In 1980, a handful of "microbrewery" pioneers launched a revolution that would challenge the dominance of the national brands, Budweiser, Coors, and Miller, and change the way Americans think about, and drink, beer. Today, there are more than 2,700 craft breweries in the United States and another 1,500 are in the works. Their influence is spreading to Europe's great brewing nations, and to countries all over the globe. In The Craft Beer Revolution, Steve Hindy, co-founder of Brooklyn Brewery, tells the inside story of how a band of homebrewers and microbrewers came together to become one of America's great entrepreneurial triumphs. Beginning with Fritz Maytag, scion of the washing machine company, and Jack McAuliffe, a US Navy submariner who developed a passion for real beer while serving in Scotland, Hindy tells the story of hundreds of creative businesses like Deschutes Brewery, New Belgium, Dogfish Head, and Harpoon. He shows how their individual and collective efforts have combined to grab 10 percent of the dollar share of the US beer market. Hindy also explores how Budweiser, Miller, and Coors, all now owned by international conglomerates, are creating their own craft-style beers, the same way major food companies have acquired or created smaller organic labels to court credibility with a new generation of discerning eaters and drinkers. This is a timely and fascinating look at what America's new generation of entrepreneurs can learn from the intrepid pioneering brewers who are transforming the way Americans enjoy this wonderful, inexpensive, storied beverage: beer.

Soap operas and telenovelas are watched by millions of people around the world every day. As cultural, social, and economic phenomena, examining them will further our understanding of the role of global media content in the digital age. Moreover, as these programs continue to be exported and transformed at regional levels, and through digitalization, it is more important than ever to analyze where the genre has been, where it is now, and where it is going. This collection brings together original scholarship from an international and trans-disciplinary perspective. Chapters address timely issues, theories, and debates that are inextricably linked to soap operas and telenovelas as global industries, as sites for new audiences, and as hybrid cultural products within the digital landscape. Bringing depth and originality to the subject area, each chapter demonstrates the richness of these genres and their long-term significance as the televisual landscape evolves and becomes increasingly reliant on technological and creative innovations.

'I immersed myself in magic. I read every book I could get my hands on and practised and practised, day after day and night after night. Magic became my world...some might say an obsession.' When you're a kid life can seem tough; tougher for some than others. But the darkest of times can also be the most enlightening. When his late granddad showed him magic for the first time, Steven Frayne knew there was more to life than hiding from bullies. He had a destiny. A calling. In that moment Dynamo was born: the most exciting magician of the 21st century. Since then, Dynamo has shocked, thrilled and amazed men, women and children, from all walks of life, all over the world. With his mind-blowing illusions, he has catalysed a whole new era of magic. Now, in his very first book, Dynamo invites you to join him on a breathtaking journey across the globe. Be prepared to levitate Lindsay Lohan in Singapore, transform snow into diamonds in the Austrian mountains, and walk on water across the River Thames. Along the way, he reveals how to make the impossible possible, what it takes to pull off the greatest stunts man has seen, and why everyone needs magic in their lives. This is no illusion. This is Dynamo revealed.

This book is also concerned with world economics, but it is approached from the viewpoint of ethics. It argues that the hubris of the present global market is destroying communities and wreaking irrevocable damage to the planet: we live in a modern version of the Midas myth. Justice in its broadest sense -- fair shares for all -- is eloquently held up as the prime virtue of human communities. Timothy Gorringer, Professor of Systematic Theology at the University of Exeter, offers practical suggestions for an ethical transformation to replace the spiraling profit-driven economy with a steady-state economy that meets human needs and encompasses the well-being of other species and the environment.

English Riddles from Oral Tradition
The Poetics of Aristotle
Prabhat Prakashan

is the earliest surviving work of dramatic theory and the first extant philosophical treatise to focus on literary theory. This has been the traditional view for centuries. However, recent work is now challenging whether Aristotle focuses on literary theory per se (given that not one poem exists in the treatise) or whether he focuses instead on dramatic musical theory that only has language as one of the elements.
