Walt Johnson has been a rolling stone most of his life, moving from town to town and living on the edges of homelessness. Now he has run out of time as lung cancer has left him only months to live. Walt then begins a quest to find the son with whom he lost contact decades earlier. Out of money, he lands a job at a small-town restaurant in an attempt to save enough to buy a bus ticket to the last known whereabouts of his son. The friends Walt makes at his new job soon become family for him, especially 14-year-old Danny who is emotionally paralyzed at the loss of his own father in Iraq. Faced with Danny's struggles to grow up and the struggles of his other new friends, Walt comes to realize he is not only on a journey to find his own son, but he is on a journey to find himself worthy of being a father. We had a dream... From Gretna Green to John O'Groats, wild celebrations ensue for the following week. Rubbish is not collected; post isn't delivered; trains and buses don't run; grass remains uncut at the height of summer; fish is not landed at the harbours. Nobody cares. It is as if everyone's birthdays have all come at once; as if two-dozen new years had been rolled into one; as if Scotland had beaten England 6-2 in the final of the World Cup at

Wembley Stadium... The natural home for the World Cup trophy is in Scotland. Every Scotland supporter would agree that this is where, in a fair and equal world, the great prize truly belongs. International football was born in Glasgow and Scotland has produced more talented players per head of population than any other small country - think of Denis Law, Kenny Dalglish, Jim Baxter and Jimmy Johnstone - while Scottish supporters have shown in huge numbers how much they enjoy being at the World Cup finals. The deserved rewards for such a blend of talent and devotion are to be found in this tale of Scotland achieving World-Cup success, putting them on the same level as the great footballing nations - Brazil, Italy and Germany. This alternative version of Scotland's World-Cup history is truly the stuff of which dreams are made.

After a virus claimed nearly the entire global population, the world changed. The United States splintered into fifty walled cities where the surviving citizens clustered to start over. The Company, which ended the plague by bringing a life-saving vaccine back from the future, controls everything. They ration the scant food and supplies through a lottery system, mandate daily doses of virus suppressant, and even monitor future timelines to stop crimes before they can be committed. Brilliant but autistic, sixteen-year-old Clover Donovan has always dreamed of studying at the Waverly-Stead Academy. Her brother and

caretaker, West, has done everything in his power to make her dream a reality. But Clover's refusal to part with her beloved service dog denies her entry into the school. Instead, she is drafted into the Time Mariners, a team of Company operatives who travel through time to gather news about the future. When one of Clover's missions reveals that West's life is in danger, the Donovans are shattered. To change West's fate, they'll have to take on the mysterious Company. But as its secrets are revealed, they realize that the Company's rule may not be as benevolent as it seems. In saving her brother, Clover will face a more powerful force than she ever imagined . . . and will team up with a band of fellow misfits and outsiders to incite a revolution that will change their destinies forever. 'Gripping . . . heart-wrenching and exhilarating, *Viral Nation* will leave you desperate for more.' Emily McKay author of *The Farm*

Gillam Hale was born to free parents, and his life was untouched by slavery until his preacher father took him on a trip to minister to the Virginia slaves. Gillam wants beautiful Queen Esther from the moment he sees her, but the only way to purchase her is by distilling illicit whiskey—against his family's advice. Though Gillam achieves his aim, his talent for making fine whiskey earns the wrath of jealous white neighbors, who kidnap Gillam's family and scatter them to plantations throughout the South.

This is a study of the political culture of interwar Poland as reflected in and by the coup of 1926. It introduces an important cultural and gendered dimension to understandings of national and political identity in Poland at the time.

Celtic have always been associated with colorful football in the more than 120 years since the club was founded to feed the poor children of the East End of Glasgow. Those romantic origins have been honored by the many great Celtic teams who have list up the game not only inside Scotland but in some of the most memorable matches the world has ever seen.

It is biggest sporting event in the world, watched by billions, in a game played on every scrap of land on the planet. It is every boy's dream to win it. Yet just seven countries, from only two continents, ever have. Why? And, most importantly, how? How to Win the World Cup takes apart all the previous 18 editions of football's pre-eminent competition to look at the sporting DNA as well as the vital statistics of winning teams. It debunks myths and turns accepted truths on their heads in search of the essence of victory. Home advantage helps,

surely? Only once in the past three decades. Well, the best team wins, then; it's only seven matches, after all. Not since Brazil in 1970 - and don't ask a Dutchman. By going beyond tactics and teams to examine factors as diverse as team spirit and the choice of captain, media hype and public expectation, the political climate and even the weather (luck, penalties and cheating play a part too, of course), Graham McColl has produced a World Cup book unlike any to have gone before it. And at the end of the day, he looks at what the 32 nations who have qualified for South Africa 2010 are bringing to the table, and if they have what it takes. Do England have the recipe for success? Can they win the World Cup, for the first time in 44 years? You read it here first.

