry her himself. Years later Charley returns, and Philip's treachery is discovered, with disastrous consequences. What would you see if you ride a submarine to explore the deep blue sea? You'll be seeing fish and whales and sharks and all marine animals in between! It's the same adventure when you open this book and start your own ocean exploration. You'll see pictures to come with texts so information will stick better. Grab a copy today!

Presents an introduction to the study of the Industrial Revolution, discussing how to research basic facts, find a topic,

evaluate sources, use tangible evidence, and write a presentation.

"Buy the "Reset: Control, Alt, Delete" paperback and download the eBook for only \$0.99 - 0.64." Learn how to rise from the ashes of defeat. Get self-help, Embrace positive thinking, Live a happier life, and Find your destiny. No one can defeat you. You can only defeat yourself. No one can truly save you. You must save yourself. There is hope and a way out! Help yourself by reading Reset: Control, Alt, Delete find answers and change your life for the better. RESET: Control, Alt, Delete, unlike other self-help books is written specifically to help you to find the encouragement, strength, and personal growth that you will need to change your perspective with positive thinking so you can live a hopeful life that creates a path allowing you to find your destiny. Take action by getting yourself a copy of Brian's book. You will be so grateful you did! "Tags: self help, positive thinking, self-help books, self-help happiness, personal growth book, self-help books, depression""

Poems that I have done this year, that are all sorts of types of poems, second book of poetry, similar to the first but very different also though. You will see what I mean when you read these poems compared to the first book's poems.

A colorful celebration of life! - "Let it bloom.. and see what joys may come". Joyful welcome or fond farewell.. sweet declaration or deep dedication. The rose has a way of uplifting the spirit and touching the heart. Remember the rosebush in the yard, the rosebuds at dawn.. the full blooms in the bouquet.. the petals on the pathway.. The many radiant colors from pure white to deep red, radiate with love and friendship, making magical connections that last forever.

A new book from the Lean Manufacturing Expert Sebastian Brau, presenting techniques, software, procedures and tricks to get the maximum performance from your Lean project by the use of current available technologies in factories. You will learn how to: 1.- Implement the 'Active Inventory' methodology to prevent your factory from having any stockout ever again. 2.- Use 'lean markers' to detect productivity deviations in your operations more easily. 3.- Merge Kaizen and Pareto to complete your 'continuous improvement' cycles faster and cheaper. 4.- Transform the quality controls in your factory into plant sensors to build a 'digital nervous system'. 5.- Use simple plant records to automatically feed your ERP. 6.- Implement a Material Traceability control that does not jeopardize your operation's productivity with unnecessary costs. 7.- Use SMED video guides to reduce the need to train your staff and the global time for the Lean project to be implemented. 8.- Implement a time control for your staff without offending susceptibilities in the factory. 9.- Know how the new North American Law 'FSMA' can affect your operation if you do not anticipate its effects. A different Lean book written by a Robotics and Artificial Intelligence Software Engineer with more than 20 years' experience in implementing Lean Manufacturing and structured with the different technological viewpoint that his specialized profile allows, in the form of "Practical guide on the correct use of Technology in a Lean Project"

"The Corona crisis and the Need for a Great Reset" is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset. Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out.

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

Several years had passed since Hotdog Man had perished by the hands of General Gouda, the world went back to an era of peace and tranquility. During this time, Hotdog Man was in another dimension, a world of the spirits, where he was in a war with the demonic Dr. Mustard and his army of ghost soldiers. Meanwhile, in the land of the living, Hotdog Jr, had grown up into a mild manner teenager. The Eyno Gems had been destroyed, leaving our heroes unable to access their incredible powers. Spice Town didn't have evil terrorizing them anymore, the residents had nothing to fear, but soon that

would change. As the wicked Master Mizuna had grown up despising what had happened to his Uncle, Dr. Mustard, now with his army of minions, he was ready for revenge.

