Web-Based Labs for MCTS Guide to Microsoft Windows Server 2008 Applications Infrastructure Configuration (Exam #70-643) provides step-by-step labs taken directly from MCTS Guide to Microsoft Windows Server 2008 Applications Infrastructure Configuration (Exam #70-643). Using a real lab environment over the Internet, students can log on anywhere, anytime via a Web browser to gain essential hands-on experience using Microsoft Windows Server 2008. They offer 60 hours of access within a six-month period allows generous time allocation for each lab exercise. There are hands-on interactive exercises, remote mentoring, instructor shadowing, real time progress reporting included. Instant grading of each assigned task allows students to check their progress, go back and redo tasks, and forward final results to their instructor.

MOAC Virtual Labs provide students with a hosted emulation environment for working in labs designed for use with the Microsoft Official Academic Course curriculum. These labs are the hands-on software experience that is critical for students to build the skills and knowledge they need for effective work with Windows Server 2008 on the job. Give them real experience with real software, freely exploring

the full environment, instead of the prescribed task flow of simulations. MOAC Virtual labs simplify the implementation of your new network administration program by eliminating lab set up. All lab exercises are hosted on Microsoft servers. Only a browser and internet connection are required for their use. This will save your institution the expense of upgrading the hardware and the software in your lab. You will no longer need dedicated hard drives for each student. Students may log into their virtual lab from any machine. Distance learning is now a viable option for your IT Professional program.

This exam is designed to validate Windows Server 2008 applications platform configuration skills. This exam will fulfill the Windows Server 2008 Technology Specialist requirements of Exam 70-643. The Microsoft Certified Technology Specialist (MCTS) on Windows Server 2008 credential is intended for information technology (IT)

professionals who work in the complex computing environment of medium to large companies. The MCTS candidate should have at least one year of experience implementing and administering a network operating system in an environment that has the following characteristics: 250 to 5,000 or more users; three or more physical locations; and three or more domain controllers. MCTS candidates will manage network services and resources such as messaging, a database, file and print, a proxy server, a firewall, the Internet, an intranet, remote access, and client computer management. In addition MCTS candidates must understand connectivity requirements such as connecting branch offices and individual users in remote locations to the corporate network and connecting corporate networks to the Internet. Addresses both newcomers to MS certification, and those who are upgrading from Windows 2003 Two full-function ExamDay practice exams guarantee double coverage of all exam objectives Free download of audio FastTracks for use with iPods or other MP3 players THE independent source of exam-day tips, techniques, and warnings not available from Microsoft Comprehensive study guide guarantees 100% coverage of all Microsoft's exam objectives Interactive FastTrack e-learning modules help simplify difficult exam topics

According to MS, a server administrator is responsible

Download Free 70 643 Windows Server 2008 Applications Infrastructure Configuration Package Microsoft Official Academic Course Series

for the operations and management of an infrastructure of Windows Server 2008 R2 servers in an enterprise environment. Exam 70-646: Windows Server 2008, Server Administrator covers these topics: - Planning for Server Deployment - Planning for Server Management - Monitoring and Maintaining Servers - Planning Application and Data Provisioning - Planning for Business Continuity and High Availability Exam 70-642 is all about Configuring Windows Server 2008 Infrastructure. Topics include:- Configuring Addressing and Services - Configuring Names Resolution - Configuring Network Access - Configuring File and Print Services - Monitoring and Managing a Network Infrastructure Exam 70-643 Configuring Windows Server 2008 Applications Infrastructure further covers: Deploying Servers Configuring Remote Desktop Services Configuring a Web Services Infrastructure Configuring Network Application Services These exams actually share many common topics and it would be wise to study all of them together. We give you knowledge information relevant to the exam specifications. To be able to succeed in the real exams, you'll need to apply your earned knowledge to the question scenarios. Many of the exam questions are written to be less straight forward. They tend to be framed within the context of short scenarios. The exams are not too difficult. However, coverage is very comprehensive - a wide range of topics are presented in the official topic list. The exams do not ask you to answer hundreds of questions. In other words, only a small fraction of the official topics will be presented. To succeed in the exams, you need to read

Series

as many reference books as possible. There is no single book that can cover everything! This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome.

The Microsoft Windows Server 2008 Applications Infrastructure, Configuring course covers all the necessary topics required to clear the 70-643 exam. The course focuses on the Windows Server 2008 Applications Infrastructure technologies, which includes, Terminal Services, Web Services infrastructure and security, Media Server, Microsoft Windows SharePoint Services server options, File Server, Print Services, network maintenance, and Simple Network Management Protocol. This certification preparatory course enhances the candidates' skills and knowledge necessary to implement and support a core Windows Server 2008 R2 infrastructure in an enterprise environment. Completing this course, validates a candidate's ability to implement and configure Windows Server 2008 R2 application services, such as Web and Remote Desktop Services. In addition to that, the course also ensures that the candidate has the skills and knowledge necessary for deploying, configuring and managing application infrastructure services in a Windows Server 2008 R2 environment.