The child has existed in cinema since the Lumière Brothers filmed their babies having messy meals in Lyons, but it is only quite recently that scholars have paid serious attention to her/his presence on screen. Scholarly discussion is now of the highest quality and of interest to anyone concerned not only with the extent to which adult cultural conversations invoke the figure of the child, but also to those interested in exploring how film cultures can shift questions of agency and experience in relation to subjectivity. *Childhood and Nation in World Cinema* recognizes that the range of films and scholarship is now sufficiently extensive to invoke the world cinema mantra of pluri-vocal and pluri-central attention and interpretation. At the same time, the importance of the child in figuring ideas of nationhood is an undiminished tic in adult cultural and social consciousness. Either the child on film provokes claims on the nation or the nation claims the child. Given the waning star of national film studies, and the widely held and serious concerns over the status of the nation as a meaningful cultural unit, the point here is not to assume some extraordinary pre-social geopolitical empathy of child and political entity. Rather, the present collection observes how

and why and whether the cinematic child is indeed aligned to concepts of modern nationhood, to concerns of the State, and to geo-political organizational themes and precepts.

This collection of case studies investigates the significance and function of national identity. The authors see national consciousness in terms of the circumstances in which it arose, and in terms of the meaning which it had for a specific group or individual. Representations of the nation could serve to legitimize or support specific political or social agendas, or to provide people with a point of fixity amidst changing circumstances. The articles in this volume trace these aspects of national consciousness in the case of a single country: The Netherlands.

Drawing on archival sources and interviews with senior health professionals and politicians, this book positions the Chief Medical Officer as one of the most influential individuals within the Whitehall system, with personal responsibility for the health of the population. It draws on expertise to inform the direction of government health policy.

"Lost on Purpose" is the non-fiction adventure narrative of a former technology executive who reinvented himself as a 21st century mountain man. In October/November 2013, Patrick Taylor crossed the Rocky Mountains alone on foot. He passed through one of the largest wilderness areas in the Lower 48 to reach and retrace the route of Lewis & Clark in the winter. The sacrifices - vocationally, financially, emotionally - are measured against the benefits by the author in a refreshingly honest, humorous, and inspirational fashion. If you liked "Wild" (and who didn't), you will love this wilderness adventure. Like many developing nations, the Philippines has been

relying on western standards as handed down by American colonialists and perpetuated by the Filipino elite. The heavy focus of this western approach on economic indicators of progress is suited to the elite's interests, since it controls commerce and industries. This book presents the "e;ANT3 Paradigm,"e; a new development paradigm that is more appropriate for developing nations because it is cognizant of the importance of the cultural and spiritual values of the people alongside their economic aspirations. "e;ANT3"e; stands for information technology Applications, social Networking, appropriate Technology, modern but affordable Telecommunications systems, and Training. This paradigm emphasizes community-building and a social organization in which every member has a distinct, vital role to play in the pursuit of the common good of the country.

The 2016 presidential election has shown that the Republican Party is at a crossroads. While a Trump candidacy took even the most seasoned political analysts by surprise, the rise of racially charged anti-elitism within the Grand Old Party has been an ongoing project for the last half a century, initiated and deliberately driven by its leaders and strategists who identified the former Confederacy as the foundation for conservative majorities. This book charts the path of the party's ever increasing Southernization and simultaneous Evangelicalization while providing a detailed assessment of the GOP's future chances of fashioning majorities in a country that is undergoing momentous demographic changes.

What did Ottoman prisoners of war imprisoned in Russia and Egypt during the Great War understand of nation, culture and Islam? And what role did science play in the imagined future of the nation for the Ottoman-Turkish psychiatrists who diagnosed prisoners following post-war repatriation? Doctors' interpretation of prisoners' health issues led to far-reaching questions about the relationship between the prisoners' physical bodies and mental states on the one hand, and the body politic and collective mentality of the Turkish Republic during the interwar period, on the other. During the interwar years, when the military's vigour was still taken to be a reflection of the nation's health, doctors projected the worrisome picture of the shattered nerves of both prisoner and non-prisoner alike onto the nation at large. The Great War revealed the poor health of the nation and gave medical men the chance to regenerate it through eugenics. Just as officer prisoners in the camps excluded ignorant peasants from their discursive construction of the nation, the psychiatrists disqualified those seen to threaten the nation's body.

The Pink Pelican is the story of a young man's obsessive journey to Crete trying to win back a lost love and falling into himself. This book also contains a collection of stories and poetry about death, dreams and clowns.

This is the first academic study of the science fiction television devised and written by Terry Nation, who wrote Dalek stories and other serials for Doctor Who, and created the BBC's 1970s post-apocalyptic space adventure series Blake's 7. This illustrated book by academic specialists in television science fiction places Nation's work in the context of its production and contains sustained analysis of key

The National Spatial Data Infrastructure (NSDI) is the means to assemble geographic information that describes the arrangement and attributes of features and phenomena on the Earth. This book advocates the need to make the NSDI more robust. The infrastructure includes the materials, technology, and people necessary to acquire, process, store, and distribute such information to meet a wide variety of needs. The NSDI is more than hardware, software, and data; it is the public foundation on which a marketplace for spatial products will evolve.