"The War Chief of the Six Nations: A Chronicle of Joseph Brant" by Louis Aubrey Wood. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten?or yet undiscovered gems?of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

The confluence of developments in technology, labor and management practice, and market expansion in the period from 1760 to 1850 so drastically altered the context of economic relations that, taken together, they earned the name, "Industrial Revolution." This book, the first in a series of titles to explore turning points and important events in business history, explains the nature of these changes, how they came about, how people reacted to the new environment, and the direct impage that they have had on the way business is conducted today. Featuring biographical sketches, photos, a timeline, a glossary of key terms, and excerpts of primary documents, The Industrial Revolution reveals the "daily life" of the entrepreneurs, bureaucrats, and workers who experienced the dramatic changes in technology, business, and trade, and the resulting changes in society and culture.

This book examines the precision farming revolution in Somerset, England. It reveals the reasons why local farmers invested in autonomous systems and traces the outcomes of adoption. It describes the local and global drivers of the fourth industrial revolution, from world population growth, climatic and ecological crises, profit driven farming and government agri-tech grants, to the Space Race era. A new cultural method of intelligence, ideas and thinking, new organisational and control powers, was precisely what precision farming offered farmers and off-farm firms, who were able to remotely monitor and control natural environments and aspects of on-farm activities. As a result of local farmers opting into precision farming systems the power dynamics of industrial agriculture were reorganised and this book will offer readers an understanding of how and why.

This monograph aims to analyze the economic and business history of colonial India from a corporate perspective by clarifying the historical role of institutional developments based on archival evidence of a representative enterprise. The perspective is distinctively unique in that it highlights the salience of corporate-level institutional responses to explain the causes of colonial India's industrial growth, in addition to two renowned perspectives focusing on government economic policy or factor endowment. One of the driving forces of India's high growth rate since the 1980s is the expansion of modern business corporations whose origins date back to the colonial era in the mid-nineteenth century. This monograph explores the historical foundation of the growth of such corporations in colonial India, guided by a substantial collection of documents of Tata Iron and Steel Company, whose rich records have not received the due attention they have long deserved. As clarified by numerous economic and business historians of leading industrialized countries since the works of Douglass North and Alfred Chandler, this study as well proposes that the development of modern business corporations in colonial India was broadly supported by the reciprocal evolution of economic institutions and corporate organizations. Adding a new perspective to the business and economic history of colonial India, the analysis also provides an important case study of the development of corporate business in the non-Western world to the study of global business history.

This book brings together a group of leading economic historians to examine how institutions, innovation, and industrialization have determined the development of nations. Presented in honor of Joel Mokyr—arguably the preeminent economic historian of his generation—these wide-ranging essays address a host of core economic questions. What are the origins of markets? How do governments shape our economic fortunes? What role has entrepreneurship played in the rise and success of capitalism? Tackling these and other issues, the book looks at coercion and exchange in the markets of twelfth-century China, sovereign debt in the age of Philip II of Spain, the regulation of child labor in nineteenth-century Europe, meat provisioning in pre-Civil War New York, aircraft manufacturing before World War I, and more. The book also features an essay that surveys Mokyr's important contributions to the field of economic history, and an essay by Mokyr himself on the origins of the Industrial Revolution. In addition to the editors, the contributors are Gergely Baics, Hoyt Bleakley, Fabio Braggion, Joyce Burnette, Louis Cain, Mauricio Drelichman, Narly Dwarkasing, Joseph Ferrie, Noel Johnson, Eric Jones, Mark Koyama, Ralf Meisenzahl, Peter Meyer, Joel Mokyr, Lyndon Moore, Cormac Ó Gráda, Rick Szostak, Carolyn Tuttle, Karine van der Beek, Hans-Joachim Voth, and Simone Wegge.

