How far do cultures affect the future of the planet? Can the debate on the environment and global warming be influenced by the cultures of East and West understanding each other better? In this consistently provocative dialogue, two of the most influential thinkers of recent times propose that only a 'human revolution' - a shift in the hearts and minds of individuals - can stimulate a revolution in humanity's relationship with the planet. Such a planetary revolution first requires a transformation of moral and political leadership, and an orientation towards the future rather than a preoccupation with the short-termist policies of the present. Responding to humanity's ills from the Buddhist perspective, and with all the accumulated wisdom of the eastern philosophical tradition, Daisaku Ikeda calls for politicians to take as their mainstays a respect for the dignity of life and an eloquence to inspire in people a sense of community and courage. Correspondingly, renowned western economist and scholar of education Ricardo Diez-Hochleitner stresses the importance of proper educational planning and development in addressing the challenges posed by poverty, inequality and climate change. While acknowledging the scale of the task that lies ahead, both men offer an inspiring and hopeful vision for the future.

With inspiration from Mary Shelley's *Frankenstein*—and perfect for fans of Libba Bray—this breathless conclusion to the *Madman's Daughter* trilogy explores the things we'll sacrifice to save those we love...even our own humanity. After killing the men who tried to steal her father's research, Juliet and her friends have escaped to a remote estate on the Scottish moors. Owned by the enigmatic Elizabeth von Stein, the mansion is full of mysteries and unexplained oddities: dead bodies in the

basement, secret passages, and fortune tellers who seem to know Juliet's secrets. Though it appears to be a safe haven, Juliet fears new dangers may be present within the manor's walls. Then Juliet uncovers the truth about the manor's long history of scientific experimentation—and her own intended role in it—forcing her to determine where the line falls between right and wrong, life and death, magic and science, and promises and secrets. And she must decide if she'll follow her father's dark footsteps or her mother's tragic ones, or whether she'll make her own.

This handbook of ophthalmic nursing standards and procedures has been developed to assist healthcare professionals working in a wide range of ophthalmic settings, and also to provide the patient with safe and consistent ophthalmic nursing care. Ophthalmic care is constantly changing and progressing, with new technical roles being introduced all the time. The authors discovered within their own unit that new healthcare professionals, both registered and non-registered, were often shown slightly different ways of doing things by more experienced members of the team, which led to confusion. They felt it was a bit like driving; bad habits can easily slip into everyday practice. For this reason, they developed standards of care to act as a benchmark for the ophthalmic practitioner. Written in response to a widely expressed need for greater clarity and consistency, this highly regarded book offers a comprehensive one-stop resource for all ophthalmic practitioners, whether they are registered nurses, healthcare assistants or ophthalmic technicians. This

new edition has been revised to make the text even clearer and bring all the guidance up to date, covering communication, visual acuity testing, ocular medications, the ophthalmic outpatient department, biometry, the ophthalmic accident and emergency department, the slit lamp and tonometry, additional standards using specific equipment, and suggested documentation for providing evidence of development and competence. Sections include: Communication Visual Acuity Testing Ocular Medications The Ophthalmic Outpatient Department Biometry The Ophthalmic Accident and Emergency Department Slit Lamp and Tonometry Additional Standards Using Specific Equipment Next Steps Using Standards

While Christian approaches to the problem of evil

have been much discussed, the issue of theodicy in Islam is relatively neglected. A Muslim Response to Evil explores new insights and viewpoints and discusses possible solutions to theodicy and the problem of evil through the early philosophy and theology of Islam as well as through a semantic analysis of evil (sharr) in the Qur'Ä n. Reflecting on Said Nursi's magnum opus, the Risale-i Nur Collection (Epistles of Light), Tubanur Yesilhark Ozkan puts Nursi's theodicy into discourse with so called 'secular' theodicy or 'anthropodicy', supported by scholars such as Newton, Descartes, Leibniz, Spinoza, Hume, and Kant. Her study offers a fascinating new perspective on the problem of evil for scholars of comparative religion, philosophy of religion, and Islamic thought.