Between 1880 and 1915, 13 million Italians left their homeland, launching the largest emigration in recorded world history. In its discussion of immigrant culture, transnational identities, and international politics, this book narrates the story of Italian emigration and provides background to immigration debates that continue to this day.

Veteran political journalist Scott Farris tells the stories of legendary presidential also-rans, from Henry Clay to Stephen Douglas, from William Jennings Bryan to Thomas Dewey, and from Adlai Stevenson to Al Gore. He also includes concise profiles of every major candidate nominated for president who never reached the White House but who helped promote the success of American democracy. Farris explains how Barry Goldwater achieved the party realignment that had eluded FDR, how George McGovern paved the way for Barack Obama, and how Ross Perot changed the way all presidential candidates campaign. There is Al Smith, the first Catholic nominee for president; and Adlai Stevenson, the candidate of the "eggheads" who remains the beau ideal of a liberal statesman. And Farris explores the potential legacies of recent runners-up John Kerry and John McCain. The book also includes compact and evocative portraits of such men as

John C. Fremont, the first Republican Party presidential candidate; and General Winfield Scott, whose loss helped guarantee the Union victory in the Civil War. This new edition of *Almost President* brings the work up-to-date with a section that explores the results and ramifications of the 2012 presidential election.

Against the backdrop of nationalism, devolution and North Sea oil, Scotland were the only British team to qualify for the 1978 World Cup, and set off with genuine hopes of returning champions. But it all went horribly wrong. Beaten by Peru, a country few could point to on a map, and drawing with Iran, Scotland faced Holland, needing to win by three goals. Incredibly, the Scots conjured up one of the greatest goals in World Cup history to give themselves a chance...but it wasn't to be. Throughout this entertaining account, the cast of characters stands out: manager Ally McLeod, more a friendly uncle than world-class strategist; the monstrously permed, part-time goalkeeper Alan Rough; and wide-boy Willie Johnstone, sent home after failing a drugs test. Yet despite the resounding failure and humiliation, Argentina '78 is still viewed with great affection. Perhaps for the last time, Scotland had a world-class team and after all, if you end up beating the runners-up, doesn't that mean you are the winners? Home is where the heart is... Seven years after leaving town and the only girl he loved, Cooper still couldn't forget about Sophia. He had two loves. Music and the woman of his dreams. Coming back home proved that would always be true. But things have changed. Now he has to gain her trust again if he wants to make her all his.

The question is, did he lose his chance the first time? Some things are hard to forget... Sophia tried to stop loving Cooper and failed miserably. Despite the way he'd abandoned her seven years earlier, she can't seem to stay away, even though trusting him doesn't prove easy. One careless night could change it all and the secret she carries may ruin any chance of them being together. They say life is all about taking chances. But when opportunities are lost and love comes knocking the second time around, lives are changed forever. There once was a place where we had all the desires of our hearts. We walked with God and had perfect communion with all animals. There the animals weren't our pets, they were our friends. We loved them, and they loved us. But we brought on the plagues of sin and death, and everything changed. Eden fell away and was hidden from view. But Eden never left. It has been with us from the beginning. And sometimes, a dweller of Eden leaves to walk the Earth, but the Earth can be a deadly place for amazing animals. Rancher Sam McLeod and Libby, his fifteen-year-old daughter, ride deep into the Montana wilderness and witness a giant grizzly bear brutally killing a mother grizzly defending her cub. Libby rescues the cub, and they head back to their farm. But Kaiyo is no ordinary cub, and he is pursued both by his mother's killer and by a secretive tracker who was sent to guide the mother bear back home. Events force the McLeods to realize they are confronted with creatures that think like humans, and in doing so, Kaiyo and his new family become willing combatants in the ancient war between unseen nations.

In Tommy Gemmell: Lion Heart he sheds light on his career - from his earliest days of growing up in Lanarkshire, to his award-winning decade at Celtic, and through his work as a player and manager at Dundee and Albion Rovers. Always honest, Tommy Gemmell is not afraid to look back at Celtic's dominance in the 60s and offers his trademark forthright views on Celtic's progress and the game today.

Until recently, migration policies primarily targeted labour migrants and asylum seekers. Family migration was taken for granted. But now, many nations are restricting family migration, particularly from poorer countries. The Netherlands have even gone so far as to require family migrants to pass an integration test before being allowed to enter the country. How can this shift in policies be explained? Does it, as some suggest, indicate a new trend towards racist exclusion? This book places family migration policies in the broader perspective of changing family norms. In doing so, it shows the added value of studying immigration law not as an isolated field, but in connection with other fields of law and policy. Taking the Netherlands as an example, it shows how family migration policies have evolved from a system premised on the male breadwinner-citizen's right to domicile, to one granting and restricting freedom of movement according to individual merit. Although grounded in a different ethos, the techniques of power now being used to enforce the emerging distinctions of a globalising world are in fact reminiscent of those once used to enforce the racial and gendered distinctions of the colonial past.
