The Complete Book of Triathlon Training is for all athletes who want to improve in or convert to the fascinating sport of triathlon. It shows among other things how to construct a training program, how to approach a competition and offers an Encyclopedia that covers all aspects of triathlon. This book shows the triathlete and aspiring triathlete everything they need to know about triathlon, whether a sporting novice or an accomplished athlete in another sport. It tells you how to get started, what equipment to buy, the diet you will need, how to devise a training routine and how to arrange your busy life in order to accommodate it, and then explains how to finish a race, as well as how to recover from it. The Complete Book of Triathlon Training will tell you how to be the best that you can be in triathlon; not necessarily by training harder, but by training smarter. Every aspect of your life has the potential to affect your mental and physical performance, and you need to take this into account when devising your training in order to avoid both over-training and under-training. Mark Kleanthous' system for monitoring training-stress levels which he has been successfully using for many years is unique to him but is revealed in this book. Use it and you can achieve your optimum performance.

Strength Training for Triathletes offers a comprehensive strength training program for triathlon that will help triathletes build power, speed, and muscular endurance for faster racing over any race distance. Certified USA Triathlon coach and NSCA Personal Trainer of the Year Patrick Hagerman, EdD, reveals a focused, triathlon-specific strength training program that will enable triathletes to push harder during training and on the racecourse when the effort is hardest. Triathletes who master this progressive strength training program will also become more resistant to injury, meaning fewer missed workouts. Strength Training for Triathletes features 75 of the most effective strength training exercises for triathlon swimming, cycling, and running plus core strength and general conditioning. Full-color photographs illustrate each simple exercise, and exercises are grouped so athletes can focus on their own individual performance limiters. Hagerman simplifies the science underlying strength training, offering easy-to-follow guidelines on resistance and reps that will make triathletes stronger through every phase of the season. Strength Training for Triathletes develops these abilities in triathletes: More powerful, longer-lasting muscles Resistance to fatigue and injury Improved body composition with stronger, leaner muscle mass Better performance without added bulk New in this second edition are sample strength training programs for the most popular triathlon race distances and for each of triathlon's three sports, full-color photographs showing detailed body positions for each exercise, several new exercises, new indexes that specify body-weight exercises and weighted exercises, an exercise log template to track your goal weights, and a new index to improve usability. Strength training often separates the top performers in triathlon from the middle of the pack. Even small

Every year, more and more people are rising to the challenge of completing their first triathlon. The combination of swimming, cycling and running ensure that triathlon is not only one of the most physically demanding sports, but also one of the most rewarding. Triathlon Training Basics is the complete guide to triathlon training. Providing advice for individual competitors as well as individual members of a team competing together, it contains all the essential information triathletes need to successfully complete a triathlon. detailed training plans for beginners and more experienced athletes advice on equipment and clothing for each of the elements technical training tools advice on how to develop your training strength training programmes stretching programmes injury prevention techniques Triathlon Training Basics is essential reading for any beginner thinking about embarking on their first triathlon, through to experienced athletes wishing to improve their training. A breakthrough program for triathletes -- beginner, intermediate, and advanced -- showing how to balance training intensity to maximize performance -- from a fitness expert and elite coach. Cutting-edge research has proven that triathletes and other endurance athletes experience their greatest performance when they do 80 percent of their training at low intensity and the remaining 20 percent at moderate to high intensity. But the vast majority of recreational triathletes are caught in the so-called "moderate-intensity rut," spending almost half of their time training too hard--harder than the pros. Training harder isn't smarter; it actually results in low-grade chronic fatigue that prevents recreational athletes from getting the best results. In 80/20 Triathlon, Matt Fitzgerald and David Warden lay out the real-world and scientific evidence, offering concrete tips and strategies, along with complete training plans for every distance--Sprint, Olympic, Half-Ironman, and Ironman--to help athletes implement the 80/20 rule of intensity balance. Benefits include reduced fatigue and injury risk, improved fitness, increased motivation, and better race results.