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

The new green industrial revolution is driven by a variety of global environmental concerns. In some regions, it is spurred by the scarcity of cheap affordable renewable energy that will also lead to a reduced reliance on fossil fuel in the production of power. In others, it is driven by a need to reduce greenhouse gas (GHG) emissions from power generation. This book provides a comprehensive review of the most popular green "disruptive technologies in energy production as well as their economic impact. In addition, the book includes a multitude of international case studies where these technologies are currently deployed and their economic impact on the region. Clearly explains the scientific, engineering, technological, and economics driving the Green Revolution in power generation A guide to technologies such as renewable energy, smart green grids, and emission control technologies Packed with international case studies that provides real-world examples of how these technologies are currently being deployed around the world Explains the economic impact which these new technologies will play in building global sustainability

The story is about a golden-haired youth who wanders into the city of Teloth, telling tales of the great city of Aira, where he was prince. While Iranon enjoys singing and telling his tales of wonder, few appreciate it. A city solon even orders Iranon to cease his singing & music, and become apprenticed to the cobbler - or leave the city by sunset. When a disenfranchised boy named Romnod suggests leaving Teloth to go to the famed city of Oonai (which he thinks may be Aira, now under a different name), Iranon takes him up on his offer.

Use this journal for yourself or give as a gift to record hopes and dreams, keep daily diary, manage your bucket list, track gratitude, jot down thoughts and inspirations to help you simply live life to its fullest. This journal makes a great gift for birthdays, Christmas, Hanukkah, Mother's Day, Father's Day, Valentine's Day, and all holidays in between. Great gift for all ages: kids, tweens, teens, grads, millennials, teachers and grandparents. Makes a wonderful stocking stuffer!

Sample Text

This work takes an in-depth look at the multi-faceted contemporary relationship between Singapore and Japan since the end of World War II. It is the story of a relationship between an economic superpower, Japan, and an enterprising city-state whose leaders have sought to emulate not only Japan's economic success but several key facets of Japanese society as well. No other country surpasses Singapore in its public admiration of Japan. How is it possible for a multi-ethnic Singapore to emulate a relatively homogeneous Japan? What features of economic and political motives behind the attempt to emulate Japan? These and other questions are addressed in this work, which will be of interest to scholars of the international relations and security of East and Southeast Asia.

Describes the roll played by the transcontinental railroads in the making of modern America during the Gilded Age, discussing the economic panics caused by their debt and how their dependence on donations from the wealthy initiated new forms of corruption. Reprint.

The industrial revolution was the single most important development in human history over the past three centuries, and it continues to shape the contemporary world. With new methods and organizations for producing goods, industrialization altered where people live, how they play, and even how they define political issues. By exploring the ways the industrial revolution reshaped world history, this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact. In the fourth edition, noted historian Peter N. Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West, including the study of India, the Middle East, and China. In addition, an expanded conclusion contains an examination of the changing contexts of industrialization. The Industrial Revolution in World History is essential for students of world history and economics, as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times.

Just when you thought the story couldn't twist any more...lightning strikes — literally in this case. Share the continuing life journey of the Richards family in this fifth offering of The Teacher Series. But wait a minute. This installment is narrated by Darby. Why? Where's Tom? It's not enough that Darby is struggling with demons from her past; she's also faced with what seems like an insurmountable crisis in the present. But something amazing happens...this time starting with delicious dreams where a surprise "Teacher" appears to guide her to the next level of Spiritual Truth. Grab this book now if you've read the previous books in the series...and if not, start with Free! Forgiven the Past to Unlock Your Future to get the whole story, step by step.

This open access collection examines how higher education responds to the demands of the automation economy and the fourth industrial revolution. Considering significant trends in how people are learning, coupled with the ways in which different higher education institutions and education stakeholders are implementing adaptations, it looks at new programs and technological advances that are changing how and

Get Free 6 The Second Industrial Revolution Tri Valley Local

why we teach and learn. The book addresses trends in liberal arts integration of STEM innovations, the changing role of libraries in the digital age, global trends in youth mobility, and the development of lifelong learning programs. This is coupled with case study assessments of the various ways China, Singapore, South Africa and Costa Rica are preparing their populations for significant shifts in labour market demands – shifts that are already underway. Offering examples of new frameworks in which collaboration between government, industry, and higher education institutions can prevent lagging behind in this fast changing environment, this book is a key read for anyone wanting to understand how the world should respond to the radical technological shifts underway on the frontline of higher education.

