? This volume contributes to the research in two different research areas: lexical availability studies and vocabulary research in second or foreign languages. Lexical availability is defined as the words that immediately come to mind as a response to a stimulus provided by topics related to domains closely connected to daily life: for instance animals, food and drink, daily activities, politics, or poverty. Lexical availability is a dimension of learners' receptive and productive lexical competence, and, consequently, an important variable of learners' communicative competence. Written by leading researchers in Spanish and English applied linguistics, the studies presented in this volume offer the reader findings and insights from studies conducted in learners with different mother tongues, who learn English or Spanish as their second or third language. "This book made me aware of an approach to vocabulary acquisition which has a long tradition in European research, but has been somewhat neglected by English-speaking researchers. The methodology was pioneered in France where it developed into the Francais Fondamental project - an influential approach to the vocabulary needs of learners of French. It was also taken up by Spanish researchers, and more recently developed by the team at La Rioja University. Where English-language research has focused

on the frequency of words in large corpora and the implications of this feature for L2 vocabulary acquisition, the lexical availability tradition takes a much more learner-centred approach to L2 vocabulary skills, directly reflecting learners' needs and learners' ability to do things with small, effective vocabularies. This leads to a set of research priorities that look refreshingly different from the ones we are used to. Read this book. It might change the way you think about vocabulary research.” Paul Meara, Swansea University, Wales, UK

This book presents an empirically grounded argument for a new approach of teaching writing to diverse students in the English language arts classroom. Responding to advocates of the "code-switching" approach, four uniquely qualified authors make the case for "code-meshing"--allowing students to use standard English, African American English, and other Englishes in formal academic writing and classroom discussions. This practical resource translates theory into a concrete roadmap for pre- and in-service teachers who wish to use

As the new English Language Arts Common Core State Standards take hold across the United States, the need grows for pre-service and in-service teachers to be ready to develop curriculum and instruction that addresses their requirements. This timely, thoughtful, and comprehensive text directly meets this need. It delineates a literacy practices and critical engagement curriculum

framework for 6-12 English language arts education that explains and illustrates how the Standards' highest and best intentions for student success can be implemented from a critical, culturally relevant perspective that is firmly grounded in current literacy learning theory and research. The first 6-12 English language arts methods text to be aligned with the Standards, this book also addresses their limitations — formalist assumptions about literacy learning, limited attention to media/digital literacies, lack of attention to critical literacies, and questionable assumptions about linking standards and text complexity to specific grade levels. Specific examples of teachers using the literacy practices/critical engagement curriculum framework in their classrooms shows how these limitations can be surpassed. Features • Moves the CCSS framework into a view that literacy is a contextualized, social practice • Challenges simplistic models that homogenize adolescent learners • Adds the important element of critical literacy to English language arts classrooms • Provides specific examples of teachers in action implementing these practices • Interactive Companion Website with student and instructor resources. The Website is designed to foster interactivity through participation in an online teaching planning simulation with a text, video, or case on one side of the screen and a chat box for instructors and students to share their reactions and planning ideas. The Companion Website is linked to a wiki

that serves as a repository for links, activities/units, and further reading. This corpus study traces the history of MILLION in English. It focuses on the shift in word class/function from noun/noun-phrase head (three millions of dollars) to determinative/determiner (three million dollars). A chapter on morphosyntax/semantics probes the natural word class and function of number words and their historical categorization. A composite international diachronic corpus is used to map a broad taxonomy of MILLION phrases, and very-large-scale digital American and British newspaper archives are used to show when and where the syntactic shift took place. The tens of billions of datable words in these sources yield such robust results that key phases in the shift can be traced in unprecedented detail, uncovering surprising patterns in American/British differences and an avoidance strategy in the use of numeral and number-word expressions. Retarding and accelerating factors are treated in separate chapters.
