day on excavations or in museums, this also means that we must change the way we approach teaching and communicating archaeology as a discipline. The communication of archaeology is an often neglected but ever more important part of the profession. Instead of traditional lectures and museum displays, we can interact with the past in various ways. Students of archaeology today need to learn and understand these technologies, but can on the other hand also profit from them in creative ways of teaching and learning. The same holds true for visitors to a museum. This volume presents the outcome of a two-day international symposium on digital methods in teaching and learning in archaeology held at the University of Cologne in October 2018 addressing exactly this topic. Specialists from around the world share their views on the newest developments in the field of archaeology and the way we teach these with the help of archaeogaming, augmented and virtual reality, 3D reconstruction and many more. Thirteen chapters cover different approaches to teaching and learning archaeology in universities and museums and offer insights into modern-day ways to communicate the past in a digital age.

education and became a certified teacher at age 17. Rachel's first interview with the teachers union placed her on notice that she was a link in a curriculum driven education program. She was to teach her grade level curriculum only and never bring attention upon herself or her peers. Conformity was the rule and mediocrity was the goal. Rachel refused the union's demand to conform and motivates her students to become exceptional and exceed grade level expectations. The more successful Rachel is in her classroom, the more the push back by the teachers union to return her to mediocrity. Conflict between Rachel and the union results in the union poisoning Rachel, falsely accusing her of abusing a student; false drug violations on school property and ultimately the loss of her left leg as the union seeks to stop Rachel's desire to help her students become exceptional. Learn how Rachel fights back and creates the Sinclair Academy, a private educational system that the union has no control over. No longer does the union want to stop Rachel from promoting accelerated learning; now the union wants her 2,500 teachers to join the teachers union. See how far the teachers union will go in an attempt to force union membership and what a young, tenacious teacher will do in saying, No. This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level.