Closely linked essays examine distinctive national patterns of industrialization. This collection of essays offers new perspectives on the Industrial Revolution as a global phenomenon. The fifteen contributors go beyond the longstanding view of industrialization as a linear process marked by discrete stages. Instead, they examine a lengthy and creative period in the history of industrialization, 1750 to 1914, reassessing the nature of and explanations for England's industrial primacy, and comparing significant industrial developments in countries ranging from China to Brazil. Each chapter explores a distinctive national production ecology, a complex blend of natural resources, demographic pressures, cultural impulses, technological assets, and commercial practices. At the same time, the chapters also reveal the portability of skilled workers and the permeability of political borders. The Industrial Revolution comes to life in discussions of British eagerness for stylish, middle-class products; the Enlightenment's contribution to European industrial growth; early America's incremental (rather than revolutionary) industrialization; the complex connections between Czarist and Stalinist periods of industrial change in Russia; Japan's late and rapid turn to mechanized production; and Brazil's industrial-financial boom. By exploring unique national patterns of industrialization as well as reciprocal exchanges and furtive borrowing among these states, the book refreshes the discussion of early industrial transformations and raises issues still relevant in today's era of globalization.

Want to make your classes awesome and cut review lesson prep time in half? You need 39 ESL Review Games and Activities for Kids (6-13). Many of your students think that review classes are boring and with good reason. They often are! But, they don't have to be! Effective review games and activities are a valuable teaching tool because language is learned mainly through repetition. However, finding good review activities takes time, a scarce resource for most teachers. That's what makes 39 ESL Review Games so valuable. It helps your students review English grammar and vocabulary while reducing prep time, so you can focus on other important teaching tasks. This book will make your classes awesome and will save you time, guaranteed. If you want some fun, engaging, and useful review games and activities that your students will love, 39 ESL Review Games and Activities for Kids (6-13) is for you!!

"A 22-volume, highly illustrated, A-Z general encyclopedia for all ages, featuring sections on how to use World Book, other research aids, pronunciation key, a student guide to better writing, speaking, and research skills, and comprehensive index"-- Preschoolers will have hours of fun with this activity-packed book. There are puzzles to complete, simple mathematics, find objects, alphabets and more . A great way for kids to learn while having fun.

This book offers a critical reflection on the meaning and expected impact of the fourth industrial revolution, and its implications for industrial policy. Industrial revolutions are considered not only in terms of technological progress, but also in the context of the

Get Free 6 The Second Industrial Revolution Tri Valley Local

changing relationship between market and production dynamics, and the social and political conditions enabling the development of new technologies. Industrial Policy for the Manufacturing Revolution aims to increase our capacity to anticipate and adapt to the forthcoming structural changes. A concrete illustration of this industrial policy is provided through an experience of its implementation at regional level.

Reprint of the original, first published in 1922.

In this twenty-fifth anniversary edition of his prize-winning book, Dawley reflects once more on labor and class issues, poverty and progress, and the contours of urban history in the city of Lynn, Massachusetts, during the rise of industrialism in the early nineteenth century. He not only revisits this urban conglomeration, but also seeks out previously unheard groups such as women and blacks. The result is a more rounded portrait of a small eastern city on the verge of becoming modern.

The first part deals historically with the main themes of Unilever development in a period of revolutionary change - external as well as internal. The second part deals with the problems that affected ...

“Freeman’s rich and ambitious Behemoth depicts a world in retreat that still looms large in the national imagination.... More than an economic history, or a chronicle of architectural feats and labor movements.”—Jennifer Szalai, New York Times In an accessible and timely work of scholarship, celebrated historian Joshua B. Freeman tells the story of the factory and examines how it has reflected both our dreams and our nightmares of industrialization and social change. He whisks readers from the early textile mills that powered the Industrial Revolution to the factory towns of New England to today’s behemoths making sneakers, toys, and cellphones in China and Vietnam. Behemoth offers a piercing perspective on how factories have shaped our societies and the challenges we face now.
